Results of Experiments With Autumn Sown Crops in Oatario

Three hundred and twenty-eight 160 lbs. per acre. The Mixed Ferti farmers throughout Ontario conduct- lizer consisted of one-third of the experiments with autumn sown crops quantity of each of the other three during the past year. Reports have fertilizers here mentioned. The us-Abeen received from thirty-one of the ual cost of the fertilizers, as used in counties of the province. The aver- the experiment, is between four and age relults of the carefully conducted experiments with autumn sown crops are here presented in a very

Winter wheat. Five varieties winter wheat were distributed last autumn to those farmers who wished to test some of the leading vari a jes on their own farms. The average yields per acre of straw and of grain are as follows: Imperial Amber, 1.5 tons, 24.3 bus. ; American Wonder, 1.5 tons, 21.8 bus. Crimean Red, 1.9 tons, 21.5 bus. Stanatka, 1.4 tons, 21.2 buse; and Tasmania Red, 1.8 tons, 21.0 bus.

It will be seen that Imperial An ber has again given good results throughout Ontario as well as the Ontario Agricultural College. The American Wonder, which gave an average of 21 bashels per act less than the Imperial Amber, is white grained variety resembling very closely the Dawson's Golden chaff. The Crimean Red winter wheat has been known at the College for ten years, and is one that yields very well indeed. It possesses wheat of excellent quality but the straw is somewhat weak. The Banatka produces grain of excellent quality for bread production. Winter Rye. Two varieties

winter rye were distributed in autumn of 1911. The results show that the Mammoth White variety came at the head of the list in yield of grain with an average of 23. 9 bushels per acre. In experiments throughout Ontario for the past six years, the Mammoth White surpassed the Common Rye by an annual average of fully four bushels per

Fertilizers with Winter Wheat. the co-operative experiments with different fertilizers applied in the autumn wheat, the average yields of agrain per acre for eight years are as follows : Mixed Fertilizer, 2" 5 Yous. ; Nitrate of Soda, 22.5 bus. Superphosphate, 21.2 bus. On simi- Fodner Crops. The size of each crop Ear land, Cow Manure, at the rate is to be one rod wide by two, rods of twenty tons per acre, gave an long. Material for numbers 8 and average yield of 25.8 bus. per acre and the land which received neither Mertilizers nor manure gave an average of 18.1 bus per acre. The Superphosphate was applied at the rate of Guelph, and Mrs. Wm, Beck of of320 lbs. and the Muriate of "ht- Toronto aged seventy, died at each and the Nitrate of Soda each Guelph.

In another experiment, it was distributed throughout the province found that the nitrate of soda ap- so far this season, has now reached plied in the spring gave 1.3 bushels per acre more than when applied in the autumn. Nitrate of soda creased the yield of wheat more than common Salt when applied either in the autumn or in the spring.

Winter Emmer and Winter Barley. A comparative test of Winter Emmer and Winter Barley was made throughout Ontario in each of the past three years. The average resalts for the three years show that he Winter Emmer gave 1,830 and the Winter Barley 1,812 pounds of grain per acre. Satisfactory results from this experiment were ceived from only four farms in 1312, and according to each of those ports the Winter Emmer surpassed the Winter Barley in yield of grain

Hairy Vetches and Winter Rye for | months of the year, and rather than Fodder. Three good reports have been received from farmers who tested Hairy Vetches and Winter Rye as Fodder Crops. In each instance, the Hairy Vetches gave a considerably larger yield of green crop per acre than the Winter Rye, the average for the Hairy Vetches being about 25 tons of green crop. This large yield is due principally to the com-

paratively wet, cool weather. Distribution of Material for Experiments in 1912. As long as the supply lasts, material will be distributed free of charge in the order in which the applications are received from Ontario farmers wishing to experiment and to report the results of any one of the following tests , three varieties of Winter Wheat 2, two varieties of Winter Rye; 3, five Fertilizers with Winter Wheat 4, Autuimn and Spring applications of Nitrate of Soda and Common Salt with Winter Wheati; 5, Win-Emmer and Winter Rye; Hairy Vetches and Winter Rye

will be sent by express and that for the others by mail.

Australian High Commissioner Discusses Naval Question.

In Speech on Imperial Defence at Toronto, Sir George Reid Says That If the Bonds of the Empire Are to Be Strengthened It Must Be Done at Once-Has Nothing to Say Re- for details as to the 1. ported demand garding the Method of Action.

Commonwealth of Australia, in a navy, to act quickly. In concluding ish wishes. his eloquent speech he said: We know that intense as our loyalty is, that the LINDSAY MARKETS your loyalty is just as intense, just your loyalty is just as intense, just as undoubted; we think that you may adopt some other method than ours, in your wisdom, and it is not for us to speak a word to you in matters that so closely concern you, but I think we have a right to say in Australia, after what we have done, that whatever the Empire has got to do, to strengthen the bonds of our Motherland, ought to be done quickly.

"I would like just to give you a few figures with reference to the trade of Australia with the British Empire. It stands in this way: Seventy-five per cent, of everything we buy outside of Australia is bought in the British Empire: from the rest of the world we buy 25 per cent. We do not ask the Empire to buy from us at that rate, because some countries buy 14 per

SIR GEORGE REID.

ent, more in proportion than they sell to us; they sell us 25 per cent.; we sell to them 39 per cent, of all our exports. We have imitated the splendid ex-

ample of Canada in this way, and I may pause for a moment to express leagues and the Parliament of Canada gave Great Britain such a handsome and unconditional preference. We Sturgeon Street Agent Hoyes give a preference to another country that cost us \$5,000,000 a year in customs revenue. We believe in reciprocity and we believe in preference, and we also believe in letting the people of the Mother Country judge for themselves what is best for them with the same independence and fairness and well child and will promptly cure thoroughuess with which we judge is

"Now, there is another thing that I would like to say. We in Australia always be kept in every home where are not so near the storm centres of there are young children. There is the world. We are far away from them, but at the present moment it under a system of compulsory train- solutely safe. Mrs. Chas. Papierre, ing until he is 26. This system is made a light one. It does not interfere too seriously with the preparayoung Canadians and young Austraians must inevitably engage.

"In twenty-four hours the little cloud on the horizon may become a and one naval engagement, if it went | cine Co., Brockville, Ont against us, might shatter the supremacy of the British fleets upon the building them up again, the power that overthrows us won't allow us to get strong enough to have another bat-"That is what we think in Australia;

at the same time we also think this: Mrs. T. J. Parsons is holidaying After all, wherever the Britisher goes, he has got stored up in him somewhere the call of the sea; it was the sea which made the Englishman what he is; it was his love of the sea, his adventures on the sea and his enter-Mrs. J. Morrison is holidaying prise on the sea; when the sea ceases to become attractive to our race, the days of our Empire will be numbered. We in Australia are responding to the call of the sea; we are bringing the men of young Australia face to face with the greatest traditions of our race in sea life by endeavoring to preserve and promote them.
