THE WATCHMAN-WARDER, AUGUST 15th, 1901.

APPENINGS ABOUT TOWN

Little Local Lines

Builders can get everything they require in lumber and timber, doors and sash, at the Rathbun Company's yards.—30.

—Every young man in town should read the "Letter from a self-made merchant to his son in college," printed on our first page.

—It is estimated that about 7,000 men have left Ontario for the Northwest to assist in harvesting the grain, as against 8,500 last year.

—The thanks of our staff are due Mr. Joseph Hickson of Manvers for a basket of "red ripe" Astrachan apples, left at this office yesterday.

—**Women's Golf Capes for early fall wear just received. A great range of plaids and tartans in this lot at \$6, \$7.50 and \$10. DUNDAS & FLAVELLE BROS.**

—Rev. E. Roberts will preach in Cambridge-st. Methodist church on Sabbath next two sermons on "Abraham offering up Isaac, his trial and victory with lessons for us."

—I thought to spend a week in camp with a party of congenial spirits," said the fat man in the linen suit as he entered a local bookstore, "and I want a good book to take along—something appropriate you know." "Yes, sir," replied the knowing clerk, "we have just what you want in a revised edition of 'How to Mix Drinks.'"

—The army worm is working havoc with the grain in Salem, Ops section. Messrs. Hugh and James Patton are the sufferers so far. These worms move in droves from 20 to 30 rods wide and strip the grain off the stock. A few years ago these pests visited the Little Britain section and caused considerable loss before being stamped out.

—A report was current about town Tuesday afternoon to the effect that Mr. James Greenan of Pine Grove, Ops, had fallen in front of his binder, losing both his legs. The report caused painful suspense among his many friends for a few hours. In the evening Mr. Greenan drove into town in his usual health, thus dispelling all doubts.

—The annual excursion of the Salvation army will take place Monday Aug. 26th per steamer Crandella to Chemung Park. Chemung is among the prettiest and most interesting places on the Kawartha lakes and is within easy reach by bus or bicycle to Peterboro. Swings and other amusements for the "bairns" are found there. Brass band and orchestra on board.

—Tuesday of last week Mr. Chas. N. Squires met with a severe accident while visiting friends at Picton. He was driving along the lake shore when his horse ran away, throwing him against a fence. He was rendered insensible and received several severe injuries. His left ear was badly cut, several stitches being necessary. The wound is healing very slowly and since coming home a local physician found it necessary to add a stitch or two.

—Col. Deacon is a careful reader of the Watchman-Warder, and he put on his glasses last week when he read Dr. A. Wilson's letter on "The Fenelon Falls bridge." The colonel did not meditate on a reply. However he wished us to state "that all fees collected by him were with the fines imposed paid over to the treasurer of the county." The colonel adds that Mr. Wilson may have unconsciously thought that he got the fees, but such is not the case, as he has never received any part of it in this or any other case.

—Thursday when the C. M. B. A. excursion train reached the top of the grade on Victoria-ave it was brought to a standstill with a suddenness that almost threw Fireman Wells into the firebox and caused Engineer Wilkinson to say things that a church member should not expect under great provocation. The coaches were crowded and standing at the end of one of them was a rural excursionist of a very inquisitive turn of mind. Seeing a mechanical contrivance on the wall above his head, he reached up and jammed the handle down, with the result that the heavy train was stopped within a couple of lengths of itself. The steam brake had been monkeying with, and the results far exceeded his most sanguine expectations. When the station was reached the engineer and fireman tried to make his acquaintance, but he disappeared.

