#### Break up the Old Pastures

This is a bit of advice which farm-1 various animals and birds which feed ers in general would do well to fol- upon them. The tafett crop to grow Some of our most troublesome during the first year is peas. After pests find their breeding-places in that a hoed crop, preferably turnips land that has been left for some would be the safest; after the second years under grass. Wire worms and year there will probably be no grubs white grubs, which are often-times left. During the first year any that very destructihe to crops of all there are in the ground would feed kinds, increase and multiply in such upon the sod that had been plowed places where they feed upon the under, and grain, potatoes or manroots of the grass. Wire worms in gels at the outset would be very their adult stage are known as click ricky indeed. Besides these two inbeetles, oblong, dull-colored crea- sects, old pasture lands, especially tures. White grubs turn into what | where the soil is dry, are productive are commonly called June bugs or | breeding.places for grasshoppers, May beetles. These worms take which spread from these fields to the from two to three years to grow to crops. In the Southern Counties of maturity, and during that long per- Ontario bordering on Lake Erie, iod they feed upon roots and are out there is another serious pest which of sight and out of reach. There also breeds in old pasturee where the is a popular idea that salt will kill soil is light or sandy. This is these creatures, and the question is known as the Rose Chafer. often asked, "How much salt should beende appears usually in great be used per aere?" Like many other | swarms about the time the roses popular superstitions, there is noth-come into bloom and devours, not ng whatever in this material lor the only these flowers, but all sorts of purpose. Enough salt to affect the others that may be growing in the grub, would completely prevent the garden. The worst damage it does growth of any vegetation, and it is is to the blossoms and young ruit doubtful if any amount whatever of grape vines, of which it is partiwould kill the insects. Many other cularly fond. These four serious substances have been tried, but so pests, which are extremely difficult far without success. The remedy is, to control, may be greatly reduced therefore, to break up the breeding in numbers, if not got rid of altoplaces. This should be done by gether, by a short rotation of crops ploughing the grass fields deeply late and especially by keeping pastures in the fall, in order to expose the not more than three years under grubs and their winter quarters to grass.-C. J. S. Bethune, Ontario the frost and raia, and also to the Agricultural College, Guelph

# Niagara Falls, Ont., Sept. 3. -

Iwo women are dead and one man and two children are seriously ill as result of a dinner of toadstools. The dead are Mrs. Nora Phelps and Mrs. Joseph Sabo, all of Montrose, near this city. Mr. Sabo is in thelife and death, and his two children PIANOS AND ORGANS, NEW ANI Sabo collected the fungus growths in a field near their home, mistaking wife pre tre them for the evening

Mrs. Phelps died Sunday afternoon and Mr. and Mrs. Sabo were taken to the hospital, where the second woman died Sunday night. It was stated at the hospital to-day that there is little hope for Sabo's recovery and the children who are being cared for by neighbors may pull
