Little Stories of Big Canadians-- Big Stories of Little Canadians

(Anecdotes of G. A. Macdonald.)

When Hon. A. G. MacKay was leader of the Liberal party in Ontario he had to live sometimes in the local option town of Owen Sound. On one visit to Toronto, he met a certain prominent Liberal whose views on temperance may have been pronounced enough to stir the mischief of Hon. A. G.'s wit. "Well, how's the world been treating you, MacKay?" queried the prominent Liberal of Toronto. "Very seldom, lately," sighed the witty leader.

Among Canadians, of course, Sir John A. Macdonald will long remain as the unrivalled King of Anecdotes. More good stories were

CONSTIPATION

Soon Follows If The Liver Is Not Active.

Constipation is one of the most frequent, and at the same time, one of the most serious of the minor ailments to which mankind is subject, and should never be allowed to continue.

A free motion of the bowels daily should be the rule of every one who aspires to perfect health.

Keep the bowels properly regulated by the use of MILBURN'S LAXA-LIVER PILLS, and you will enjoy the very best of health.

Mr. O. J. PRILEY, Medicine Hat, Alta., writes: "I have been troubled with Constipation for the last couple of years until just lately. I tried a great many remedies without any success, but at last I heard of MILBURN'S LAXA-LIVER PILLS, so I gave them a trial, and began getting better right away, and now I really believe I am cured, and can heartily recommend them to any one."

MILBURN'S LAXA-LIVER PILLS are 25 cents per vial, or 5 vials for a dollar, at all dealers, or mailed direct on receipt of price by the proprietors, The T. Milburn Co., Limited, Toronto, Ont.

we are to become a mighty people, this railway must be built. And this country will prosper, this land will advance, and we will become a mighty people. And this railway will be built.

"And more than that, I know that I will see this railway built. If I don't see it when I am in office, I will see it when I'm out of office. If I don't see it when I'm living, I'll look down and see it running through."

"Tut! tut!" spoke up the Hon. Alexander Mackenzie; "maybe the honorable gentleman will be looking up!"

The present Conservative Premier is not the centre of as many anecdotes as his great predecessor, Sir John A. Macdonald, but one of his ministers, Col. the Hon. Sam. Hughes, has been the centre for scores of these good little stories.

One of these concerns a picture, a Presbyterian minister, and a witty Irish character.

Previous to the election, Colonel Hughes sent out to each of his constituents in Victoria county a cabinet size autographed picture of his own attractive self. Shortly afterwards, a Lindsay Presbyterian minister entered a barber shop to find therein Mr. A. D. Mallon, one of the witty characters of the town.

Mr. Mallon was a devout Catholic and also a devout follower of Col. Sam. Hughes. Thinking to have some fun with him, the minister amused the crowd in the tensorial parlor by saying:

"Well, Mr. Mallon, I suppose you have received one of those wonderful pictures of Col. Sam. Hughes?"

"Sure an' I have!" was the rejoinder.

"Sure an' I have!" was the rejoinder.

"Sure an' I have!" was the rejoinder.

"Sure an' I have!" was the rejoinder.

ply. "An' laith, I've put it in the best room in the house, as I should. 'An' in the best place, too, I tell ye, for I've got it right between his holiness the Pope an' Dr. Sproule—only a little higher than ayther of them."

When the laugh had subsided, the minister tried again.

"Why don't you get some really fine pictures for your parlor, Mr. Mallon?" he asked. "Now, if you come over to my study I'll let you have some elegant ones."

"Like what, for instance?" asked the witty old Tory.

"Oh, Sir Wilfrid Laurier, Graham, Pugsley, Emmerson, and good men like that," replied the minister.

"Now, an' I'm ashamed of ye," said Mallon. "An' you a minister of the gospel, too. Sure, an' I've made my father's house a house of prayer, but ye would make it a den of—"

But the rest was drowned in the laughter that ensued.

Around Ottawa some months ago they were telling a story about the humor of Hon. T. W. Crothers, Minister of Labor. A St. Thomas man was much annoyed at his neighbor—a doctor—and went to Lawyer Crothers to try and find some way to annoy the doctor without running counter to the law.

"Get a couple of ducks," was the supposed suggestion of the future Minister of Labor, "and keep them on your front lawn near the doctor's side. Then when the doctor is going in and out, you can sit on your front verandah and laugh, while the ducks cry, 'Quack! quack!' at the doctor."

Things Worth Knowing

Only about one person in fifteen has perfect eyesight.

