

E. E. W. McGaffey.

R. S. Porter. Christian Endeavorers. When Attending the Convention on Feb. 21st and 22nd, be sure and get a C. E. Hymn Book. CLEAR TYPE BIBLES.

PORTER'S BOOKSTORE. Insurance. BRITISH EMPIRE MUTUAL Life Assurance Co'y. ESTABLISHED 1847. Prominent Object. Sound Life Insurance. Bonuses every 3 years.

Accumulated Funds, \$9,000,000.00. Annual Income, \$1,500,000.00. Canadian Investments, \$7,500,000.00. Government Deposit, \$500,000.00. WESLEY GREER, Lindsay.

The Canadian Post. LINDSAY, FRIDAY, FEB. 15, 1895. NORTH RIDING CONVENTION. Owing to the very inclement weather on Friday last the reform convention advertised to take place at Cobocook was postponed to Friday, Feb. 22nd, one week from to-day.

SOUTH RIDING REFORM CONVENTION. The friends of the reform party will hold a convention in the Academy of Music, adjoining THE POST office, on Saturday, March 2nd, at 11 o'clock a.m., for the purpose of nominating a candidate to contest the south riding of Victoria at the coming Dominion elections.

DISREPUTABLE TACTICS. Ordinary people naturally associate with the idea of membership in that honorable body, the Canadian house of commons, a sense of truthfulness too honest to misrepresent, and a quality of honor too lofty for the creation of occasions to asperse the character of a former political opponent who is not in active political life.

COMMUNICATIONS. The Waterworks Deal. (To the Editor of THE POST.) Sir,—I am compelled to believe that the owners of the Lindsay waterworks and their friends are bound to make another dash for our treasury. If the works are such good value, why this persistent anxiety to sell them? Of all people in the world banks and insurance companies are the last to part with a profitable investment. I am surprised that a few members of the council are still moving for a by-law to be submitted to the ratepayers to sanction the purchase of the works.

EDITORIAL NOTES. The overdue French linen Gascoigne, about which so much anxiety was felt, reached New York on Tuesday morning last, eight days behind time. The delay was due to a broken piston rod and to terrific gales, which prevented repairs being made. Hamilton Times: Margaret L. Sheppard, the notorious, has turned up in Buffalo, where she appears in the role of converted nun, and works the same game as she did in parts of Ontario. A copy of her confessions as made in the witness box in Toronto would be "good reading" for the Buffalonians.

say. The old trick of setting up a man of straw for the gratification of pugilistic skill seems to be used by Mr. Hughes only for the purpose of telling the electors of North Victoria that he is still the man they must elect. The conservatives are dubbed "loyal and true gentlemen," and the conservative leaders in North Victoria are told that "they are too honorable to play any grit-jessit game," (i. e., to set up or support any opponent to Mr. Hughes.) They are warned of the penalty for so doing, if these words mean anything. "And, besides, they have the fate of all such too clearly stamped on history's page to be anxious to commit political suicide." If this warning to Dr. Wood and other independent conservatives up north is not a confession that the present member is not so strong as he once was, then we fail to decipher the intent of this impudent and presumptuous attempt to play the bully while he scatters sand into the eyes of the men of North Victoria.

The attack can do Mr. Barron no harm, and we believe it will not profit the editor of the Warbler. EDITORIAL NOTES. The overdue French linen Gascoigne, about which so much anxiety was felt, reached New York on Tuesday morning last, eight days behind time. The delay was due to a broken piston rod and to terrific gales, which prevented repairs being made.

Hamilton Times: Margaret L. Sheppard, the notorious, has turned up in Buffalo, where she appears in the role of converted nun, and works the same game as she did in parts of Ontario. A copy of her confessions as made in the witness box in Toronto would be "good reading" for the Buffalonians.

The Farmer's Sun, the patron organ, figures that the maintenance of the senate represents an annual cash outlay equivalent to the produce of 11,000 acres of wheat, yielding 30 bushels to the acre and selling at sixty cents a bushel. This is a striking way of calling attention to a great waste.

Rev. John Connolly, Roman Catholic priest at Biddulph, was recently removed to Ingersoll, and prior to his departure was presented by his Protestant friends with a handsome ebony gold-headed cane as a mark of respect. To hinder and prevent such coming together of two creeds in the bonds of christian fellowship is the mission of Mag. Sheppard and others of her ilk.

The Mail and Empire says: "In North Victoria the government is attacked by a liberal paper, THE LINDSAY POST, on the ground that it has not given the constituency sufficient public works. The Post declares that the Fenelon Falls bridge was arranged for during Mr. Barron's time, who was a liberal, and it asks: 'What has been done since?' To this question it answers, 'Nothing for the general public.' Here is an attempt to incite the electors against the government because it has not been extravagant."...THE LINDSAY POST did not attack the government on any such ground. The Mail and Empire does not raise itself by thus distorting what THE POST did say. THE POST was simply ridiculing the absurd effort of Mr. Hughes to secure for himself the nomination of his party by claiming all the world. Once upon a time there was a man vain enough to call upon the sun to stop in its course so as to let him rest a little longer in bed. "Nuff said!"

