**ACCIDENTALLY KILLED.**  
July 31, 1890.—On Wednesday of last week Johnnie, third son of Mr. S. Roddy, of Ops, was accidentally killed by the kick of a horse.

**KILLED HIMSELF.**  
A man named Henry James, who had been working on the gravel train and who had shown signs of slight mental derangement, being committed to jail as a lunatic, tried to commit suicide in jail. He had shown great fear of imaginary persons and submitted willingly to be put in prison, but on Friday the jailer was shocked to find his prisoner lying in a pool of blood, having with a piece of glass torn through the skin, wind pipe and gullet. Medical aid was summoned and the wound sewn up, but a fit of coughing tore it open again and after a period of great suffering he passed away on Wednesday morning.

**A COLLISION.**  
At about five o'clock yesterday morning a collision occurred at the head of Victoria-ave., which leads to the Cobocok division of the G.T.R. It appears that while one of the trains was being made up at that point, several cars were left on the switch. Meantime a heavily laden timber train came thundering down the main line from Cobocok, and the result was a somewhat extensive smash up. Some dozen cars were smashed and the engine of the freight train was badly damaged, but fortunately no one was hurt with the exception of one member of the crew, who sprained his ankle in jumping.

**FOUND DEAD.**  
On Friday, the 25th, an unknown man was found dead on the Scotch line near Bobcaygeon. There was nothing found on the body by which he could be identified. He had two suits of clothes on and had two purses, one of which contained \$1.35.

**MOVED FROM PETERBORO.**  
An important change in the Midland Railway system, which has been contemplated for a number of years, has been finally decided upon

**"BACK TO THE FARM"**

**XL—Rural Education—The Agricultural College.**

By C. V. GREGORY.

Copyright, 1910, by American Press Association.

IN 1892 congress passed a law appropriating money for the establishment of colleges of agriculture and mechanics arts. Today there are sixty-seven such institutions in the United States. The establishment of the agricultural colleges opened up an entirely new field of education. The study of science and the application of that science to the problems of everyday life began to take the place of the study of classics. Educating a man merely to have him educated began to go out of style, and the truer education that better fits a man to tackle the problems of life took its place.

The growth of the agricultural colleges was slow at first, and not until within the last fifteen years have they

he can do almost anything he wants to with his community. Farmers have a vast deal of respect for the man who can do things. Their prejudice against college farming is lost in admiration for the results achieved by the college farmer. If he advises organizing a club they are willing to join in and help. If he tells them the school needs reorganizing they are willing to be convinced. They may even consent to bringing two or three schools together and using the money saved to hire better teachers. The inspiration of one man's success and the energy imparted by him is sufficient to start a whole community to thinking. Once you get a man to thinking, there is no need to worry further about him. He will take care of himself.

If an energetic young farmer with an agricultural education could be placed in each township throughout the farming sections the results would be an enlightened agriculture that would be the envy of the whole world. A leading educator recently made the statement that three live agricultural college graduates could in two years increase the value of the land in any agricultural county \$20 per acre. That sounds incredible, but it is literally true. The community would become so progressive that it would be worth \$20 an acre more to live there.

The charge has been made that agricultural college graduates do not go back to the farm. The facts do not bear out this assertion. While the percentage varies, it is safe to say that fully 50 per cent of the graduates go directly to the farm. The others go into some work closely related to farming. In my acquaintance with young men just finishing college I have known of very few who were not anxious to go to farming. A good many of them do not do so because of lack of capital. They have spent all their money in college, and it looks to them like uphill business to start farming without a cent. They are overwhelmed with offers of salaried positions at salaries of from \$1,000 to \$2,000 a year to start with. Experiment stations, agricultural colleges, agricultural papers and manufacturers of agricultural products are all looking for agricultural college graduates.

Many of the men go into some work of this kind until they can save money enough to start farming.

Of the college graduates who do take up farming as a business the greater number rent the home farm or go into partnership with their respective fathers. This is the ideal way for a young man to get a start. Under such favorable circumstances he cannot help but succeed. Often, however, there are enough brothers at home to occupy all the land. The young college farmer must look elsewhere for a job. Every year the agricultural colleges are receiving a larger number of calls for farm managers. Many of these offers are exceedingly liberal. They come for the most part from farmers who wish to retire from active work and at the same time do not wish to sell or rent their farms. They are often willing to take the right sort of a young man in on a partnership basis or give him a pe-

**Nervous Prostration For Three Years**

"Dr. Miles' Restorative Nerve" cured me of a period of nervous prostration of over three years duration, and the Anti-Pain Pills are as necessary to us as the roof of our house. They have been household remedies with us for many years."

