If the Oven Cooks 1/3 Faster, the Fuel Burned is 1/3 Less

The little scuttle shows how little coal is needed by the Happy Thought compared with others.

Here's a chance to see the "reason why" a Happy Thought is the best cooking range before you buy it. The more heating surface, the less time required to do the cooking—and the less time the less fuel. The corrugated oven-lining is as quickly heated through as an ordinary flat lining and gives one-third more surface for radiating heat.

In burning wood, the little pile equals the big pile, if you use a Happy Thought

The deceased lady was within a few months of completing her 88th year. In her early married life she was a society leader and entertained somewhat lavishly in Port Hope and afterwards in Lindsay.
