CRIME AND PROTECTION.

The Probable Cause of the Increase of

Offences Against the Laws.

The following figures and facts culled

from various authorities seem to point to

one condition over which, in a free coun-

try, the community have control, the

presence or absence of which would seem

to be contemporaneous with the increase

and decrease of crime in all countries.

The increase of crime, so painfully appar-

ent of late years in Canada, the United

States, France, and other countries, and

which is properly attributed to increased

drunkenness, particular forms of educa-

religious beliefe, would seem in addition

to these aggravating or ameliorating con-

ditions to be affected by circumstances

more immediately under our control, and

or which we, as citizens of Canada, are

A comparison of the criminal statistics

FACTOR.

Thousands Bless the Memory of Prof. Edward E. Phelps, M.D., LL.D.

He Gave Humanity Paine's Celery Compound.

Medical Men Say It Is the Only Per fect Cure for Bright's Disease and Diabetes.

Dr. Phelps' wonderful prescription, Palne's Celery Compound, is a boon to suffering humanity. This remarkable medicine has cured and saved more victims of kidney trouble than have all other combined agencies in the world. It has rescued thousands who were thought to be hopelessly lost-made them well after medical men had pronounced them incur England and Japan, where free trade ob- able

The case of Mr. C.F. Kevill, of Dunsford Ont., is one of the strongest proofs ever put on record that Paine's Celery Com pound cures kidney disease and all the terrible evils that follow this dangerous malady. Mr. Kevill has written for the benefit of other sufferers; he says:-

"I wish to testify in favor of the wonderful curative powers of Paine's Celery Compound for two reasons; first, in justice to the proprietor; and secondly, for the benefit of suffering humanity.

"For the past fifteen years I have been troubled with diseased kidneys. I am engaged in the manufacture of cheese, and am obliged to work more or less in a stooped posture. At times I found it almost impossible to work owing to severe pains across my kidneys. Often after working in a stooping position for a time, I would find it very difficult to straighten up at once, and could only do so after

"Of late years, while laboring under ncrease between 1870 and '85 was over 300 these severe attacks, I became very per cant, more rapid than between 1850 nervous, and continually had a tired, worn out feeling. My rest at night seemed to do me no good, and I always felt tired out in the morning.

"I had been taking various medicines and was gettiag worse all the time. At last I decided to give Paine's Calery Comhe various protected countries reveals the pound a trial. I procured a bottle, and took it according to directions, and found tected, and is decreasing in England and its effect wonderful. Before I had used Japan, and in these countries only since the first bottle I began to improve; after I had used the second bottle I felt as well The well known tendency of protection as ever I did in my life. It had banished to force the accumulating wealth of the all aches and pains, my nervousness was community into the hands of an ever de- all gone, and the tircd and worn out feelreasing percentage of the people, which ings were banished. I can go to bed now necessarily involves an increasing percent- and sleep well, and rise in the morning ge of poor, no matter how great the rested and refreshed.

ggregate increase of wealth, accounts for | "I have recommended Paine's Celery he increase of crime under this system of | Compound to my friends who were suffer axation; for the poor and crime increase ing from the same troubles as I had, and nd decrease together in all countries and all have been greatly benefitted. Koowing what it has done, I can cheerfully recommend it to any person suffering from kidney disease."

REFORM IN TAXATION.

A petition is now being widely circulated throughout the province asking the legislative assembly to reduce the taxation on buildings and other improvements, or else to allow the municipalities

The reason the advocates of this reform urge for such a change, is the manner in which the present law discriminates against those who employ labor in improving their property, or in the manufacture of goods. It is pointed out that there are two methods of securing wealth from the land. One method clears, fences, erects buildings, raises crops or manufactures goods. The man who thus uses the land is by every productive act industriously, honestly and beneficently adding to the prosperity of the nation, und if a man thus acquires wealth, he does it in a way that injures no one.