Japan imported more than 810,000,000 pounds of raw cotton last year.

An ash receiver, from the center of which rises a vase to hold flowers, is a novelty.

Ceylon has about 1,000 mines for plumbago, that country's most important mineral product.

Pliers patented by an Illinois inventor neatly split insulation and skin it from wires.

Buenos Ayres is building three subways to relieve the congestion of its principal streets.

Portable electrical machinery has been invented for screening coal and loading it into wagons.

According to a London specialist, if white clothing for babies could be abolished, in a generation there would be a 20 per cent. decrease in the number of persons with defective eyes.

An English sportsman has built a yacht into which his automobile is lowered to provide power.

A novel orange peeler is made of a curved piece of bone with a nick at one end to cut the skin.

More celluloid combs are said to be made at Oyonnax, France, than at any other place in the world.

A spring reel that takes up the slack wire of desk telephones is a new convenience for the business man.

In Germany a powerful machine has been built for compressing scrap metal into more easily handled bales.

Ingenious sliding racks for silphware, instead of the usual shelves, feature the bottom of a new sideboard.

Canada's water power is estimated at 16,600,000 horse power, of which only about 1,016,000 horse power has been developed.

The Government of Uruguay has organized an institute of geology, with an American director and assistants.

A sixteenth of an inch of scale on the interior of a boiler will cause a loss of 13 per cent. fuel efficiency.

The South African Government will erect a large mill to encourage the cultivation of sugar cane in Zululand.

A new drinking fountain for poultry utilizes an ordinary fruit jar, easily replaced if broken, for the reservoir.

The German Navy has converted an old torpedo boat into a combined tug-boat and icebreaker for use around Berlin.

A stack to increase the draft and a flue to carry burning gases where they will be most effective feature a stump burner patented by a Washington inventor.

Consider the innocent babe in its crib; it tolls not, neither does it spin, yet it growth like the interest on a promissory note.

WILSON'S FLY PAD. POISON

Use them outside, in or near the garbage barrel, as well as in the house or store.

All Druggists, Grocers and General Storekeepers sell Wilson's Fly Pads.

WEATHER FOR BALANCE OF SEPTEMBER

(Rev. Irl Hicks.)

It will be remembered by those who have studied our forecasts closely, that September the 11th, and a few days before and after that date, as a rule brings a phenomenal crisis in the magnetic and electrical elements. Northern lights, electrical storms, earth currents, volcanic unrest and all related phenomena are most probable about this time. If the barometer fluctuates rapidly, finally falling to very low readings, any time in or about this period, such may be regarded as evidence of violent winds, hurricanes and possibly tornadoes. These disturbances will probably culminate on the 9th, 10th, 11th and 12th. Cool nights with frost in the northwest will follow this period, spreading eastwardly over the country from about the 10th to the 13th.

A reactionary storm period will bring storms and other disturbances on and touching the 14th, 15th and 16th. The full moon is at an eclipse node on the 15th, and on the same date it is in apogee and on the celestial equator. The great planet, Saturn, is in quadrature with earth and sun on the 10th—a fact that almost certainly increases the tendency to sever earthquakes for several days before and after. This period is also near the centre of the earth's autumnal equinox, and at the entrance of the Mercury equinox.

Watch your barometer at this period; it will foretell the approach of any possible danger from atmospheric convulsions. Earthquakes and storms will reach a marked crisis within sixty hours of sunset on the 15th. Another high barometer, and change to very much cooler, with frost northward, will follow on the western flanks of these storms. Watchfulness may save many perishable plants and fruit from damage—especially in the northwestern to central sections.

A regular storm period involves the 17th to the 22nd. This period is at the centre of earth's autumnal equinox. The Vulcan, Mercury, Earth and Jupiter disturbances will all combine their forces on this period. Equinoctial storms of wide sweep and violent force are more than probable at this time. A correct interpretation of barometric readings will foreshadow the

nature of approaching storms before they strike. Boreal storms from the northwest will meet tropical storms from equatorial regions at this time, resulting in tornadoic storms over central to southern states and change to much cooler and frosts will result in many states as a sequel to these equinoctial convulsions.

