### DEADLY GERMS.

Reported Discovery of the Microbe of Summer Complaint.

New York, Sept. 9 .- The death of John D. Rockefeller's grandson "Jack," two years ago, has enabled two students, one at Johns Hopkins, and the other at the University of Pennsylvania Medical Schools, to discover what is believed to be the organism or germ of disease that carries off so many little ones every summer and which is commonly called "summer complaint," says a Baltimore special to The

When little Jack died, two years ago, Mr. Rockefeller is said to have offered a fund of \$200,000 to be devoted to research. The outcome of this offer is the reported discovery of the fatal germ. In forty-two cases the organism found is nearly identified with that which produces dysentery in adults.
