The Canadian Lost. LINDSAY, FRIDAY, JAN. 15, 1897.

A GREAT CANADIAN.

The following, taken from the London News, should be read and pondered by every Canadian, be he grit or tory : If Mr. Laurier fulfills the promise of his and East Victoria will be held at Fenelon

Within the last few days he has come before the people twice in attitudes which show that he is a statesman and a man imbued with the love of British justice and British fair play, and with the fine democratic spirit, both of true Canadianism and of the highest and most worthy type of manhood. His opposition to the Quebec bishops and his refusal of a colonial title stamp him at once not only as a Canadian among Canadians, but as a man among men.

And this is only the beginning. The years are all before him full of promise and of hope. They are in his hands; he can make or mar them as he will, but if he continues as he has gone the world will sing his praises, and history give him the place he deserves for the achievements of the truly great. Mr. Laur'er in opposition was one thing; Mr. Laurier as the chief figure in a great country is another. It is not by his criticisms of the government while in opposition that he will be judged, but by his achievements as the prime | made by the railways to give facilities to minister of Canada.

TORONTO AND NORTHERN ON-TARIO.

We call the attention of our readers to an important editorial article from the Toronto World of the 7th inst., regarding the extension of the G. T. R. from Haliburton to the Mattawa. Should this extension be carried out its importance to this town will be very great. Lindsay will then be on the great highway between Toronto, Mattawa and Ottawa, and a central spot for additional factories and increase of trade. Though times have lately been unusually dull, we have every hope that Lindsay, from its fine natural position, will not be behind in the race for commercial distinction. Our farmers, as well as our merchants, will be gainers by the extension of the road from Haliburton to the Oitawa,

CURLING CLUB NOTES.

The Bertram Tankard Competition. Bartram presented the club with a cup to bestir themselves to secure a portion of it. in a points competition. The competition for this cup has always been very keen and the strongest players in the club have as a rule won it. This year the local match committee thought it would add to noon and evening fifty seven members of the club competed. The ice was in good condition, except No. 1, which broke up very badly. The scoring was not very high. The cup goes this year to Mr. S. McMillan's rink. He scored 27 points, and

Mr. Needler and Mr. McLannap have also entered rinks. The Colts should put a rink or two into the competition, as the matches of the Colts' Association, and

the 'spiel matches would be great practice

-The International rink, which left on Wednesday for Toronto, will try to arrange with the railway authorities in Toronto so that the New York curiers may be able to get to Lindsay. The rail-way authorities have not been very liberal this year with their arrangements; the best the American curlers could do with hem was to have tickets good until the 20th Inst. If this cannot be changed they will not be able to walt over for games. However, Datroit will be here, and Winni-Untario clubs will attend in great force. -Messre. Flavelle and McLennan will Wednesday Jan. 20th, 1897

skip the rinks to represent Lindsay in the double rink competition. We expect to be able in a few days to publish the names chosen for these two rinks. It would assist the committee very much to know just who are going to play. They feel that they should not ask any person who will be able to assessment and play to be able to assessment and play to be able to assessment and play and receiving Statements of Receipts and Disbursoments.

Book Binding play in the bonspiel to assume any position requiring any work, that the players should be left perfectly free to attend to their playing and nothing else, and hence the committee make their selections for a though they are somewhat solled.

Mr. Moody's Appeal to the Churches. Before closing the services in Cooper Union, New York, on Dec. 11, after a series of most remarkable evangelistic meet--The Decoration committee should be meetings on record, Mr. D.L. Moody issued the following trumpet-call to the churches

Never during the past century has the Church of Christ had such an opportunity for the spread of the gospel as now presents itself. Never has the world manitested a greater interest in religious teachings. All substitutes for christianity have proved a failure and the nation is seeking once more for the old paths, the good old way. Lat the church arise and

make ready for the work. First, let us have a revival of righteous ness among ourselves and then open wide long neglected. There were 3,000 churches | 4ra at 25c, and feed at 22c. reported no accessions on profession of faith. Is it the will of God that millions -The Lindsay rinks in the double rink | occe or twice a week, while our neighbors are needing the message!

Is it not time that the church should arise? If we refuse to work in His service be assured He will turn from the regular channels and find servants who will do His bidding in spreading the gospel to every living soul.

During the remaining days of this year let us all wait upon our Master for a special preparation for the coming winter, and when the New Year opens, why should not every christian church in America begin the season with a thirty days' service of gospel meetings? Why not set aside all other diversions, and church work itself, during January, in a united work for the spread of the gospal? The world needs it sorely, and was never

more ready to receive it, and it is the privilege of the church to proclaim it. If every church will but answer to this appea with open doors and hearty response; I every pastor will exert himself to spend and be spent in the Master's service at this special season; if every officer will give his sympathy and co-operation to the work, the church will have cause to remember January, 1897, both in time and through-D.
