

CANADIANS AND THEIR INDUSTRIES... AND THEIR BANK

CANADA'S TRADE WITH THE WORLD

In the last calendar year Canada had a foreign trade amounting to \$1,663,093,000, an increase of 19.7%, as compared with an average of 8.1% for 24 leading countries.

Another feature of international trade was the tourist business, incoming and outgoing, totalling \$355,568,000, the balance in Canada's favour being \$155,958,000.

Banking plays a vital part in the upbuilding of the foreign trade of Canada, and foreign trade is the backbone of the native industries which are the foundation of Canada's economic structure.

In providing financial service for this enormous trade a leading part is played by the Bank of Montreal, which, with its 500 branches throughout Canada, its own offices in financial centres abroad, and its own banking correspondents throughout the world, carries through promptly and smoothly the task of financing the movements of an infinite variety of commodities.

The Bank's services include: Loans to importers and exporters; purchases of bills of exchange representing exports; providing commercial credits for purchases abroad; purchase and sale of exchange "futures" for protection against price fluctuation in foreign currencies; special wire facilities with the important exchange markets to speed transactions; reports of character and standing of foreign firms, commercial accounts; foreign currency accounts; safekeeping of securities.

Duke of Windsor's Spouse To Rank As Eighth Lady

EDWARD DROPPED IN ORDER OF GARTER BEHIND YOUNGER BROTHERS

LONDON, Eng., May 14.—The future ranking of Mrs. Wallis Warfield as Duchess of Windsor apparently has been definitely fixed in favour of the younger Duke of Windsor.

That is the order of precedence. Fourth Place It was disclosed that the Duke's banner had been removed in secret from its premier position in St. George's Chapel, Windsor and hung in fourth place.

Announcement Monday Word came today from the Chateau de Candé at Monts, France.

where Mrs. Wallis Warfield and the Duke of Windsor are staying taht an announcement on their wedding plans would be forthcoming Monday or Tuesday.

This created an unofficial impression of the question of whether Mrs. Warfield shall be known as "Her Royal Highness" after the marriage has been solved. The Duke's reported insistence she be granted the royal style was said to have caused difficulty in government circles here.

The Duke conferred for five hours Thursday with his solicitor, A. G. Allen.

YOUTH MUST BE SERVED IN DAN HOWLEY'S OPINION

Off to a great start, the best that any Toronto team has made in recent years, Dan Howley's amazing Maple Leafs the youngest team that ever started an International Baseball League Campaign, have aroused Toronto to a new high in baseball enthusiasm.

The Leafs, hailed as semi-pros by Baltimore newspapermen because of

their youthful appearance when they opened the season in the Maryland city, have an average age of less than 24 years, which is from two to three years under the average of the great majority of teams in organized professional baseball.

The Toronto infielders average less than 22 years. Frank Madura, second baseman who is 23, is the oldest of the four players that compose the inner defence of the Toronto team.

James Walsh, big first baseman, is 22; Don Ross third baseman is 22, and little Joe Gantwein, the shortstop is only 20.

The three outfielders who appear to have landed regular berths with the Leafs are Mayo Smith, 22, Bobby Porter, 24, and Ted Petosky, 26. Tommy Heath, the rotund catcher, who will do most of the Leafs' backstopping this season, is 24 year of age.

Manager Howley is a great believer in youth, and his decision to start the season with this bunch of youngsters was looked upon with much misgiving by other officials of the Toronto Club. However, Howley's judgement was more than confirmed by the way his players went out and won their first seven games. In no time at all they became the talk of the International League, and Toronto fans could hardly believe their eyes as day after day the scoreboards recorded the Leafs' victories. Major League baseball scouts, ever in search of promising young players, began to trail the Toronto team. The Leafs have no working agreement with any major league club and Toronto fans own all but three of the players. It is certain that some fancy offers will be made for some of the Leafs at the end of the present season if they maintain their present clip.

