THE GENERAL ELECTIONS.

The indications are that the general elections will be brought on within a very few weeks—in all probability about the middle of March.

NORTH VICTORIA REFORM CONVENTION.

It has been found advisable to change the date of the North Victoria reform convention from Feb. 22nd to Friday, Feb. 28th, at the same place announced—Cobocook.

"BONES."

This is what a North Victoria elector said with reference to the long-winded editorial in last week's Warder in which the member for North Victoria recounts the events which have occurred during the last three years, and claims credit for them all.

We have known before an occasional man give to mouthing who had something to say about everything that every one was doing and afterwards had the simplicity to think that his babbling had something to do with the result; of such character is the absurd statement by the member for North Victoria that he is the man who brought the Howry firm to Fenelon Falls.

The bridge at Fenelon Falls was promised before Mr. Hughes was elected, and he ought to have the honesty to give Mr. Barron credit for that.

Now, the reason Haliburton county is not the resort for tourists that it should be is simply because the Grand Trunk railway has discriminated against it in favor of Muskoka.

in the pay of the railroads, are far more anxious for their welfare than that of the people. Now, if you take North Victoria from one end to the other, you will find in every locality and in every valley (with the single exception of Fenelon Falls), not signs of increased prosperity, but the reverse.

These evils will never be remedied by surveys or bridges, nor by the few dollars that may be expended on public works. These are the "bones" that are being thrown to keep the people quiet.

The policy of keeping the mass of the people poor for the benefit of the few, and then trying to appease and bribe the people with "bones" and scraps and crumbs, is giving the electors the treatment due dogs rather than men.

EDITORIAL NOTES.

Writing on Mr. MacLean's criticism of Pope's memoirs of Sir John Macdonald. Prof. Goldwin Smith gives this interesting paragraph: "Sir John Macdonald was in my house a few days before his election of 1878, and was talking of his prospects. He had up to that time, and continued till after the election, to keep protection at arms length, and declared only for readjustment."

LINDSAY BOARD OF HEALTH.

The last meeting for 1894. Pursuant to the call of the chairman, the final meeting of the board of health, as constituted for 1894, was held in the council chamber on Saturday evening of last week.

COMMUNICATIONS.

From Dr. McAlpina, medical health officer, enclosing report of infectious diseases for the month of December. He again called the attention of the board to the necessity for an isolation hospital.

CHAIRMAN'S ANNUAL REPORT.

Mr. WALTERS then read the following report: "To the Mayor and Council of the Town of Lindsay: Gentlemen—On the organization of the local board of health for the current year the following members were appointed."

Mr. WALTERS explained that the delay in bringing in his report was caused by a desire to present a statement of the mortality of the town for the past year, but he found it could not be obtained.

The chairman's report was a moderate one under the circumstances. The council should proceed with the work at once and get the material on the ground before the snow leaves.

SANITARY INSPECTOR'S REPORT.

Mr. R. A. Douglas reported that he had examined a number of milk samples and found all of them up to standard quality.

In accordance with the chairman's report Mr. COOKE moved, seconded by Dr. Burrows, that Messrs. Irwin, Alexander, Walters, Mills and Stewart be a committee to examine the premises.

A LAY COMMITTEE.

Mr. Mills called attention to the appointment of a committee consisting of the members of the board to examine the premises owned by Dr. DeGraaf and Mr. Martin, and also some drains running into the creek near the brewery.

WHY IS THIS TRUSLY?

Chairman WALTERS, after having glanced over an account handed in by the sanitary inspector, said it had been understood at a previous meeting that the order for necessary repairs should be divided among the various town druggists, but apparently the rule had been neglected.

PORT PERRY.

The offering of red clover is small and that is due to the declining in sympathy with the American market.
