Health Lost and Found

THE STORY OF A YOUNG BOY'S

Was Growing Too Rapidly and His Health Gave Way-Several Months Doctoring Did Him No Good-His Parents Almost Discouraged. 14-

From the Napance Beaver, beginning to realize the possibilities of life stricken down with disease, the escape from which is sometimes thought to be little short of a miracle Hearing of such a case a reporter called on Mr. J. J. Smith, living near Fredericksburg, Station, in Lennox Co. and interviewed him regarding the cure of his son who was in bad health and regained it by the use of Dr. Williams' Pink Pills. Mr. Smith is one of the oldest residents in the locality, of direct U. E. Loyalist descent, and has resided all his life on the farm on which he lives. He is consequently well known throughout the district. In reply to the scribe's query he gave the details of the case. "My son, Stanley, was taken sick about the first of February, 1895. He became very deaf and had a dull constant pain in condition being more properly des-

his head. He grew very weak, such a Styples cribed by the term "general muscular weakness." He was troubled with severe pain in the back and had no appetite, continuing to steadily grow weaker, and finally lost all ambition. He had little more color in him than a bit of white paper. A physician was consulted on the first appearance of the trouble. He carefully examined the case, stating that the hearing was affected by catarrhal deafness, the pains in the back originating from muscular rheumatism and the constant tired feeling and general weak- friends in Lindsay. ness was caused by over growth. These difficulties together with the after effects of la grippe, left him a physi-

cal wreck. He had the benefit of careful medical attention for four months. The doctor had carefully treated him for the deafness and succeeded in restoring his hearing, but, in other respects was no better. He ordered that he should be carefully nursed, which was about all that could be done. To make things more clearly understood I might say that he was at this time past twelve years of age, having

grown very fast, was large enough for

said medicine could not benefit him, and all that could be done must come by nersing We naturally felt greatly discouraged at the prespect, not knowing what course to pursue in the future. At this juncture one of the druggists of Napanee who had previously compounded many prescriptions, recommended a trial of Dr. Williams' Pink Pills. It was then the

first of June when we purchased three boxes and commenced the treatment When he had finished the second box his appetite, previously fickle and un-He continued taking the pills until seven boxes had been used. His strength returned with renewed vigor, and all signs of muscular rheumatism had vanished, and he steadily regained a strong, healthy color, and was able

to do considerable light work in the harvest field, such as riding the mower reaper or horse-rake. He has since attended school regularly, and though a year has elapsed, he has had no symptoms." Mrs. Smith spoken to about the matter readily concurred in all that had been said relative to her son's

case, and was very decided in her views regarding the health-giving properties contained in Dr. Williams' Dr. Williams' Pink Pills are a blood

It was the intention of the department, however, as soon as specifications and plans for new locomotives had been completed, to open communication with the Kingston works on the subject of building some locomotives for the I.C.R., as the desire was to give Canadian firms preference in the manufacture of locomotives which the Government might require.
