OUR INVISIBLE ENEMIES

To stay in existence is one of man's chief concerns. His anxiety and effort to remain in it, often help to put him out of it Without these, he goes out quicker than ever. So the whole problem is reduced to a dilemma with horns quite as d.scomforting as this distraction usually wears. The difficulties of the situation have been greatly augumented by the discovery of the microbe. Formerly we were urged to sober reflection and a dose of medicine, by the announcement that

> "Dangers stand thick through all the ground To oush us to the tomb, And fierce diseases wait around To hurry mortals home."

Against anything so tangible as dangers that can push us, and diseases which discharge duties that belong chiefly to the policeman, a man may make some sort of provision; ably for good, honest, wholesome government by being, but since the discovery of the microbe, such an effort has first of all, themselves good, honest and wholesome." become largely futile. Of what use are speed, skill or strategy against an enemy, so many as to be innumerable, so small as to be invisible, and every one effective? These tion, we cannot but regret that by her going, this town has are the microbes. Lurking in the air we breathe, the food lost a lady of exceptional culture and amiability. we eat, the water we-wash in, and nestling amid our whiskers, these newly-discovered and industrious enemies greatly complicate the problem of existence. Cascara and Hughes has returned from the war, having made a fine ally distributed it in the centres of catnip tea no more insure our residence in this world. It record as a soldier of the Queen. By his friends he will the States. The traffic had been inis by no means certain, after all our efforts, whether they or be received as the victor should be. Another battle awaits creased. This year it was proposed us are destined to prior extinction. The failure of the him, and we rather think he will be victorious in that doctors to discover these fors till they had been here so also." long and become so numerous, their superior constitutions -for some sorts of them are not put out of business by boiling or freezing—and their immunity from contagious this county. It is the Fenelon Falls Star at the cataract diseases, all give them an advantage that makes it doubtful if burg. It has been commonly reported that diphtheria and big measure of success. fever have been epidemic in Lindsay during the summer. So much crudence did this report receive in the county, that some people shunned the town for fear of contagion. must have been highly gratifying to him, was satisfactory Now this is but the annual falsehood. There has rarely to his friends, and could scarcely have been offensive to been a healthier season than the past. During the sum- his enemies. The crowd was large but manifested a hearty,

conditions preva ling here that make it a marvel that the challenged the animosity of his most sensitive and sinis:er wildest reports are not true. Unless the teachings of foe. His address was simple, moderate and conciliatory in scientists are all astray, the sanitation of the town has some tone. It surely set at rest several of the stories about his

Disease is bottled up in the wells. There are a great and enjoyment by his opponents. many of these, and the water from them is largely used for drinking purposes. It is repeated y said by the doctors that very few of them contain water that is fit to drink. voted to construct the Pontypool, Lindsay and Bobcaygeon The simple t tests reveal the correctness of that opinion. railway will be torfeit, in absence of any operation on the This is not because the supply is bad in itself, nor because road. Less than three months remain; and yet the pros pure water cann t be got from a we l. It is chiefly because pect is good that the terms will be fulfilled. We have these wells are not cleaned out often enough. The wash kept informed on the provisional company's progress, in so from the surface, dead frogs, toads and often larger far as the officials were willing to make it known, but animals, soak in the stagnant water. With these in and since they would say nothing for publication, our informapure air excluded, it is no wonder that disease is bottled up tion has not been printed. At last the silence has been in the wels. Before the health of the people is properly broken by the arrival in town of Engineers Jennings and

effects, but affecting such a large locality as to demand survey is complete. Sufficient capital is available to make attention. It is the creek that runs across the town from a substantial beginning and there is no little doubt that the southwest and enters the river at the Weilington-st. the terms of the bonuses will be met and that before bridge. This has its orgin in an half-doz n flowing wells in another year much of the road will be built.

the vicinity of the car-shops and until it reaches Russell-st. had got an estimate of the cost of is pure and clean. At that corner the drain from Major a railway switch from the company. Martin's laundry enters and pours in soapy, filth laden It would be \$350. He would pay water that hopelessly pollutes the stream Just below that. Peel-st., two water-closet drains enter, and comp'ete the contamination. Along the rest of its course until it reaches the underground channel at Wellington-st., it gives out noxious vapers that are like the shadow of death to those unfortunate people who live adjacent to its banks. Its uary, sometimes till March. purification or removal if a present problem whose neglect fastens an hourly crime upon the council.

Then there is the disposal of sewage. Our system of have have some property near the sewers has been endorsed by the Provincial Board of Parkin mill, on the railway. Health, but that does not save it from being a wholsesale menace to human life. The sewers discharge into the river. During most of the year the almost stagnant river is simply a polluted pond whose odors are hideous heralds of fell disease. Decency, the rights of citizens, the sacredness of human life, and all other considerations by which modern civilization enforces its precepts for the physical property mentioned, with the privilwell being of mankind, all demand that prompt and radical ege of buying it at the expiration of measures be taken to remove these strongholds of our the lease. minute friends the enemy, of microbedom.
