### GREATEST MINE IN THE WORLD IS MANAGED BY A CANADIAN

Mr. W. A. Carlyle, Son-in-law of Mr. Robt. Speir, Lindsay, is Chief of The Rio Tinto

In Tuesday's Mail and Empire the following article appeared concerning Mr. W. A. Carlyle, son-in-law of Mr. Robt. Speir of this town and well known to many here:

"Some day I may return to Canada to live, but just at present Spain is plenty good enough for me," said Mr. W. A. Carlyle, general manager of the Rio Tinto Mine, who is registered at the King Edward, where he was seen last night by The Mail and Empire. Mr. Carlyle is accompanied by his wife and little daughter and is paying a short visit to Ontario after an absence of four years.

Outside of the King and his advisers there is probably no one man who wields a greater influence in Spain to-day than Mr. Carlyle. When his appointment to the management of the Rio Tinto Mines was announced some four years ago it was hailed with delight by Canadians as something in the nature of a national triumph. Mr. Carlyle was at that time manager of the great Le Roi Mine at Rossland.

The Rio Tinto Mine is the largest in the world. It is controlled by an English syndicate, and is situated in the south of Spain, the seaport of the company being at Huelva, the port from which Columbus sailed on his voyage to discover America. The mine is sixty miles inland, and is reached by railway.

There are 11,000 men on the payroll of the Rio Tinto, comprising 75 Englishmen on the staff in charge of departments. Mr. Carlyle says he has found the Spaniards excellent workmen. They receive their pay daily, a plan which is found to work well, as it tends to keep the men out of debt.

**AN ENORMOUS OUTPUT**  
 The output of the Rio Tinto is about two million tons of ore a year, half of which is shipped to Europe and America and sold for copper and sulphur values. About five per cent. of the ore is treated by smelting to blister copper in the latest type of American smelting plant. The balance is treated locally by leaching with water a method distinctive to a few mines in the south of Spain, and in no other part of the world. Every twenty-four hours seven million gallons of copper liquor from these leaches are run into canals filled with pig iron and metallic copper is precipitated, known as cement copper, which, with copper blisters, is sent to the company's refining plant in Wales.

The company turns out about eighty million pounds of copper a year, and it is one of the largest

producers in the world, being only exceeded by the Anaconda, in Butte, and the Calumet and Hecla, in Michigan. It is not only the largest copper dividend-paying mine, but pays more in dividends than any other mine in the world, with the exception of the De Beers diamond mines in South Africa. The Rio Tinto pays from six and a half to nine millions a year in dividends, according to the price of copper.

**\$21,000,000 IN THREE YEARS**  
 In the past three years, under Mr. Carlyle's management, no less a sum than twenty-one million dollars has been paid in dividends. The Rio Tinto has the largest reserve of ore in the world, enough being in sight to permit of the present rate of extraction for the next 100 years. At their seaport the company has the largest private pier in the world, and unloads from thirty to forty ocean steamers per month.

Mr. Carlyle stated that Mr. R. E. Palmer, a Canadian boy, who graduated at McGill in his year, is doing extremely well there. He is the mining engineer in charge of all the underground work, and has 2,600 men under him.

When Mr. Carlyle assumed charge of the Rio Tinto he was beset with labor troubles, and was called upon to settle several strikes. This he did and now matters are moving along smoothly, and the men are highly satisfied.

The Rio Tinto was first worked by the Romans over twenty-six hundred years ago, and is rich in historical lore. Mr. Carlyle says he enjoys life in Spain very much, the winters being especially fine, frost being almost unknown. He will leave on the return voyage in about two weeks.

Mr. Carlyle is a Woodstock boy, his father now being school inspector for Oxford county. Miss Florence Carlyle, the well-known Canadian artist is his sister.

### TWICE TOLD TALES

News of The World Condensed Into Brief Paragraphs

—Four bulky bluebooks, which were issued this week, containing the report of the Commission of Enquiry into the South African War and the evidence given before it, have disclosed a state of affairs hardly less serious of the historic Commission of Enquiry after the Crimean War. The London papers have devoted pages to it as well as columns of leading articles. It must suffice to say that all the attacks on the War Office, which were made during the war, when in those months of constant defeat charges of every kind of criminal neglect were made against it, have been fully justified by this report, which shows that worse charges and more numerous ones might justly have been brought.

—George Moin, an employee of the G.T.R. from Winnipeg, was brought to the Emergency Hospital, Toronto Saturday night, suffering from a broken thigh. While employed repairing the fire box of an engine at the foot of Spadina avenue, several freight cars were shunted along the track, striking the engine. Moin was doubled up by the moving engine and beside the break it is thought he has sustained serious internal injuries.

—Both in official and revolutionary circles the opinion is freely held that war between Turkey and Bulgaria is imminent, and can be averted by nothing short of a miracle. It is not expected that either Government will formally declare hostilities, but that the prevailing conditions will force on a war.

—The government has decided on Thursday, October 15, as Thanksgiving Day, the same time as last year. Previous to that time Thanksgiving Day was generally held in November. There was complaint that it was too late in the season, and last year the date in October was decided on.

—By the bursting of a throttle valve on the engine at Sutherland-Innes Stave Factory St. Thomas, Charles Hood, the engineer, was severely scalded that he may not recover.

—A fine of \$100 and costs was levied by the Stratford police magistrate, on a man named Levi, a Fullerton farmer, for terrible cruelty to a child which had been placed in his care. The information was laid by the Perth Humane Society.

