News of the Week

—While coming downstairs with a lighted lamp Saturday evening, Mrs. Elizabeth Dixon, an elderly lady residing at London, Ont., tripped and fell, causing the lamp to explode. Her clothing was ablaze in a moment, and before assistance arrived the unfortunate woman was frightfully burned. She was removed to the hospital, where her injuries proved fatal a few hours later. The fire was extinguished before much damage to the house was done.

—Havelock Standard: "Mr. Simel Higley, wiper in the roundhouse here had a miraculous escape from death the other morning. It seems "Sam," while on a locomotive, which was running into the ship, slid down the pilot, thinking there was a step in front, which is the case with the majority of the engines here, but unfortunately there was no step attached and the pilot caught him by the heels and throwing him face downward on the ties, the engine passing over him. The driver in charge ran over to the station and procured help and a stretcher, thinking that the unfortunate fellow would be cut to pieces, but strange to say, his injuries only consisted of severe bruises and cuts and severe crushes on both heels. The young man was very slender and small, and it is owing to that fact that he was not instantly killed.

AFTER EFFECTS OF FEVER.

MRS. ANGLE OF MERREON, SUFFERED SO SEVERELY THAT HER FRIENDS FEARED SHE WAS LIKELY TO BE A PERMANENT INVALID.

In the picturesque village of Merriton resides Mrs. William Angle, who, after months of suffering, has found a cure from the use of Dr. Williams' Pink Pills. Mrs. Angle relates as follows the experience through which she has passed. "Four years ago this spring, while a resident of Buffalo I had an attack of typhoid fever and the disease left me in a worn out and extremely nervous condition, so that the least noise startled me. I could not sleep at times for a week on account of terrible attacks of heart trouble. Then again my head would trouble me and I had bad dreams. I had no appetite and lost twenty-two pounds in weight and had become so very thin that my friends were alarmed. While in this condition I was treated by two physicians but with no avail. I tried everything recommended, but still found no relief. Finally a relative persuaded me to try Dr. Williams' Pink Pills. After I had taken the first box I could see a change for the better, so I continued the use of the pills until I had finished six boxes and the results were most gratifying. I now have normal sleep there is no more twitching in my hands, the palpitations have ceased, and I have gained in weight and strength. My whole system seems to be toned up, and I feel entirely well. I feel grateful to the Dr. Williams' Medicine Co., and hope they will keep up the good work of administering to the afflicted."

Dr. Williams' Pink Pills cure by going to the root of the disease. They renew and build up the blood, and strengthen the nerves, thus driving disease from the system. Avoid imitations by insisting that every box you purchase is inclosed in a wrapper bearing the full trade mark, Dr. Williams' Pink Pills for Pale People.

TO CURE A COLD IN ONE DAY
Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure 25c. E. W. Grov's signature is on each box.

CULTURE OF BUBLS.

Why Flower-Lovers should Plant a Generous Supply in the Fall—Some Directions of Value.

There is no other class of flowering plants that gives as little trouble or can be so successfully managed by the amateur flower-lover as the bulbous class. The culture is extremely easy, as throughout their growing time they require no more care or labor than does a potato to bring it to maturity, and during their time of rest no attention whatever is necessary.

Of all the bulbous plants, the spring-flowering bulbs are most to be desired. These, which are generally called "hardy" or "Holland" bulbs, come into bloom early in the spring, some of them even showing their dainty flowers while the streamlets are still frozen in the woodlands and the snow-drifts hang along the mountain's brow. After months of intense cold, cloudy days and seeming endless nights, there is nothing more pleasant to the eye or that gives more genuine pleasure to the heart than to see the dainty spring-blooming bulbs forcing their heads through the recently frozen earth, and defying the ice king to again venture on his death-dealing mission. They come in a time when it is impossible to have any other plant out of doors. The house perennials are just beginning to grow, and the seeds of the annuals have just been planted in some pan or box in a sunny window. The fact that plants giving bloom at this very desirable time are of such easy culture, and that the different kinds of bulbs can be secured at such a moderate price, should induce everyone to plant extensively.

To have a succession of bloom from the time when snow is still to be seen until the last of June, one should plant scillas, snowdrops, crocus, hyacinths, narcissus, crown imperials, paeonies, daffodils, tulips, etc.