WM. J. LOUGHRAN,  
1214 Catherine St., Philadelphia, Penna.

Much sickness is due to nervous troubles. Headache, dizziness, epilepsy and insanity are nervous troubles. Then there is a large class of disorders which arise from a weakness of the nerves of an organ or part, as weak lungs, heart, stomach, kidney, bladder, eyes, etc. Dyspepsia and indigestion are usually the result of nervous disorders.

**Restorative Nerve**  
soothes the irritated nerves, and assists the nerve cells to generate nerve force.

Price \$1.00 at your druggist. He should supply you, if he does not, send price to us, we will forward it prepaid.

**A MOTHER'S SACRIFICE**

**The Lindsay Markets**

MADE IN KINDNESS IS OFTEN AN INJUSTICE TO HERSELF AND TO HER FAMILY.

It is a common thing for mothers to sacrifice comfort, strength, and sometimes life itself for her family. So common, indeed, that little notice is taken of it.

If anyone else is tired or weak or sick, mother waits on them. But there is no time for mother to be sick or to get the much-needed rest. So she neglects her ailments until she gets beyond the reach of human aid.

This is an injustice to herself and to her family. Health must be preserved. It is a mother's duty to herself and to those about her.

Dr. Chase's Nerve Food will restore you. It makes new, rich blood. It creates new nerve force. The feelings of weakness and fatigue cannot long exist when this restorative treatment is used. It sharpens the appetite, improves digestion and removes the cause of headaches.

You cannot get well in a day. Nature's cures are gradual and lasting. Dr. A. W. Chase's Nerve Food works hand in hand with Nature by supplying the elements which go to build up the system.

Mrs. H. A. Loynes, nurse, Phillipsburg, Que., writes:—"I was all run down and could not do my own work. Everything I ate made me sick. In nursing others I had seen the good results of Dr. A. W. Chase's Nerve Food and resolved to try it. As a result of this treatment I have gained ten pounds, do my own work alone, and feel like an entirely different person."

Dr. A. W. Chase's Nerve Food, 50 cents a box, 6 boxes for \$2.50, at all dealers, or Edmondson, Bates & Co., Toronto. Portrait and signature of A. W. Chase, M.D., the famous Receipt Book author, on every box.

**STUDYING FARM MACHINERY AT AN AGRICULTURAL COLLEGE**

really come to fill the place for which they were designed. At first the idea of educating a farmer was laughable to many people who rejoiced in a little learning. Even the farmer himself did not realize the advantage of a college education to a man who must make a living from the soil. It took a good many years to bring people to realize that college education is as valuable for a farmer as for a doctor or a lawyer. The main difference is that the law compels a man to get a college diploma before he starts to practice medicine, while he may start farming with nothing but a team and a plow.

Even at the present time there are many men both on the farm and in the cities who doubt the value of a college education for the farmer. Many a farm boy is squarely confronted with the problem of choosing between four years in college or starting to farm at once. Four years is a long time to a young man. Fifteen hundred to \$2,000 is a large sum of money to him. To spend both for a college education requires a great deal of courage and faith in the future.

The amount of money necessary to pay four years' expenses in college will enable the young man to start farming on a rented farm. The four years will, if he is industrious, enable him to earn enough to make a good sized payment on a farm of his own. If he goes to college he will have nothing at the end of the four years but the experience and knowledge he has gained there. Is it worth it?

I have put this question squarely to dozens of men in their last year at an agricultural college. Without exception they say that it is worth the outlay. Not one regretted the time or the money which he had bartered for his education. Few of them placed it on a money basis alone, but even from that standpoint they considered that the chances were in favor of the college man.

The boy who starts farming for himself without any education will run up against a good many snags which the college man will miss. He will learn by experience many of the things which the college man learns in school. In doing so he will pay much dearer for his knowledge. The old prejudice against "book farming" is fast disappearing. People are coming to realize that book farming is merely the fused experience of successful farmers everywhere, explained and illumined by the light of science. Probably in no one respect is the advantage of the college man more clearly apparent than in the case of soil fertility. Long after the untrained man has begun to notice and wonder at the decline of his crop yields the man who has studied the science of soil fertility will be raising undiminished crops. The art of keeping up the soil fertility cannot be learned from the neighbors, for they have not practiced it. It cannot be learned from father or grandfather, for in their day the fertility of the soil was considered inexhaustible.