Mr. T. J. McBride, the Northwest manager for the Massey-Harris Co., boasts in the public press that during the past few years no less than eighteen agricultural implements firms have been driven to the wall and compelled to go out of business. That there may be no doubt as to the truth of this statement he gives the names of the firms. The crowding out referred to is one of the results of the consolidation of the Massey-Harris firm and his powerful combine is alluded to on public platforms as a sample of the prize-worth industries fostered under the N. P. A huge business is concentrated in Toronto, while eighteen towns of the Dominion mourn the financial wreck of firms employing hundreds of men in various cases. The farmers of this section of the province should place their orders with the agents of Sylvester Bros. M'F'G. Co., of this town, and no opponent is likely to what is a grasping and monopolistic concern. No wonder Massey is able to donate a \$100,000 music hall to the city of Toronto.

of the council are sworn to it, so they were last year. When the Queen Hotel and other valuable properties were an easy prey to the flames because the Waterworks Co. did not supply necessary pressure according to agreement, did these able men, sworn to protect our interests, take any step whatever to bring the company to book and recover any portion of the loss? As the town pays the company a yearly rent they had better recover it in their own hands. But no!—the stand-pipe was frozen, the telephone was at fault, etc.; the company was all right, and the electors should lose their property and say not a word.

Whilst for months the gross mismanagement of the works caused such pounding that the hydrants were vibrating on the streets, small pipes and joints were snatched in houses, when holes had to be dug here and there to repair broken mains and stop the flooding of adjacent property, did these wise and able men take any interest? By no means. The company was all right; their fellow-citizens should take it all in their own hands. Any one will see that such continued pounding must have permanently injured the whole plant, and also that the company would never flow if they had any intention to keep the works.

Just now it is true they have at the power house employed a gentleman and an engineer, and does his work. All right. Now, let me ask: Is it any more than they should do? If they have had last supplied good pressure at our late fire, is it any more than their agreement? Does the town pay them \$2,300 rent per year for the use of the works? Why, it is funny! Is Lindsay to buy the works from the company? Why, it is funny! Is Lindsay to buy the works from the company? Why, it is funny!

COMMERCIAL NEWS. OFFICE OF THE CANADIAN POST } Feb 15, 1895. } Australian Live Stock in the English Market. Particulars are now available of the result of the recent experiments in the shipment of live cattle from Australia to England, and they will be interesting to farmer readers. All animals from the Antipodean colonies are slaughtered at the ports of landing, owing to the admitted prevalence of pleuro pneumonia among the Australian herds. Seventeen animals are included in the account sales, eight Shorthorns and nine Devons. The latter were very superior in quality, well bred and equal to the best cattle received from the United States. The Shorthorns were fine cattle also, but from Shorthorns were rather too fat, although this seemed almost incredible in view of the fact that the animals had travelled 12,000 miles. In consequence they did not bring so much per pound as the Devons. The day's allowance of food per animal was 10 lbs. of hay, 4 lbs. of clover, 6 lbs. of maize and 4 lbs. of bran. Three of the Shorthorns or 204 lbs. each realized 4 5/8 p per lb., 2 1/2; while the remaining five (weight, 922 lbs. each), were sold at 5d per lb., or 23s 7d. The total sum realized was £434 12s. The expenses of ringing the animal to England is stated to have averaged £20 per head, but it is expected that this amount will be reduced to about £10 in future shipments. The chief items of freight, including the carriage of foodstuffs used on the voyage, £3 6s, and cost of food, per bullock, £2 12s. As means are being made to ship a larger number of animals from the different colonies this year to further test the question, and the result of the experiment will be watched with interest. The Australians seem to think there is money in the business. This is always the case with the Canadian shippers, but it must be remembered that the price of cattle in Australia is very much lower than in the Dominion.

Impurity in Clover Seed. An article drawing attention to the impurity of the clover seed exported by Canada and the United States has received pretty wide circulation in the press this week. The question is not a new one, and unfortunately the statement made that the American seeds received by English importing houses are very impure, is not too true. In September last the Ontario department of agriculture issued a bulletin entitled, "Impurities in Clover Seed." A tabulated statement was therein given showing the number of both shales and red clover seeds in each ounce of seed, and the amount of impurities. Although the compiler is very apparently inaccurate in some of his figures, his work is invaluable as drawing attention to the impurity of the seed. The article in question is not only a warning to the farmer, but also a warning to the importer. The article is a warning to the farmer, but also a warning to the importer. The article is a warning to the farmer, but also a warning to the importer.

Some weeds are more obnoxious than others. To distribute wild mustard, wild thyme and Canada thistle through seed is a crime, and the government should take steps to prevent farmers who import seed from Canada from doing so. The article in question is not only a warning to the farmer, but also a warning to the importer. The article is a warning to the farmer, but also a warning to the importer.