On the other hand a man may keep land in idleness, employ no labor, add nothing whatever to prosperity; but he may actually injure the country by retarding and scattering settlement, and by keeping labor in enforced idleness. He may simply wait till increased settlement and the industry and enterprise of his neighbors have made that land valuable, as is always the case in growing they stopped in O'Bern's bush, two miles

Now, here are two uses, or rather a use of land and an abuse of land. One man uses land to beget wealth by his industry, the other uses it to secure wealth at the expense of others. The one use is beneficent and should be encouraged, the other is injurious and should be discouraged. It is claimed use of the land, for, if a man improves | ment of the kidneys is only too plain his land in any way, the law insists that | to all who have been troubled in this his taxes must be increased, so that the better a man does for his country, the worse the country does for him. The speculator, on the other hand, by avoiding

It is further claimed that in our large cities the land value rises to such enormous figures that the land owner may coltheir lives and means to the amelioration | lect from \$10,000 to \$50,000 per acre per of the condition of the poor and weak, annum, and such is the relation that this here every time.

begets in society that while the farmer (T) must toil industriously to raise a crop every year or humanity would starye, the collectors of these land values need provide nothing for humanity, and yet reap the profit of many farms. Thus while one part of the community must toil energetically to maintain the burden of society, including the taxation for government, and yet enjoy but little of its benefits, another class may enjoy the blessings of civilization to overfl.wing, and yet be relieved in perpetuity from any of its burdens. And it is further pointed out that the making of public improvements, such as highways and other means of communication, while increasing the burden of taxation on industry, brings additional fortune to the ground lords who collect the enhanced land values in the centres of commerce. Thus the burden to one part of society means riches to the other part.

This inequality it is sought to remedy by asking the legislature to diminish the taxation on buildings and other improvements and thus increase taxes on land

HOME FOR THE AGED. ANNUAL MEETING OF THE CEN-TRAL CHARITY COMMITTEE.

Appointment of New Officers-The Secretary's Report.

Last Wednesday week the officers and members of the Central Charity Committee met in the council chamber for the purpose of finishing the year's work done by that society, and to elect officers and transact general business for the new institution. Eighteen members were present. The chair was occupied by the 1st vice-chairman, Mr. T. Connolly.

After the reading of the annual report, treasurer's report, and reports of dispensers, and the Home committee, the Central charity committee, which has had an existence of eleven years, quietly passed away, and a new and better organization took its place. The following are the names of the officers elected for the Home: President, Mr. D. J. McIntyre: 1st vice-president, Mr. D. J. McIntyre: 1st vice-president vice-preside dent, Mr. Thos. Connolly; 2nd vice pres., Mrs. E. B. Weldon; secretary, Mrs. E. E. Sharpe; treasurer, Mrs. H. G. Whiteside. A council of ten ladies and ten gentlemen was appointed as follows: Mesdames Keenan, Trew, Mills, Matthews, Arnott, Coburn, Rrown, Walters, Gough and Flavelle; Messrs. Brady, Pedlar, Thurston, Morgan, Ravs. Hughson, Macmillan, Totten, Shorey, Marsh, Vicar-Gen. Laurent.

In a neat and pleasing address the president referred to the excellent work done by the ladies of the C.C.C., and as a mark of honor moved that Mesdames Neelands, Trew, Keenan, Mills, Whiteside, Weldon, Sharpe, Matthews, and Arnott be made honorary life members of the new society. The motion was seconded by Rev. Mr. Totten, and carried unanimously by a

The treasurer's report of the private with the Unite The treasurer's report of the Home monies showed there is a sum of \$150.79 on hand. The following report was read by Mrr.

MR, PRESIDENT-I have much pleasure in stating that I have visited the Home once or twice a week or the last two or three months, accompanied by the ladies of the Home committee. We found everything in working order, the inmates clean and comfortable and all healthy with the exception of one old woman who is laid up at the present time with partial paralysis. It may be a lingering illness or terminate quickly. reat praise is due the matron and her daughter for the care bestowed on the old reople. There are seven inmates-two old men and five women-but gradually there are more coming, as our new Home can very easily accommodate a larger number. We are grateful to the members of the county

council for their generous grant of two hundred and fifty dollars, and we hope at the next sitting of the county council to be able to thank them personally and extend an invitation to them to visit the Home and inspect the purchases we have made. We tried to be as economical as possible, but the house was bare and void of furniture of all kinds. We cannot call it a poor house any longer, as it is beginning to have a very home-like appearance.

