New Larrigan Factory

We are turning out the best Larrigans made in Canada. We employ first-class workmen, and use the best stock procurable. As a consequence our business is increasing rapidly, and we have been compelled to enlarge our premises. Orders, large or small, will receive prompt attention. A share of patronage solicited.

JOHN B. MARION, Lindsay FACTORY: East End Wellington Street Bridge

-A Fortune in Coal

The first issue of stock of the British Columbia Amalgamated Coal Company has been entirely bought up, but the second, in limited quantity, has been put on the market at 50 cents a share. Its par value is \$1.00, and it is fully paid, non-assess-

The Property

The richest coal regions in British Columbia are owned by the company. They comprise 17,500 acres of coal lands in the Nicola Valley. B.C., and, according to coal experts' reports, this immense area contains an inexhaustible supply of high-grade bituminous coal. The Canadian Pacific and Great Northern Railways are extending their lines into the Nicola Valley and will be able to handle the output of the mines expeditiously. The latter expect to have their road into the Nicola Valley by the end of the year.

It offers a brighter investment out-

look than did the Crow's Nest Coal

Company when organized in 11896.

The Prospect

The Crow's Nest, Pass Coal Company was organized in British Columbia in the year 1896. It was the only coal stock that had ever been offered to the public at large in the Dominion of Canada up to that time. The stock was put on the market in the spring of 1896, and offered to the people at ten cents a share. The first allotment was sold to school teachers, clerks, merchants, doctors, servant girls, carpenters, and men and women in all walks of life. This brought about the most cheering and gratifying results, and poor men awoke to find themselves independently rich from a small investment. For \$100 one thousand shares were secured, and to-day this amount of stock has a cash valuation of \$285,000, and last year 1,000 shares brought a dividend of \$10,600 (\$10.60 per share). Coal experts and engineers who have seen our properties and those of the Crow's Nest are fully agreed that ours are as good, if not better, for the reason that we are 500 miles nearer tidewater (Pacific Coast), and our coal is superior for steam, domestic and smelting purposes, and fully equal for foundry and smelters, coke. Our company's coal land is estimated by coal experts to contain one billion, four hundred millions tons of coal, such a vast quantity that ithe supply would last 400 years at an output of 10,000 tons a day. One engineer has estimated that our land on Coldwater River has a net valuation of one billion. five hundred million dollars, with the the coal in the ground as a basis of calculation. Our shares will be increasing in value from year to year, the same as has been the case with the Crow's Nest Coal Company's stock. In the year of 1900 those shares were worth \$36, from the dividend it then paid, In 1903 ,t had reached the \$100 mark, and in the fall of the same year it sold for \$125, and to-day its market price is \$285.

In order to realize similar profits you tmust get in now. Act on your own judgment. Two years from now the stock should begin to pay handsome dividends, and in another year or two may have a cash valuation on the market from the dividends it will then pay of at least \$10.00 per share. This calculation is based on sound and conservative business judgment, and on well-tried laws of natural growth. It is quite safe to say that when the Amalgamated Coal Company shall have fully equipped its four properties on Coldwater River, in Nicola Valley, B.C., and has built up a market for its product, and can produce coal and coke on a large scale, which may require six to seven years to accomplish (taking the Crow's Nest as an example), this stock should then be worth, on its own merit, from the dividend it

then will pay, \$100.00 per share. Fathers, mothers and guardians, who have the welfare of your children at heart, and want to provide for their future needs, write us for information; and investigate our proposition carefully. You will thank us later for the advice given. Ask or write for printed prospectus and reports, etc. We will show you samples of the coal and of the coke, and the assays of the coal from Government officials and other authori-

The Security

Coal Company mining for coal and oil in that country must file with the Minister of Finance, a certified copy of their articles of incorporation, if a foreign company, and also of the by-laws; in other words, the company has to register under the laws of British Columbia, before they can transact business within the borders of the Province and produce coal, and their books are subject to inspection every three months by the Government agent, to whom a sworn statement must be made, and a tax of five cents per ton paid to the Government for every ton of coal mined. This protects the small

Under British Columbia laws, every

small investor than in any other country. There is no field of investment more absolutely safe and profitable than coal mining. This is an investment which will not only yield you Big Dividends, but in all probability will increase in value 100 fold in the Next Five Years.

DON'T PASS IT BY. Call or write for prospectus, reports, maps, etc., that will give

stockholders, as everyone interested has the right to know at all times

just what the company is doing, and there is no possible way of the

Company adopting, with any success, a "freeze-out" game. The Govern-

ment being an interested party, much greater protection is afforded the