Bulbs will thrive in any kind of soil and in any situation, so no one should be without them. While this is a fact, better results are obtained when more care is exercised in the selection of soil and location. A good deep, sandy soil gives best satisfaction, located where the bed may receive at least a part of the forenoon sun. In preparing the bed, it should be spaded up deep and made fine. The bulbs should be planted from two inches to six inches deep, and from three inches to six inches apart. The bed should be slightly raised above the surrounding soil, so that water will not settle around the roots and bulbs.

Although most of the Holland bulbs are perfectly hardy, they do much better if they have some protection through the winter. A covering of stable manure over the bed after it is planted in the fall, to the depth of from four to six inches, is the proper thing. This will keep the bulbs from being repeatedly thawed out and frozen up, should the winter be an open one. Besides this, the strength is washed out of the manure down into the soil by the autumn rains, and annually enriches the soil. By this annual covering the flowers are made much larger and of a more brilliant color. Of course, it must be removed as soon as the frost is out of the ground in the spring.

All those hardy bulbs should be planted in the fall, and the earlier they are put in the better. While they may be planted on into November, if the ground is not frozen, far more satisfactory results are obtained from earlier plantings. The bulbs have to make the most of their roots in the fall, before the ground becomes frozen, for as soon as the frost is gone in the spring the bloom makes its appearance, and there is no time for the bulbs to make roots, as, instead of that, the roots must be feeding the flower and producing a new bulb. The sooner they are in the better, as more time is given for root growth, and the stronger the root the larger the flower the following spring. The first of September is the time when bulbs should be planted to give most satisfactory results.

In planting bulbs, do not mix the different kinds in the same bed. Keep the hyacinths by themselves, and the same with the other varieties of bulbs. Nothing gives more displeasure than to see a bed of all kinds and sizes mixed. Hyacinths of dwarf growth and tulips with long stems do not look well together. Keep each kind by itself.

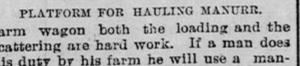

Many people take their bulbs up annually, after they have ripened up in the summer, and replant them again in the autumn. This is useless. They should be left in the ground three or four years, and then the clumps should be taken up and divided and replanted. By leaving in the ground year after year finer flowers are produced, and the labor of replanting is done away with. They also multiply more rapidly when left undisturbed for some time.

Every lover of flowers should plant freely of these hardy bulbs, the culture of which is so very simple, and whose brilliant bloom is produced at a time when most desired.—Florist, in Farmer's Advocate.

FOR HAULING MANURE.

Platform Which Does This Disagreeable Work of its Worst Features.

Manure hauling is generally a hard and disagreeable job, yet it is one that all successful farmers must perform. By the usual method of hauling it in the

PLATFORM FOR HAULING MANURE.
farm wagon both the loading and the scattering are hard work. If a man does his duty by his farm he will use a manure platform often enough to pay for having one. The accompanying sketch will show one of our low-wheeled running gears, and without the sideboards, which are easily put on when required. It is merely a platform nailed to two by fours, which are bolted securely to a frame made of two by six plank which fits inside the standards that hold the wagon box in place. There are holes cut through the platform to let the tops of these standards through. The platform sits just high enough to be free of the wheels. It can be made seven feet wide if that width is desired.—J. L. Irwin, in Agricultural Epitomist.

Salt Lick for Horses.

Place a box of salt near the watering trough so the horses can lick it whenever they go to drink. This is preferable to the usual method of salting the farm horses once a week.—Farm Journal.

FRUITS FOR A SMALL PLACE.

The Veteran, Joseph Meehan, Gives an Excellent List.

Requests from correspondents for lists of fruits suitable for a small place are not infrequent, and the following list has been prepared for them and others who may wish to set out a few trees for family use:

Twelve Apples—Red Astrachan, Yellow Transparent, Cornell's Fancy, Oldenburg, Early Harvest, Sweet Bough, Roman Stem, York Imperial, Maiden's Blush, Baldwin, Fall Pippin and Golden Russet. Six Cherries—Richmond, Governor Wood, Windsor, Late Duke, Rockport, Schmidt's Bijarreau. Figs—Osborn Prolific and Celestial. Grapes—Moore's Early, Concord, Niagara, Brighton, Barty and Woodruff. Peaches—Elberta, Yellow St. John, Crawford, Chair's Choice, Troth's Early and Mr. Ross.

Pears—Bartlett, Seckel, Clapp's, Howell, Sheldon and Lawrence. Plums—Abundance, Burbank and Reine Claude. Small Fruits—Blackberries: Wilson and Lawton. Currants—Versailles, Fay's Prolific. Gooseberries—Downing and Smith's Improved. Quince—Orange.

