chown (open to Province) at 2 p.m. sharp.

shown (open to Province) 5.00 Babies will be shown in Academy of Music at 2 p.m. sharp. babies must be under the age of one year. It is earnestly requested that all entries in all classes shall reach Mr. D. A. MacKenzie not later than Saturday, December 18th. All en-

tries must be the bona fide property of the exhibitor. Decisions of Judges must be taken as final in all cases.

The committee has gone to a great deal of trouble and expense to procure in all classes dis-interested Judges of highest standing and qualifications. All prizes will be paid on day of Fair upon completion of judging, at the office of D. A. MacKenzie, opposite market building.

Buyers will be present to purchase any quantity of Poultry, Butter and Meats that may be offered for sale. No exhibits shall be sold, however, until the judging has been completed and the public admitted. COMMITTEE OF MANAGEMENT.-F. W. Sutcliffe, W. B. Sparling. John Carew, D. Cinnamon, J. A. Williamson, B. L. McLean, Wm. Galden, J. P. Ryley, E. H. Hopkins, Jos. Hickson, Mt. Horeb, Wm. Chan-

Non, Oakwood. H. B. CLEMES, JOHNSON ELLIS,

President.

D. A. MACKENZIE, Secretary . Treasurer.

HOUSE CLEANING instead of being a monotonous drudgery becomes a pleasure when Sunlight helps you. Remember - Sunlight does all the work, at half the cost and in half the time of other Soaps. Follow directions

LETTERS TO THE EDITOR

necessary that the views of the writ tario to be what she now is. ers coincide with the opinions of The Warder, but they must be free from offensive personalities. As a guarantee . I good faith, the writer's name and add ess must be signed, but will not be printed if so desir, d

and space in order to put this mesgreat service.

Alberta has now been a Province she stand forward to her name, for body was recovered an hour on the west she is bounded by the on the west she is bounded by the in 24 feet of water. great Canadian Rockies, which are unsurpassed for beauty of scenery. To lovers of the beauty spots of na- thirty two hours. But if they had to ture, I say then by all means visit Alberta and the Canadian Rockies.

You are never at a loss to know where to spend a pleasure day, for all over the Province are dotted little lakes and rivers, with abundance of f.sh, and any one who has ever driven over the country to any extent, will see some nice spots to which they would like to turn to again at some future date.

Some people, who have not as yet visited our Province think that it is inhabited by half-civilized people and that all kinds of wild animals roam about. Well, to be frank, there are quite a number of different nationalities represented here, the bulk of the people being Canadians and Yankees. The foreigners prove to be good citizens and readily submit to the Brit-

THE ANIMALS.

As regards the animals there are coyottes, hadgers, (which belong to the woodchuck family), and gophers, (which come of the same tribe as the squirrel) all of which are quite harmless. But by the large rivers, and in the bush all kinds of big game is to be found such as moose, eik, deer, antelope, etc.

THE GREATEST INDUSTRY.

Farming is fast becoming the great. est industry on the prairie, and each day that the sun sets brings ranching on a small scale to an end. As people are fencing up their farms that for the past have been lying open for the benefit of the ranchers' stock, but still there are a number that will still hold sway. For instance, take the Reid ranch (which is situated nearly fifty miles north of Calgary) who own some seven thousand acres of land, on this they both farm and ranch, and here is where you will find some of the best stock that is to be found anywhere. A large number of the animals are shipped to all parts of the Dominion.

HOMESTEADING.

To the young men who are working and saving, trying to buy a farm and home in the East, I would advise you, while you still have all the possibilities of life before you, to take what money you have and come out to the West and take up a homestead and in less time than you think, you will have a cozy home fixed up for the one you left down East. Then send for her and your happiness will be complete. This has been done quite often before.

THE CLIMATE.

The climate here is something beyond the common. At Banff, which is situated in the mountains, we have a sanatarium, and sulphur springs, which are known to be very beneficial to those in ill-health.

Although the thermometer does register pretty low in the winter, we do not feel it as cold as we would it is always calm. May-time in the west is different. It is a season that

hable anywhere else in the orlo. There are times in particular hen the excellence of our wide west. s emphasized and magnified, and May-time is one of them. It is good to be alive in the Western May, and feel the spirit of life that fills and thrills it for it has a quality all its own. Those who never saw the colors of spring-time on the prairie, nor experienced the joy and rarety of the May air, have no right to pass judgment, nor to call the prairie monotonous. No where in all the world does the spring-time come with any greater power and wonder. The

tural, and its tonic effects are more than physical. They make the west a land that is good to live in. I again say, any one who has never seen Alberta has no right to contiemn it. Those who have not touched the glorious beauties of this Province do not know the west and its

spring has more lessons than one for

us, its benefits are more than agricul-

Everything that is in reach of the power of man is being done to make this a great and noble country, and I think to sum it all up Alberta is

fast improving and in the course of a few years it will be a greater Province than Ontario is or ever will The Warder invites letters: It isnot be, and in less time than it took On-One Who Knows,

The "Hecla" Furnace And The Wonderful Fused Joints

Do you know what Fused Joints are, and what they mean to every buyer of a Warm Air Furnace?

"Hecla" Fused Joints are made by bringing steel and cast-iron together at white heat. The two metals become practically one. The joints they form are permanently tight.

In 20 years use, "Hecla" Fused Joints have never once worked loose. They form the one

and only furnace joint that won't leak gas or dust. If you want plenty of warm, dry, PURE airat the minimum cost for fuel, and at the same time want your home absolutely free of gas, dust and smoke-put in a "Hecla" Furnace.

There are dozens of other special features about the "Hecla" that every intending furnace buyer should know. Write for illustrated catalogue.