We hope our Lindsay friends will come to visit the Home and help to increase our membership. I am sure it will gladden the hearts of all who have given us such cheerful donations and co operated with us in making the old people happy in their declining

We thank you, Mr. President, rev. clergy, and members of the town council, who have so ably assisted us in the past, and hope you will continue to encourage us in the good work. We will not mention the names of those who have so generously donated to our cause, remembering that charity is sweeter when given in disguise.

MRS. B. KERNAN, Home Committee.

Memorial Cards. Some handsome lines of memorial cards now in stock at reasonable prices for one and two dozen lots. Call and examine or

The Arabs at Uxbridge. The North Ontrio Times, in this week's issue, had the following to say anent the Arabs or Pyrenean gypsies : A caravan of what could be taken for none other than the refuse of the world simmered down to its most repulsive dregs passed through town about noon on Saturday. It consisted of some four or five covered carts. sufficiently large for two or three of the "bete noir" to stretch out their amalgamated mass of misery in. These carts were drawn by temporarily glued together bones, no doubt thrown out as useless from a fartilizing machine. Had Darwin seen the bipedal portion of this caravan he might have propounded different theories to what he did; but we consider those theories which are credited to him preferable to any which he could propound from this heterogeneous mass. The bears, of which there were four, and ugly looking creatures at their best, bore the most respectable appearance of the lot. Many stories, some of them being of a most atrocious nature, are in circulation about these travellers, one of which is to the effect that if in their begging rounds they find the women of the house alone they scare them by threatening to let the bears loose if refused their demands. Another report, and it hardly seems credible, is that during the cold snap of a couple of weeks ago some of their babies were frozen to death and afterwards cut up and frozen to death and afterwards cut up and fed to the bears. Such people, whether such reports are true or false, should not be allowed to pass through the country; they are not only worthless but a menace

THE SUFFERING OF OLD PEOPLE

Finds Simple and Quick Belief in the Use of South American Kidney Cure. The suffering from kidney trouble endured by men and women who are getting a little up in years is often exceedingly distressing. The annoyance way. How keen the distress at times from what is known as prostatic troubles of the old, such as enlargement, inflammation and ulceration of the prostate gland. Without any present or after unpleasant effects South American Kidney Cure gives immediate and lasting relief in all such cases. It is a wonderful medicine for kidney trouble of whatever kind. It is essentially a kidney cure, and boasts of nothing more. But it is king

General Joubert Makes Speech to the Burghers.

THANKS THEM FOR PROMPTNESS.

He Exonerates the Honorable Section of the British From Blame for Jameson's Raid-A Feeling of Restlessness Still-Other News by Cable. Pretoria, Jan. 24.-General Joubert,

commander-in-chief of the forces

the South African Republic,in a speech at Heilbron yesterday, in which he thanked the burghers for their prompt, energetic and patriotic action in the recent troubles in the Transvaal, said that the raid of Dr. Jameson and his followers was not the work of the honorable and noble section of the British residents, but, on the other hand, was a cunning and insidious attempt to overthrow law and order. He said the Beers were proud of the sympathy manifested by the Government and people of the Cape Colony, and he foresaw a great future for South Africa if it were united. But he said quiet had not yet been restored. Weapons were still being discovered in the possersion of men who had been called upon to give them up. Advices from Johannesburg represent matters as quiet there, but a feeling of unrest pervades the populace and the unemployed, of whom there are a great many, are becoming dangerous. They are leaving that city daily in small parties, but their destination or objects cannot be ascertained.

AS TO VENEZUELA.

The London Times Says Lord Salisbury is Open to Any Fair Proposal.

London, Jan. 24.-The Times contains an article discussing the Anglo-American situation in the light of the latest developments. It does not adduce any new views, but recognizes the efforts of the Government at Washington to bring about a peaceful solutios of the question. It sees much significance in the anger of the jingoes at these efforts.

It again contends that Lord Salisbury's despatch, far from refusing, made a specific offer to arbitrate the Guiana boundary dispute and declares it to be no secret that the Prime Minister is quite prepared to consider favorably any fair and frank suggestion modifying the details.

The Daily News pleads for a settlement of the Anglo-American dispute. It sums up the British advances, but says it is equally true that ample justice has been done by the press and public in the United States to the strength of England's position and the equity of her conduct.