The success of the agricultural college graduate cannot be measured in money alone. The agricultural communities just now need leaders much more than they need men who can simply make money on their own farms. It is necessary for the agricultural college graduate to succeed on his own farm, of course. His every move is closely watched by critical neighbors. Even the shadow of a mistake starts a chorus of "I told you so" on his own farm is the best thing a young man who would farm can do.

**Borrowed Gun to Shoot Minister**

to shoot Minister

Trenton, N.J., Nov. 24.—The murder of Rev. Anser L. Armstrong and his wife, Annie Armstrong, at their home at Dutch Neck last night, has resulted in charges being preferred by County Detective James Kirkham against John Sears, who was arraigned before Justice of the Peace Mills to-night, and held with the best known Presbyterian ministers of the county.

The investigation, it was stated, established that the Rev. Mr. Armstrong and his wife were killed by shot from a double-barreled shotgun, which was found to-day standing in a corner in the kitchen of the Armstrong home. This gun was borrowed by Sears two weeks ago from another neighbor for gunning.

Sears is a half-breed and his mother is a negro. Mrs. Sears has been housekeeper in the Armstrong family for more than thirty years.

Rev. Mr. Armstrong was one of the best known Presbyterians in the South. He had been pastor of the church of Dutch Neck for forty-three years, and for nearly as long a time was stated clerk of the presbytery of New Brunswick. He was a graduate of Princeton, and also of Princeton seminary.

**OBITUARY**

**THOS. CUNNINGHAM.**

Death has taken another of the former residents of Manvers township in the person of Mr. Thomas Cunningham, who has resided in the Western States for the past ten or twelve years. The deceased had been visiting his daughter, Mrs. J. H. McGill in Winnipeg, where he died yesterday. The remains will arrive at Janetville station Monday at eleven o'clock. Interment will take place at St. Alban's cemetery. Two sons, Matthew and Thomas, who live in Michigan, survive him. For many years the late Mr. Cunningham resided in Manvers near Janetville and was well known by a host of friends who will be grieved to hear of his death.

**PURIFIED HIS BLOOD**

**Dr. Morse's Indian Root Pills Healed Mr. Wilson's Sores**

When the sewers of the body—bowels, kidneys and skin ducts—get clogged up, the blood quickly becomes impure and frequently runs back out over the body. The way to heal them, as Mr. Richard Wilson, who lives near London, Ont., found, is to purify the blood. He writes:

"For some time I had been in a low, depressed condition. My appetite left me and I soon began to suffer from indigestion. Quite a number of small sores and blotches formed all over my skin. I tried medicine for the blood and used many kinds of ointments, but without satisfactory results. What was wanted was a thorough cleansing of the blood, and I looked about in vain for some medicine that would accomplish this.

At last Dr. Morse's Indian Root Pills were brought to my notice, and they are one of the most wonderful medicines I have ever known. My blood was purified in a very short time, my sores healed up and my skin washed. They always give me a clean, healthy skin and I look like a new man. I have sold by all

**A BAD COLD**

**Developed Into BRONCHITIS.**

Neglected Bronchitis is very often the direct cause of Consumption, and on the first symptom appearing Dr. Wood's Norway Pine Syrup should be used and the Bronchitis cured.

The symptoms are, tightness across the chest, sharp pains and a difficulty in breathing, a secretion of thick phlegm, at first white, and later of a greenish or yellowish color, coming from the bronchial tubes when coughing, especially the first thing in the morning.

Mrs. Dan. J. McCormack, Cleveland, N.S., writes: "My little boy two years old caught a bad cold which developed into Bronchitis. He was so choked up he could hardly breathe. Reading about your wonderful medicine, Dr. Wood's Norway Pine Syrup, I decided to try a bottle and with such good result I got another which completely cured him; without having a doctor. I cannot say too much in its praise; I would not be without it in the house as I consider it a sure cure for Colds and Bronchitis."

The price of "Dr. Wood's" Norway Pine Syrup is 25c. It is put up in a yellow wrapper. Three pine trees is the trade mark. Be sure and accept no substitute for Dr. Wood's.

Manufactured only by The T. Millburn.

percentage of the net profits. A position of this kind is the next best thing to owning a farm.

Although an agricultural college education is of great value, it must not be taken from what I have said that success without such an education is impossible. Many farmer boys are not fitted for an education of this kind either by temperament or ability. Many others are so situated that they cannot be away from home for four years. Still others do not have the money. For these boys an agricultural college education is an impossibility. To teach them something about their business some other form of education is necessary. This is being supplied by the secondary schools. The work of these schools will be described in the next article.