Many friends in town will regret to hear of the death of Miss Jessie Pell Brown, only daughter of Mr. James Brown of H. M. Customs, Niagara Falls, Ont., one of Canada's brightest scholars, at the St. Catherine's Hospital Saturday evening last, after an illness of two weeks' duration with typhoid fever. Miss Brown although only in her 25th year, had secured the most distinguished honors in her profession as a teacher. The deceased was born in Crowland township, Welland county, in 1875. Her early education was obtained in the Welland and Niagara Falls public schools, and when but 10 years of age she passed the entrance examinations and commenced her duties in the Drummondville high school, coming to Lindsay five years later, where she too honors and won the gold medal for proficiency under Miss Fitzgerald, of the Colander Institute Institute staff, after wards matriculating with honors, taking the Mary Mulock scholarship in Latin at the Toronto University. Graduating with honors four years later and receiving the degree of Bachelor of Education from the University of Toronto. Last year she secured a fellowship in Latin in this university she obtained the degree of M. A., obtaining the highest marks ever given in this university for this degree. Last year the deceased secured a fellowship in Latin in the University of Pennsylvania, and this coming term would have in all probability obtained the degree of Ph. D. It was her intention next month to take up her work in the University of Colorado.

Little Local Lines

—For pure drugs go to P. H. Coad druggist and optician, Lindsay.—33.

—Lime, Cement, Plaster Paris, fresh and first class. The Rathbun Company.—30.

—Wanted—Four apprentices, to the dressmaking. Apply to Mrs. F. Pepper, cor. Russell and York-sts.

—The young man Shea, who was so seriously injured in a runaway accident last week has recovered sufficiently to be removed to his home in Ops.

—The excursion last evening to Sturgeon Point by the Kawartha Club was a decided success, as was also the entertainment given at the Point on the arrival of the steamer.

—Do you want a barrel or a sack of the pure "White Salt"? If so drive through the yard of the Butler House to the big door in the end of Flurey's New Building in the rear of the Oak Front Grocery and you will find it there and a very handy place to load. At the same time get a hundred or two of the famous McCormick Binder Twine. It is the best made. JOHN FLUREY.—32-3

—It has been suggested that every lacrosse club in Canada should play a match before the close of the season in aid of the "Beers Memorial Fund." If this is agreed to by the two lacrosse associations, as it probably will be, and the amount thus raised supplemented by subscriptions from the many admirers of Dr. Beers throughout Canada, the success of the project would be placed beyond a peradventure. A considerable sum has already been promised in Toronto and Montreal by private subscriptions.

—On Thursday night last a gentleman from Downeyville was driving down Lindsay-st. to the east ward. The night was very dark and there being no lights on the bridge he did not notice that the swing was open, and came within an ace of driving into the river. But that a gentleman passing grabbed the horse by the head we might have had a fatal accident to record. There is urgent need of proper lamps being placed on the swing bridges within the town limits, as well as on the Ops bridge to the south of the town.

—What might have been a serious accident occurred in Anson township last week. Mr. Herman Bowen was unloading hay from his wagon into a mow with a patent hay fork, and the rope having caught in the pulley fastened to the barn floor he gave it a kick to straighten it, but unfortunately the hook was unfastened from the floor and the pulley block flew up striking Mr. Bowen in the temple, knocking him senseless and inflicting a very severe wound in his forehead that will leave a mark for life to remind him of the accident, and of what might have been the consequence.—Echo.

—A whole case of Black Ribbon Valves just opened this week. We have all the valves and qualities and Sails and Cotton barks. BUNDAS & FLAVELLE BROS.

—On Thursday last Mr. Roddie Doherty, an employe of the S. G. Parkin mills here met with a fatal accident at Midland. He had accompanied C. M. B. A. excursion and about 5 p. m. in company with Mr. Alf. Parkin, was inspecting the machinery in the Chew mill. In stepping aside to avoid the carriage, deceased missed his footing and fell from the gangway to the floor beneath, a distance of about 15 feet, alighting on his head and shoulders. When taken up he was insensible and remained so for several hours. He was at once removed to a hotel and Drs. Raikes and Willoughby summoned. It was found that he was suffering from concussion of the brain. Everything possible was done for him but death relieved his sufferings about 10 o'clock the following morning. His remains were brought home by Mr. Parkin, interment taking place at Fenelon Falls on Saturday. A widow and several small children survive him.

