A FISHING FICTION.

THE "MAGIC EYE" OF THE SAULT STE. MARIE INDIANS.

An Old Guide's Explanation of the Indian Whitefish Hunter's Method of Getting His Glistening Catch From Under the Rapids.

"The first time I fished in the Sault Ste. Marie rapids," said a well known Lake Keuka sportsman, "I landed in an hour twenty-one brook trout that weighed forty-five pounds; so I was ready and willing to believe anything I heard or read about the possibilities of those waters or the astounding things that men who fished in them

were able to do. told me about the marvelous feats the at the disposal of each individual, this Indian fishermen of the Sault Ste. terrestrial sphere scarce puts bounds Marie could perform in the way of to his field of influence. netting whitefish. Few who have toured the great lakes have not heard of those same feats, witnessed them and, of course, could do nothing but go away believing that they were all they

seemed to be. "Particularly will they marvel, as I did, at the Indian whitefish fisherman's magic eye with which he seems to look down through ten feet or more of foaming, rushing water and see whitegeons, Edinburgh. Licentiate of fish that to the white man's eye would Midwifery, Edinburgh. Special at be invisible five inches beneath the tention given to Midwifery and dis- surface. It would have been strange eases of women. Telephone No. 98 if I had not marveled at it, having witnessed more than once manifestations of its alleged power. That was

'The astounding feats of the Indian whitefish netters of the Sault Ste. Marie that the guidebooks and the hotel keepers and steamboatmen insist on telling tourists about are performed by two Indians in a canoe. One occupies the stern and manipulates the paddle to keep the canoe's head pointed up stream. The Indian in the bow, standing upright, uses a pole to aid in propelling the canoe or in keeping it

steady. "Lying ready to his hand is a dip net four feet in diameter, fastened to the end of a pole perhaps fifteen feet long. The fishing is done at the foot of the rapids, where the water boils and tumbles furiously. With his pole the In-Loan at Lowest Rates. Office No dian in the bow keeps the boat moving about in the rapids and gazes constantly into the water, which is often ten feet or more deep.

"Suddenly the Indian in the bow will seize the net handie with one hand, never ceasing to manipulate the canoe with his pole in the other nor for an instant removing his staring gaze from the water. The net is not more than in his hand before he has plunged it perhaps ten feet distant from the boat, thrusting it at the same instant to the bottom. Then he gives it a peculiar twist, draws it up and, surrendering the care of the canoe for the moment to the Indian with the paddle, he draws the net up, never without from three to half a dozen glistening whitefish in it, frequently weighing five pounds each. .

"The wondering spectator, seeing nothing but the boiling water, the sudden start of the Indian and his quick and dexterous plunging and drawing up of the net with its invariable load of whitefish, can do nothing but acknowledge to himself the necromancy of the Indian's piscatorial art. I know that I did, and for two seasons gave myself away to the fascination of that mysterious fishing. Then one day I marveled at it greatly to Guide Garron, the shrewd and cunning old Frenchman who knows every rock and eddy and whirlpool of the rapids and all the wiles and tricks that any other guide knows and a whole lot that no other one does know, and Garron's little

black eyes twinkled. editor .- Pittsburg Chronicle-Telegraph. "'Ah!' he chuckled. 'Zat mageeck hye. He von gr-r-rand homboag!" "Then he explained in his voluble and picturesque patois the apparent

mystery of the Indian whitefish fisher-

man's magic eye. Whitefish are natu-

ral denizens of the still, silent waters

of the great lakes. To get from Lake Huron to Lake Superior these fish must fight their way up the fierce and stubborn Sault Ste. Marie rapids. In They can brave the rapids but a short distance at a time, when, almost exhausted, they drop into the shelter of

the friendly rocks that pile the bottom of the rapids. "Huddled sometimes by the score behind these rocks, getting wind, as it were, to overcome another stage of their journey, the whitefish, if the water is not too deep, can be lifted out by the hand of the fisherman, they are so nearly exhausted. The Indians as well as the white fishermen know this and, knowing well the location of these sheltering rocks, have only to thrust their nets down behind them and draw

them up filled with fish. "The cunning of the Indian led him long ago to give visitors the impression that he could penetrate the troubled depths of the rapids with his gaze and discover the whitefish on the bottom. Bank Building, cor. Kent and Wil- The wonder of it spread, and it has been one of the fondest and best paying fictions of 'Susan Mary,' as the natives give you the pronunciation of the Sault Ste. Marie."

An Anecdote of Genius. The following anecdote of Leigh Hunt was once related by "Orion" Horne. Horne on a bitterly cold day in winter went to see Hunt, and found him in a large room with a wide, old fashioned fireplace. He had dragged Organist and Choirmaster of Cambridge-st. his piano on to the hearth, close to a self and his chair, and was playing with the greatest enjoyment.

"My dear fellow," cried Horne, "are you aware that you are ruining your piano forever and ever in that heat?" "I know-I know," murmured Hunt, "but it is delicious."

No Limit to New Ideas. There never has been a time when the individual has stood for so much as he does at present. There has never been a time when individuality and personal initiative brought such amazing rewards. There never has been a time when the individual could or did exert so much influence as at present. There is no individual today so Insignificant that, if he became the medium of a new or potent ideal, he would be prevented by uncontrollable conditions from expressing his idea

and reaping his just reward. In all ages up to this man has been, owing to his limitations of physical force, a plaything of conditions, a slave of his environment. Skill and intelligence were but two of the factors in his progress, bounded and restrained by limitations to their employment. "Consequently I believed what they Now, however, with universal energy

Fruit Acids Kill Germs.