The paper remarks upon the silence of Lord Salisbury, and declares that the matter cannot be left to the Foreign Office. "The public," it adds. "is wisely content that professional diplomats shall deal with technical diplomacy, but there are broad principles concerning which the nation must be heard and its voice heeded. The British people will not have war with the United States and there is

The Daily News appeals to Washington to clearly indicate to Venezuela that the United States wishes the question to be speedily settled, and declares that a word from President Cleveland to President Crespo would produce a decisive result.

The Chronicle will to-morrow say that the drawing in its legal aspects of the British case in the Guiana boundary dispute has been intrusted by the Government to Sir Frederick Pollock, corpus professor of jurisprudence of Oxford University.

Holding the Big Fellows. London, Jan. 24.-The Times will tomorrow publish a despatch from Prethe Reform Committee, who were arrested at Johannesburg, would be admitted to bail with the exception of Lionel Phillips , president of the Chamber of Mines; Col. Francis W. Rhodes, brother of Cecil Rhodes, ex-Premier of Cape Colony; Percy Farrar, proprietor of the South African paper, Country Life, and John Hayes Hammond, the American mining engineer. The despatch adds that the enquiry in the case of those arrested will take place on Wednesday next, after which most of the assused will be liberated.

IN CAPE BRETON.

Sir Charles Tupper Nominated by the Sydney, C.B., Jan. 23.-Sir Charles Tupper was this afternoon formally tendered the nomination of the Conservative party for the seat in the County of Cape Breton, vacated by Mr. David McKeen. Mr. E. T. Moseley, President of the Conservative Association, presided at the meeting, the opening of which was delayed by the snowing up of the delegation from the mining districts on the Sydney & Louisburg Railway. Mr. McKeen protested against the reports that he had carried around the nomination in his pocket for Sir Charles Tupper. The

nomination was then carried nuanimously with considerable enthusiasm. When Sir Charles appeared he was warmly received. He spoke principally on the condition of the Cape Breton coal industry and the greatness of the Canadian Pacific Railway, interlarded with laudations of the great benefits of the National Policy to Canada, In corcluding he dealt briefly with the fast Atlantic steamship service, the entrance of Newfoundland into Confederation, and the Manitoba school question. On several of the topics he rehearsed numerous arguments touched on at various points on his travels on the line of the Intercolonial Railway en route to this town. The auditors of the Secretary of State were composed of delegates from various parts of the constituency, those from the mining and shipping points of Glace Bay, Bridgeport, Portmorien, and Louis-burg predominating. North Sydney and Sydney, both considerably inter-ested in the mining industry, were also well represented, the audience being both large and enthusiastic.

HOW FEW THERE ARE

Who won't own to a little weakness for money. Housekeepers know that prices count in these times, when money is not any too plentiful. At our store you will get honest goods at honest prices, 16 ounces to the pound, and no sharp tricks.

TEAS and COFFEES.

In Teas you will find our prices about 25 per cent. lower than is usually charged for the same class of goods because we know how to buy right. Very few dealers carry the real fine qualities. We sell you the finest first-picked Tea and the young delicate leaves that give the delicious flavor found in English Breakfast, Young Hyson and Darjellings. The next grade ranges very close to the above in quality, but comes considerably cheaper. Then we can give you a really good blend of Indian and Ceylon, Young Hyson or New Japan for surprisingly little money. Our 25c. Tea is a wonder at the price.

In Coffees we have always led the trade for this district, which is due to the uniform excellent flavor. Our Blend at 45c. is a cup in perfection, and our 40c. Blend cannot be equalled.

COCOAS and CHOCOLATES.

Healthful and nutritious drinks, and handy to have in the house. We keep the best to be had in the town.

E D Orde.... To Mr. W. G. Woods: Dear Sir,—I have much pleasure in stating that the Gurney Oxford Hot Water System, which you set up my house in the autumn of 1894, was fully what you represented it to be, and gave entire satisfaction. There was no dust, no smoke or gas, no leakage, and the air seemed pleasant and agreeable to breathe, so that no one had a cough in my house during the entire winter. Notwithstanding the severity of last winter, our house was so comfortable that we had to go outside to find if the day was cold; while the quantity of coal consumed was only a little more than we had burned in former winters in our large coal stove with less rooms to be heated. The furnace was easily managed, and with ordinary care, the temperature of the house could be kept at any degree desired. I can heartily recommend this system of house heating to anyone, who during our Canadian winter desires to enjoy what I can best describe as solid