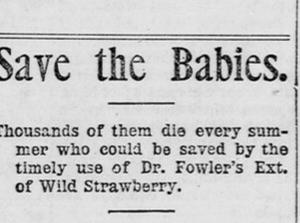

Raspberries—Cuthbert and Gregg. Strawberries—Charless, McKinley, Gandy, Bubach, Marshall, William Belt. It is not possible that this list would exactly suit all localities. Soil and situation have to be considered before deciding. It is such a list as no one in the State of Pennsylvania and others of similar climate and soil would regret planting. A field which has been under cultivation for some time makes a good site for an orchard. Do not set the trees too close, as it makes no end of trouble in the long run. No one likes to chop out a bearing tree, yet it would often be better than to permit overcrowding. Apples should be 35 feet apart; pears, 30 to 25 feet; cherries, 25 feet; peaches and plums, 15 feet. My experience leads me to much prefer early fall for planting fruit trees to any other time of the year.

Medium-sized Males Best.

A male of medium size should be preferred to one that is heavy and clumsy. Most persons pay too much attention to the size. They overlook the fact that the larger the bird the longer the period required for reaching maturity. Provided the male selected is pure bred, it is an advantage if he is small rather than large, where the object is to hatch out pullets that are desired to mature early. In selecting the male let it be done with some object in view and which is to be accomplished. It is of no advantage to accept one as a gift if he is not suitable for the purpose. Bear in mind also that the male, so far as his influence is concerned, is one-half of the flock.—Maine Farmer.

Save the Babies.

Thousands of them die every summer who could be saved by the timely use of Dr. Fowler's Ext. of Wild Strawberry.

There is no mother who loves her infant but should keep on hand during the hot weather a bottle of Dr. Fowler's Extract of Wild Strawberry. There is no remedy so safe and so effective for the diarrhoea of infants, and none has the endorsement of so many Canadian mothers who have proved its merits, and therefore speak with confidence. One of these is Mrs. Peter Jones, Warkworth, Ont., who says: "I can give Dr. Fowler's Extract of Wild Strawberry great praise, for it saved my baby's life. She was cutting her teeth and was taken with diarrhoea very bad. My sister advised me to get Dr. Fowler's Extract of Wild Strawberry. I got a bottle and it cured the baby almost at once."

Many people take their babies up annually, after they have ripened up in the summer, and replant them again in the autumn. This is useless. They should be left in the ground three or four years, and then the clumps should be taken up and divided and replanted. By leaving in the ground year after year finer flowers are produced, and the labor of replanting is done away with. They also multiply more rapidly when left undisturbed for some time.

A Quarter of a Century in Business.

We are in it yet. We have been in the Tailoring Business in Lindsay for more than that long. We are in it yet. In that time we have learned to suit the people. We carry the largest stock, keep the most hands with the largest experience of any tailors in the county. Some of our hands have been with us nearly twenty years. Our goods are all carefully bought and are worth all we ask for them. Nobody can beat us in quality of goods, prices or stylish suits. Come in and look at our stock.

COATS and MANTLES

I have added a Coat and Mantle Making Department to my Millinery establishment. My stock of stylish cloth and trimmings is complete. A competent staff is kept busy, and ladies can get correct garments at from 25 to 50 per cent. less than the usual prices.

MISS MITCHELL, Over Campbell's Groceries Store

OLD ENGLISH CONDITION POWDER

Before Taking After Taking

Rain or shine, won't hurt any animal. Has been tested and tried for years and always gives satisfaction. It never changes except in price, and it is cheaper this year than ever. 20c, six for one dollar.

A. HICINBOTHAM

Cheap Fuel...

Having bought two train-loads of the finest Lehigh Coal before the rise in price, I am able to give my customers the advantage of 50c a ton, and am selling it at \$6.25.

R. BRYANS & CO.

Lumber, Shingles, Tile and Lime

All Goods in Our Line

are going up in price, Silverware in particular has risen from 10 to 20 per cent. We have such a large stock on hand that it will not affect us for some time. We advise you to buy early if you want our goods at old prices. We have just received the best value we have ever shown in

—Wedding Rings, Gem and Keeper Rings
—New Blouse Sets, Gold and Silver Cuff Buttons
—Belts and Belt Buckles

Our special bargains are

—Wedding Rings, Mantle Clock
—And Ladies' Silver Belts

The last mentioned goods are the best values in town.

Come and get one of our Books "Klondike Tales."