The Leafs present home stand continues until May 25. The series against the Newark Bears winds up on May 20 and the Leafs will have an open date on May 21st. On Saturday May 22nd, the Buffalo Bisons will make their first appearance in Toronto, and on Victoria Day, Monday, May 24th, the Leafs will play morning and afternoon games against the Rochester Red Wings. They also meet the Wings on May 25, the closing of their home stay. The Leafs will return to Toronto on June 3rd for a three-game series against the Montreal Royals. After that, they will swing around the southern end of the circuit and not be home again until June 25th.

FAR MORE SERIOUS THAN 1936 PLAGUE

DESTRUCTIVE TO FORRESTS GARDENS, FARM LANDS WILL BE GREAT: SPRAYING GROWTHS WITH POISON ONLY MEANS CHECKING SWARM. STRIP POPLAR TREES ENTIRELY

North Bay—Millions upon millions of forest tent caterpillars are swarming over the North Bay district doing untold damage to trees shrubbery and gardens, and creating a most unpleasant condition.

The caterpillars are the result of the hordes of moths which invaded this district last fall.

The current scourge is in the commencement stage at the present time, and information stated that at the present time indications are that the invasion will be much greater than last year when the insects proved a nuisance to farmers, garden owners motorists and cottagers.

Caterpillars have already been found in quite large quantities in the centre of North Bay while millions of them are lathering trees, shrubbery and hedges in the unprotected parts of the district.

Great Loss Threatens An authority said that if some effective parasite is not bred soon to counteract these caterpillars the damage caused by these insects in the next few years will be enormous.

It was also estimated that the influx this year will be 60 to 70 times greater than in 1936.

As far as it is known there has been no parasite developed as yet to offset the caterpillar. Persons who have isolated tree on their property might get rid of the insects by spraying the trees with arsenic of lead or some other poisonous solution, but in cases where the trees are in groups it is almost an impossible task to combat them.

Start Salvage Of Lusitania Soon

London—Work on the salvaging of the Lusitania is to begin this month.

This has been disclosed here by Capt. H. B. Russell, master of the salvage ship Orphir, which located the famous wreck lying in 312 feet of water off the Old Head of Kinsale, southern Ireland, in October, 1935.

Captain Russell hopes to clear up the mystery surrounding the cargo the Lusitania was carrying when, in May 1915, a German submarine's torpedo sent the liner to the bottom. It was reported that the Lusitania was carrying a large quantity of bullion at the time, but the report has never been verified owing to the complete secrecy observed concerning war cargoes.

Capt. J. D. Craig, producer of several underwater motion pictures has arranged to film the salvage operations. With the deep bed of the sea as his studio, Capt. Craig will use as his arc light, a 5,000 watt underwater lamp, which has been specially built for him.

A tritonia all-metal diving suit will be used in the salvage operations. This suit bears the whole pressure of the water itself, thus relieving the diver of that handicap. It has been successfully tested in depths of more than 1,000 feet.

It is expected here that the salvage operations will not be finally completed until 1940.

POULTRY BREEDERS MEET

Poultry enthusiasts to the number of about sixty, recently attended a special meeting at the O.A.C., Guelph sponsored by the Ontario Poultry Confederation. There were visitors present from Stratford, Kitchener, Hamilton, Galt and Flora, as well as from Guelph and vicinity. The visitors were welcomed by Matt Doran, president of the conference who presided. The meeting was held in the main building of the poultry department and Professor W. R. Graham, head of the department at the O.A.C. was the principal speaker.

In his address Prof. Graham dealt with poultry breeding of the present day and the difficulty of raising suitable types for the modern market. He said their chief requirements seemed to be a small bird that produced a large egg.

