

A MARCH MANIFESTO

For Early Buyers of New Goods.

OUR SPRING OPENING SALE

AND WHAT WE ARE OFFERING.

"Push" is to be the key note of the next three months' trade. To push business successfully the merchant must have the material to push on. We're confident in our ability to stimulate early spring buying, for we have provided, and in ample quantity.

Hard labor and experience teaches the value of money. You need to get all you can for it. Anyone who expects you to put dollars into sentiment and buy as a favor is a fool. It is your duty to buy as cheap as you can, but see to it you get value.

We study all our business with care, but none other with the solicitude expended on our buying. That is our first care. To buy well we get direct at the manufacturer. That brings us in touch with the best hands for value. The results you may see on our

counters, on our shelves, in the hands of hundreds of our satisfied customers.

Our stock is thoroughly practical. Goods bought to meet the people's needs. Goods bought direct for cash. Goods bought to provide a variety that a city store cannot do more than offer, and a range of value that no store in this district can attempt to equal. And, mind you, goods bought to sell at the lowest prices we have ever been able to make. These prices are at your service. We make these prices by our methods. All this is at your disposal. Why neglect it?

Remember, everything is new. Only a few days out of the cases. Not shop worn. No place in all the broad land can offer you better goods.

IF YOU VALUE GOOD VALUE come to our Spring Opening Sale and look, learn, and see how we are hunting for Spring Buyers.

A devoted husband and two children, an aged mother, six brothers and a sister, live to honor the memory of the one gone. The deepest sympathy of many dear friends will be extended to this afflicted family.

MOUNT HOREB.

WEDDING.—Messrs. Matthew Skene and Richard Grandy, of the village, have gone to the North-West to seek their fortune. We wish them every success.

HYMNICAL.—A number of weddings have taken place in this district of country. Some are getting married who were never before, and some who were. Such is life.

REMOVAL.—Mr. J. J. Johnson has moved into Mansers and gone into farming. We wish him success as a tiller of the soil, and we predict a bright future for him.

NOTES.—His opponent Magaly, of this village, is now the owner of a team of horses second to none in the county. A first-class dress maker is in Mount Horeb.

BALLYDOFF.

BLIZZARD.—This section was visited on Sunday by a blizzard which did not spare the fence corners up with snow, and some of the roads, the result being no services in either direction.

DOG BITE.—The peace and harmony of our neighborhood has again been broken by some dog bite. The dog was a small black and white, and was very vicious.

ACCIDENT.—Last week as William, son of Mr. John Thurston, was driving down the road, the front of his horse broke, causing him to fall under the front of the sleigh and to be killed.

CRUCIFIXION.—No services in either the Presbyterian or English churches last Sunday. The storm prevented other clergy- man or congregation from putting in an appearance.

many fine buildings, among the most conspicuous being White hall, a large white brick structure under the name of the hotel, and which is owned and run by a genial and whole hearted brother Scott—D. J. McKinnon, well known in Victoria and Ontario counties. We were surprised to see such a fine house in a country place.

BEAVERTON.—On Wednesday, March 10th, wedding chimes pealed forth, breaking the usual quietude of the village, the occasion being the marriage of Miss Ida J. Moore, of the village, to Rev. Lewis F. Ryfield, B.A., of Freestown, N.Y., at the residence of the bride's father, Mr. Anson Moore. Rev. N. Harris, pastor of the Methodist church, performed the ceremony.

Electric Tire Advantages.

The adjusting of the Electric Detachable Tire is a matter of the utmost simplicity. They can be and are satisfactorily used on single piece light rims. Fitting perfectly true on the rims they cannot roll, and it is impossible to blow them off. They are very easily deflated and detached. They are so constructed that when fitted to rim all the resilience is thrown into the tire and none lost in attachment. It takes less than three minutes to deflate, detach, repair puncture and replace ready for use. Being an incorporated tire it is lighter than a cement made tire and the rubber is less liable to come loose from canvas. It also wears longer and retains air just as long as any double tube tire. The special patented tread prevents slipping and renders them much less liable to wear than a smooth cover. The tubes are specially manufactured and are of a velvet finish. They are round and perfectly air tight. Being made of pure gum they are always the same in all degrees of temperature. Two years of experimenting with a perfect tire as the objective point has given us as a tire in our Electric Single Tube that we believe to be as near perfection as is possible to make it. It possesses the resilience, appearance and wearing qualities of the Double Tube. The world's latest quarter-mile was made on this tire by Angus McLeod at Sarnia. When submitted to actual test on the tire testing machine, the best makes of other single tube tires run but 700 miles, Electric Single Tube Tires over 3,000 miles; other makes of double tube tires, 900 miles, Electric Double Tube Tires over 3,000. Our tires are all guaranteed by the most liberal guarantee, and should there be a defect, no time is lost in making it good. Insist upon having your tires mounted fitted with Electric Tires. They cost more money but they will give you perfect satisfaction every day you ride them.