—James Tizger, brakeman, was killed instantly on the track near New Hamburg between 4 and 5 on Sunday afternoon. There was a Sunday night about a mile and a half south of Tupperville. The axle of a car tank laden with crude oil for the Carnia Railway broke, and a car laden with naphtha crashed into the tank car. In some way the wreck took fire and exploded. The explosion was heard for miles around. Several of the train crew had narrow escapes in their efforts to save the rolling stock. Despite their efforts five freight cars were burned.

—A despatch from Aden, Arabia, seems to explain how the Mad Mullah of Somaliland has constantly received supplies of arms and ammunition in spite of the efforts made by Great Britain time and again to suppress this traffic. The supply of war materials which has enabled the fanatical ruler of uncivilized tribesmen to successfully resist the work of British troops has been conclusively traced to a London firm, which has been shipping them by way of Marseilles to Zanzibar. Since the operations against the Mullah began in Somaliland the English firm has sent three million rounds of ammunition to be used against British troops, in addition to a great number of rifles. The question now is whether this

## THE FAMOUS DENNIS PUMPS

The Sylvester Mfg. Co. are now prepared to supply the above pumps for any depth of well up to 100 feet and guarantee satisfaction. The day of the black iron pipe and cast iron cylinders is past as the public know from experience. What you want when buying a Pump is GALVANIZED IRON PIPE, BRASS CYLINDERS with threads, not bolts which rust and fall off, AND STEEL RODS, which do not rust or tam the water.

We are also placing a larger bore and brass cylinder and steel rod that will last, and throw more water than any pump on the market. Our practical man MR. JOHN DENNIS, looks after all orders and repairs. Satisfaction Guaranteed. WELL ORDERS receive prompt attention.

## WINDMILLS

We are also prepared to supply Superior Windmills on specifications. THE Sylvester Mfg. Co. Lindsay, Ont.

firm will be prosecuted on charges of treason.

—Joseph Lambert, of Armaston was accidentally killed on the Canada Atlantic Railway track, about five miles west of Renfrew. He was walking on the track and being very deaf did not hear the train.

—Dugald Leitch, aged 32 of St. Thomas, a brakeman on the Michigan Central Railroad, while setting a block switch at Armherstberg had his right foot taken off by a train.

—The Grand Trunk Railway at Princeton, near Woodstock was blocked for several hours on Sunday through a rear-end collision between two freights, which occurred about midnight. A regular freight which had pulled in on the main line track afterwards received orders to take switch to let another train pass, and while backing up to make siding at Princeton, was pitched into by a special freight train of perishable goods, and her ten cars were smashed, took fire and were destroyed. A brakeman named Barrow of Stratford, who was sent down the track to flag and place the semaphore against the incoming train, was badly burned by oil, caused by the explosion of an oil tank. The fireman and engineer of the incoming train jumped when within sixty yards of the wreck. The accident is said to have been caused by the engineer of the incoming train not seeing the order of the brakeman of the regular freight train.

—A serious accident happened to a freight train on the Erie and Huron division of the Pere Marquette line Friday night about a mile and a half south of Tupperville. The axle of a car tank laden with crude oil for the Carnia Railway broke, and a car laden with naphtha crashed into the tank car. In some way the wreck took fire and exploded. The explosion was heard for miles around. Several of the train crew had narrow escapes in their efforts to save the rolling stock. Despite their efforts five freight cars were burned.

**The Old Farm Horse**  
 "Why don't you sell him? He must eat his value in a month, twice told.  
 He's spavined, hide-bound, nearly blind;  
 He's twenty if he's one day old.  
 You never work him. What on earth you keep the brute for I can't see;  
 Your other horses, young and sound, seem to fare scarce as well as he."  
 "I'll tell you, neighbor, why I keep this old horse, though he's lame half blind.  
 Once—he don't look like it now, I own—  
 He was a good horse, sound and kind.  
 He hadn't one bad trick and worked Right faithfully, day in, day out,

And he could trot; though he toiled hard.  
 He was as lively as a trout.  
 "When I first took this farm on shares—  
 I own it now all free and clear—  
 'Twas twenty year or more ago.  
 Then land was cheap enough round here.  
 It was hard scratching with me then,  
 For I had little cash or stock,  
 And though the soil was fairly good,  
 'Twas sprinkled pretty thick with rock.

"Old Dan, there, was a little foal;  
 I raised him, fed him, broke him, too;  
 Put his first harness on, and soon  
 Obedient to my word he grew.  
 I never saw a steadier horse  
 Before the harrow or the plow;  
 He'd work, yet scarcely turn a hair,  
 Although he is so feeble now.

"I thought, one year, the land I'd leased;  
 This sorely crippled me in purse;  
 The next my crops failed out and out,  
 And matters went from bad to worse.  
 My milch cows died; at length I had  
 To give a mortgage on the place;  
 I sold my team, but still kept Dan,  
 Though ruin stared me in the face.

"But I'd touched bottom, though 'twas deep,  
 And things at least began to mend.  
 I worked hard, pinched, crops turned out well;  
 Where once I owed I now could lend.  
 And Dan had proved a friend in need  
 Friends when you're down are precious few.  
 No, Dan, old boy, I won't forget  
 How hard you toiled to pull me through.

"And you see, that Dan and I  
 Have known the ups and downs of life together.  
 I'll not part with him,  
 Neither will Mary—that's my wife  
 The children too, love poor old Dan,  
 Though falling fast in wind and limb.  
 When he was young he helped me out,  
 And now he's old, I'll stick to him."

W. R. Barber.

**Our Store will Close on Labor Day.**

Spruce up a bit, Sir, for Labor day, and should you need anything new remember this is a Union Store selling Union Made Clothing, Hats, Caps and Furnishings.