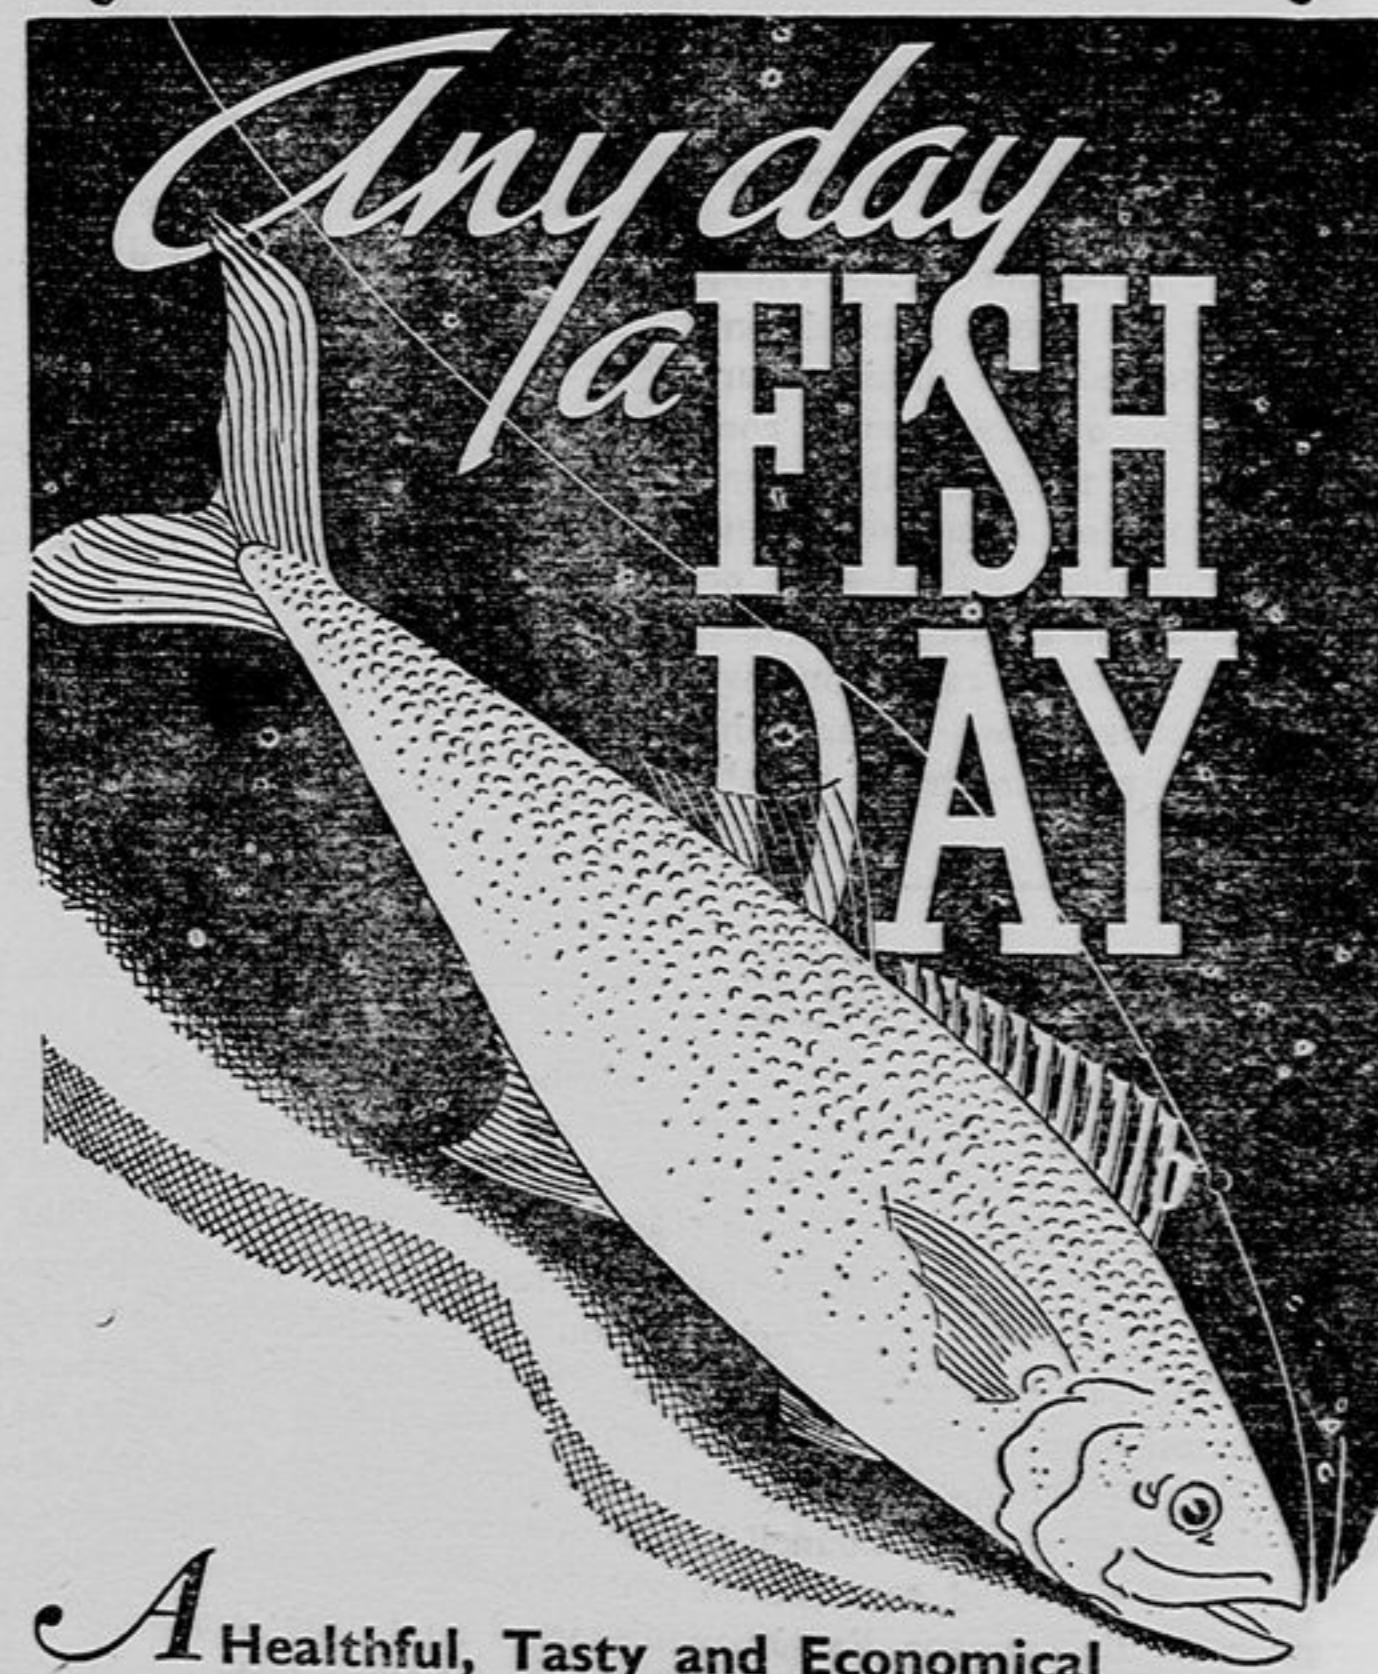

"Canada raises enough fowl for her own market," said Professor Graham, "and the result is that the house wife purchasing fowl for the table can afford to be particular about what she buys. For that reason," said the speaker, "it is advisable that the man or woman raising fowl for the market should endeavor to grow birds that will sell for less than one dollar each."

CORN BORER CONTROL

During the past season, the European corn borer was injuriously abundant in the Ottawa District, and in an effort to prevent a repetition of this outbreak in 1937, every grower raising either sweet or fodder corn should make a determined effort to put the recommended control methods into force.
