The Oven That Ends Guesswork

Before you put the roast in an Imperial Oxford oven, let the draft bring the heat to the right point. You'll know when it gets there if you'll look at the oven thermometer. After the roast goes in, you can know (not guess) it will be cooked right in a certain definite time. There's no ups-anddowns to the oven-heat in a range built as this one is, - the diffusive oven-flue takes all the guess work out of cooking, all the drudgery out of oven-use

That Rack That Ends Bother

When the roast needs basting, pull forth the Imperial Oxford drawout oven rack,—roast and all—slide it right out where you can get at it. Needn't reach in and scorch your fingers nor sear your wrists, -baste it in comfort. That one thing alone-the drawout rack-ought to make you like this range above all ranges. And that's only one of the twelve better things about this range. Come and look.

(Continued from Page 2.) I said, Th the name of Heaven, what is all this?" "'He has murdered me-he, he, the wretch!' exclaimed my master, wh immediately fell back and expired." "Did the deceased mention the prisoner by name?" inquired the counsel for the Crown.

"Not once." "Did the deceased appear collected and self-possessed when making this daring declaration?" "No; he seemed wild and distract-

This witness was now subjected to a severe cross-examination, which failed to shake his very important evidence. The other domestics were all examined in turn, and all corroborated the estimony of the butler as to the position in which the deceased and the prisoner were found on the occasion of the discovery of the murder, as well as the testimony of Sir Ruthven and Lady Lester in regard to the enmity that had existed between the tutor and the late baronet.

Dr. Clark was then called to the