A writer in a scientific periodical states that it is not generally known that fruit acids are germicidal. "The juice," he says, "of limes and lemons is as deadly to cholera germs as corrosive sublimate or sulphur fumes or formaldehyde or any other disinfectant. It is so powerful a germicide that if the juice of one lime or lemon be squeezed into a glass of water that is then left standing for ten or fifteen healthy, fruitful heads. One stout minutes the water will be disinfected. It makes little difference where the when it is planted. water has been obtained or whether it has been boiled or filtered." As boiled to insure spring blooms. It makes a or filtered water is not always obtain- fine appearance if thickly planted upon able this is worth remembering.

What You Put In Your Mouth. It is through the mouth that most malignant germs find their way into the body, and therefore one would think that it was hardly necessary to warn people against the risks they are running in using it as a sort of third hand. One would imagine that hardly any one needed cautioning against holding money with the lips, and yet an immense number of otherwise thoroughly cleanly people indulge in this dirty, dangerous practice.

He Wanted It.

"I think I'll have to put you under bonds to keep the peace," said the justice to the victor of the fight. "Keep the piece!" broke in the van-

quished indignantly. "Why, your honor, it belongs to me. He bit it out of my ear."-Chicago Post. Taking Care of Pa. Along about this time every year ma

"Pa, why do they call this railroad a

"Oh, I suppose some woman traveled over it on her way to a summer resort along about the time they were trying to think up a name for it."-Chicago Record-Herald.

His Next Guess. "The weather man predicts probable showers, but they don't come," remarked the borse editor. "If he'd predict improbable showers, he

might have better luck," added the snake

A Long Meeting. He (bitterly)-Goodby, then! Goodby forever!

She (weakening)-Oh, Jack, don't say

that! Say au revoir forever.-Life.

A BUDDING HUMORIST.

Merry Memories of a First Meeting With Artemus Ward.

On going into the Cleveland Plain Dealer editorial rooms one morning I saw a new man, who was introduced to me as Mr. Browne,

He was young, cheerful in manner, tall and slender, not quite up to date in style of dress, yet by no means shabby. His hair was flaxen and very straight; his nose, the prominent feature of his face, was Romanesquequite violently so-and with a leaning to the left. His eyes were blue gray, with a twinkle in them; his mouth seemed so given to a merry laugh, so much in motion, that it was difficult to describe.

It seemed as though bubbling in him was a lot of happiness which he made no effort to conceal or hold back. When we were introduced, he was sitting at his table writing. He gave his leg a smart slap, arose, shook hands Call and inspect our stock before buying. with me and said he was glad to meet me. I believed him, for he looked glad all the time. You could not look at him but he would laugh. He laughed as he sat at his table writing. When be had written a thing which pleased him, he would slap his leg and laugh.

I noticed that George Hoyt and James Brokenshire at their tables were pleased with his merriment and indulged in broad smiles. As I bade him and the others good morning he said, "Come again, me liege." I thanked him, said I would and went my way, thinking what a funny fellow he was.

Within a month thereafter appeared in the columns of The Plain Dealer a funny letter signed "Artemus Ward." The writer said he was in the show business, had a trained kangaroo, "a most amoosin' little cuss," some "snalx" and a collection of wax figures, which he called a "great moral show." As he was coming to Cleveland to exhibit, he made a proposition to the proprietor that they "scratch each other's backs"-the publisher to write up the show vigorously and the showman to have the handbills printed at his office and give him free tickets for all his family. So I found my young friend of the gurgle and hay colored hair to be an embryo humorist just bursting into bloom. Artemus, as from that time he was best known, soon had a city full of friends, myself and family among them .- James F. Ryder in Century Magazine.

FLOWER AND TREE.

Never buy a plant in bloom. Never water plants in flower from

In planting out an orchard do not plant more than can be manured and

cared for well. A yard or lawn always looks barren without some choice ornamental trees and shrubs. On this account every lawn should contain a few choice speci-

mens of these ornamental trees. Scale insects on plants, such as the oleanders, the fragrant olive, roses, etc., are among the most difficult pests to overcome. A mixture of white hellebore powder with dissolved soap rub-

bed in is a good remedy. Keeping all young trees carefully staked leads to the formation of clean, straight stems. These in their turn ate conducive to the growth of large, stake should be placed by each tree

Crocus must be planted in October a lawn. Make a cut with a spade three or four inches deep in the sod, tuck in a couple of bulbs and press the sod back into place with the foot.

Habits of Seals.

The habits of seals are very interesting. The very young seal is helpless in the water until he is taught by his mother to swim. She takes him into the water daily on her fin and dumps him in, and when he gets tired of floundering about places him on her fin again and returns to her camp. When the young seals are well grown, they suddenly disappear with their mothers and the bull seals. No one knows where they go, and their return is equally as sudden as their departure. The bulls are the first to put in an appearance at the camping ground. When they arrive, they commence ar once to prepare a camp for their mates, which they stake off, and for which they fight until they die. In the meantime the female seals remain quite a distance from land, floating lazily on the water and seemingly having a good

The Nimrod's Mistakes. Some queer mistakes The hunter makes

When in the woods he's gunning And oft his aim At fancied game Creates effect that's stunning.

Sometimes he sees Among the trees An object that is dodging; 'Tis quail that's large, He thinks, and charge Of shot in cow he's lodging.

Like turkey's back, And he's intent on gobbling; He bangs away; Then he hears a neigh, And off a horse goes hobbling. What seems to him

A pheasant trim Appears, and he is shooting. A squeal is heard; 'Twas not a bird, But pig that there was rooting. Mid wooded clumps A squirrel jumps,

He thinks, and shot are flying; Then comes a yell, For, sad to tell, A chum for help is crying. Such queer mistakes The hunter makes

When he for game is gunning; The people wise Now realize The woods they must be shunning. -Pittsburg Chronicle-Telegrap