A reactionary storm period is central on the 25th, 26th and 27th. This period is at the centre of the Mercury period, and at the culminating crisis of the autumnal equinox of the earth. There are strong probabilities of a spell of threatening, stormy weather extending over several days, and perhaps filling the gap between the regular storm periods immediately before and after these dates. We calculate that equatorial, or equinoctial storms and hurricanes will be more numerous and more severe during this autumnal period than common. In their progress from the West Indies, under the influence of the Jupiter and Earth periods, they will overtake and overlap the normal limitations of regular and reactionary storm periods. But they will take an increased energy, and be aided by local and inland storms of intensifying violence, during the central days of the storm periods. There will be danger of frosts at nights in the high barometer areas that follow on the heels of storm areas, and the danger of frosts at these times will be in proportion to the lowness of barometer readings attending the storms. The 29th and 30th belong to a regular storm period central in October. On and about the 29th there are good reasons to expect violent perturbations of earth, atmosphere and seas. On that date moon is in perigee, or the equator and new at an eclipse node. One of the maximum seismic periods of the year is central on the 29th, extending from about the 25th to October the 5th. Sea coasts are not elevated well above sea level, in all parts of the globe especially exposed to equinoctial storms and tidal waves, will be subject to such dangers at this time. In such localities, the barometer should be closely watched, and storm warnings heeded.

TWO WOMEN SAVED FROM OPERATIONS

By Lydia E. Pinkham's Vegetable Compound—Their Own Stories Here Told.

Beatrice, Neb.—"Just after my marriage my left side began to pain me and the pain got so severe at times that I suffered terribly with it. I visited three doctors and each one wanted to operate on me but I would not consent to an operation. I heard of the good Lydia E. Pinkham's Vegetable Compound and was doing for others and I used several bottles of it with the result that I haven't been bothered with my side since then. I am in good health and I have two little girls."

—Mrs. R. B. Child, Beatrice, Neb.

The Other Case.

Cary, Maine.—"I feel it a duty I owe to all suffering women to tell what Lydia E. Pinkham's Vegetable Compound did for me. One year ago I found myself a terrible sufferer. I had pains in both sides and such a soreness I could scarcely straighten up at times. My back ached, I had no appetite and was so nervous I could not sleep, then I would be so tired mornings that I could scarcely get around. It seemed almost impossible to move or do a bit of work and I thought I never would be any better until I submitted to an operation, but my husband thought I had better write to you and I did so, stating my symptoms. I commenced taking Lydia E. Pinkham's Vegetable Compound and soon felt like a new woman. I had no pains, slept well, had good appetite and could do almost all my own work for a family of four. I shall always feel that I owe my good health to your Vegetable Compound."

—Mrs. HAYWARD SOWERS, Cary, Maine.

BLAIR'S FAMOUS BLACKS AND BLUES

For years we scoured the market for black and blue Serges that would retain their color while the last thread held together. We have customers who have their suits made from these materials sea-on after season, and the goods do not only retain their color but the fabric gives the highest satisfaction in wearing quality. Not too early to order your Fall Suit.

NOTICE OF BY-LAW

Take notice that a By-law for raising the sum of \$5,000 for drainage, under the provisions of THE TILE DRAINAGE ACT, will be taken into consideration by the Municipal Council of the Township of Ops on the Thirtieth day of October, A.D. 1913, at the hour of 2 o'clock in the afternoon, at which time and place the members of the council are hereby required to attend for the purpose aforesaid.

W. E. AGNEW, Clerk.

MR. W. C. SENIOR, SECRETARY OF THE BAPTIST LAYMEN'S MISSIONARY MOVEMENT.

Twenty-five hundred dollars worth of jewelry was stolen from a Queen-st. shop, Toronto, while the owner was getting shaved.

Walkerville has voted \$16,200 for an incinerator plant.

The Walkerton power dam, 420 feet long, and built of cement, has been completed, and the town was illuminated on Saturday night.

Dr. Morse's Indian Root Pills

are just the right medicine for the children. When they are constipated—when their kidneys are out of order—when over-indulgence in some favorite food gives them indigestion—Dr. Morse's Indian Root Pills will quickly and surely put them right. Purely vegetable, they neither weaken or gripe, like harsh purgatives. Guard your children's health by always keeping a box of Dr. Morse's Indian Root Pills in the house. They keep the Children Well.

William Chisholm, M.P., for Ontario, had his foot crushed under wheels of a train at South and the toes were amputated. A Toronto dredge sank in the Lawrence.

Ontario's mineral output shot great gain in the past year.

SALE REGIST

DR. NEELANDS, SPECIAL artificial teeth. Studied traction of gas with the or Dr. Colton, of New York may. Crown and bridge work. Office, nearly Simpson House, Lindsay.