—On Monday last Postmaster Gladman received a letter from Mr. O. Roberts of Nome, Alaska, enquiring for the relatives and friends of Joseph Brennan, who was drowned in the Fish River, Alaska, on July 17th. The letter was dated July 25th and stated that the writer had known Mr. Brennan for many years, and having frequently heard him speak of friends in Lindsay and Peterboro had sent a similar letter to the post master at Peterboro with the view of locating his relatives. The deceased had left home with a team of horses and a prospector's outfit for Fish river where he lost his life. He had on his person at the time some \$300 or \$400 and owned a one-third interest in a Seine River mining property. Caretaker Galbraith took charge of the letter and quickly got trace of the relatives and sister both reside here. Mr. Thos. Brennan who has lived with Mr. M. Guiry of Ops for several years and Mrs. James Ashworth of the south ward. A communication giving the above information was at once despatched to Mr. Roberts.

Little Local Lines

—Mr. David Thornton of Lindsay has gone to Morden, Man.

—Mr. Walter Arksey of Ops took in the Manitoba excursion on Monday morning.

—Miss Adeline Donnelly of Millbrook is the guest of Mrs. A. H. Homan, Bond-st.

will be run during August. Exact dates made known in a few days. Write or call on.....

T. C. MATCHETT, Agt.

60 Kent-st., Lindsay

Burnt River Improvements.

We are in receipt of a communication from Mr. J. H. Carnegie, M.P. P. in reply to Mr. R. A. Callan's communication under the above heading in our last issue. We regret that want of space and time compels us to hold this letter over until next week.

The New Main Across the River

The work now being carried on in connection with the laying of a new main across the river should be of great interest to every ratepayer. The crossing is being made on Bond-st. connecting with the William-st main on the west and with the Lindsay-st main on the east. At this point the river bottom is all rock and the difficult work of blasting out a trench in which to lay the pipe so there should be no risk of any logs or boats striking it was entrusted to Mr. Wm. Walters. Results go to show that it was placed in the hands of the right man, for Mr. Walters pushed the work right along from the start to its present state, working at night by the aid of arc lights in order to drive it to completion. He would have had it finished ere this had he not been delayed by the non-arrival of special castings from the Toronto foundries. Few people realize the difficulties men have to contend against on a job of this kind. It seems to the onlooker a very simple matter to drill a hole in a rock, load it with dynamite and explode it; but then the general onlooker does not consider it requires good judgment—the result of experience—to decide just how far apart and how deep holes must be drilled to insure uniform depth and width and just how heavily they should be loaded to properly shatter the rock. This Mr. Walters has done for the superintendent reports a No. 1 job as far as it has gone. On the west side no difficulties were encountered, if we except a corner of a boat house and a pine stump, both of which bear marks of the danger of getting into the way of men who are bound to go through. On the east side a spring of flowing water was encountered at the corner of Lindsay and Bond-sts, the quality of the water, however, was not appreciated by the men, as it made very risky the work of pouring hot metal into the joints. As soon as the special castings bolt and socket joints, arrive Mr. Walters will at once proceed to clean out the trench, which is being partially filled in owing to boats passing and rearing up alongside the trench by the divers. The pipes will be swung across the river and lowered into place by specially constructed tackle. The pipes once laid, inspected and passed, the trench will be refilled, except where the joints come, with rock to steady the pipe and protect it. The coffer-dams will then be built and the final connections at each side made. The lowering of the pipes will probably be done on Sunday so as not to impede navigation, as it is a job that may take all day to achieve.

CLEARING LINES

Twenty Women's Metal Bolts, silver gilt and nickel, bolts that were 80c, 95c and \$1.25, for 50c. DUNDAS & FLAVELLE BROS.
