I had eczema on my hands so bad that when I shut them, the matter would ooze out and drop on the floor. My hands were full of water blisters. I was under the care of a doctor for a month, but he did me no good. I was advised to try Curicuna remedies, and it was wonderful what effect they had. The first application stopped that dreadful itching. I slept at once, and was cured in four weeks.

The people of Manilla and vicinity

have been in a state of great excitament for the past 48 hours owing to a terrible occurrence on Tuesday evening. William B. Moshier, a young man about 18 or 19 years of age, who resided with his father, Mr. Levi Moshier, a wealthy and well-known farmer, committed suicide by drinking paris green. He is supposed to have taken the deadly draught early in the afternoon, before starting for his brother's house, about a mile away, but when he had traversed about half the distance he evidently became too ill to proceed further and turned into Mr. L. Keeler's barn. About dusk Mr. Keeler heard peculiar noises coming from the barn, and going out to investigate, found the unfortunate young man staggering around in great agony. Mr. Keeler at once hitched up his horse and conveyed the young man to the brother's residence where a doctor was hurriedly summoned, but he could do nothing, as the deadly po son had permeated the system. The victim was conscious while the medical man was laboring to avert the consequences of his rash act, and said he had taken the poison because he was tired

Industries and Railways.

(To the Editor of The Post.) Dear Sirs .- I have read with interest your account of the doings and sayings of he Board of Trade at their last meeting. I cheerfully give them credit for talking sense, but talk alone will not do; sensible and practical acting must follow. Lindsay, like most places, has its advantages, but it has also its drawbacks. The advantages should be utilized, the drawbacks remedied as far as possible. The first and most essential requisite for industrial development of this or any other place will be a sufficient and cheap power. Other towns not far away have waterower maning to waste, we have near. place shortly. The Fenelon Falls scheme has been abandoned, and wisely so. If the Burleigh Falls scheme is any better it might be looked into. It is true that saw-mills supply their own fuel, but saw-mills cannot last forever.

An Inspiring Address by the Rev. A. J. The next thing is to consider what industries are best suited to out location and resources, and push these.

But instead of getting better the knee remained swollen and became very much inflamed. I consulted a dentor, and he told me that the trouble had developed into a severe case of erysipelas, and further said that as my blood was in a disordered condition I would have to be very careful. He left me a liniment with which to bathe the limb, but it did not give me any relief. I had heard so much concerning Dr. Williams' Pink Pills that I determined to give them a trial. In about three weeks time the swelling and inflammation in my knee had subsided, and my general health much improved. The use of the pills a few weeks longer restored my health. I am now a firm believer in the efficacy of this medicine, as others in my family have been benefitted by
