Change of Date. -Rev. Dr. R. N. Grant's lecture on the "Average Man" will be delivered in St. Andrew's church on Tuesday, April 4th, instead of March 28th, as before announced.

They are Prompt. Mayor Walters received a letter last week from Mr. E. A. Rider, of Toronto, stating that as the passage of the bonus bill through the Private Bills committee of the legislature ends all uncertainty as to the firm locating in Lindsay, he had arranged that his son, H. W. Rider, and Mr. Kitchener, should reach town on Monday to purchase a site and take measurements for the bonus factory buildings required.

EASTER MILLINERY. On Wednesday and Thursday, March 29th and 30th, we will have on display Pattern Hats, Bonnets, etc. DUNDAS & FLAVELLE BROS. The Burleigh Power. Peterboro Review, Monday: Mr. P. W. Barrett, of Toronto, chairman of the Burleigh Falls-Lindsay-Peterboro electric syndicate is now in town to consult with Mr. J. Alex. Culverwell, regarding the operations of the syndicate, and to confer with its associates, Mr. Barrett is the treasurer of the Luxfer Prism Co., and has made flotations, along with his associate, Mr. Horal, in the States and England in volving some three millions of dollars outlay of capital. He is quite enthusiastic as to the Burleigh Falls power, as to its immediate sources of revenue that with such a large amount of capital at present seeking a place for investment, the flotation of the Burleigh Falls company can be accomplished with the greatest success.

CURE THOSE UGLY PIMPLES. By Using Dr. Agnew's Ointment-Any Form of Eczema Helped at Once and Cured Eventually by its Use. Not a skin blemish caused by eczema, tetter, ringworm, salt rheum, scald head and other skin diseases that will not vanish as by magic on the application of Dr. Agnew's Ointment. One application will give quick relief, and in a few days the skin heals up and is as soft as a baby's. It will cure piles in from three to five nights-no matter what nature or how long standing. 35 cents. Sold by A. Higinbotham and P. Morgan.

LCI Notes. -A prominent young gentleman of the III. A. form, who has been wearing golden football hair, was presented with an address and fifteen coppers, the result of a subscription, a recess was devoted chiefly to a familiar talk on Canada's relation to the Empire, and readings from Canadian and British authors. Patriotic recitations and speeches will occupy the afternoon.

MILLINERY OPENING. Easter Millinery Opening on Wednesday and Thursday, March 29th and 30th. LUCAS & FLAVELLE BROS. The Wood Family. The scarcity of good wood is causing many citizens very serious inconvenience. There is not a stick of long or short hardwood in the yards, and as the result of better times the farmers are not fetching in the usual winter supplies. Green tamarac at present sells for \$3.50 a cord, and dry at \$3.75, while the quantity available is but limited. Many citizens are burning mill refuse, and others are not above using the roots of old stumps and an occasional log of Saugey float wood. The Lindsay Electric Light Co. and the board of education have been approached to sell fuel, and citizens as they plod through the streets, they talk of and from business pay more attention to the state of their neighbors' wood-piles than to the general appearance of the properties. Yesterday a well-known professional man solved his fuel trouble in a somewhat ingenious fashion. Recollecting that a friend had been absent from town with his family for some months, he secured the key of the premises from the caretaker and-most welcome sight-found the woodshed filled to the top rafters with fine dry hardwood. He at once hailed a cart and had part of the contents transferred to his own shed, after which he thoughtfully wired the absent citizen for permission of course several of his friends were let into the secret, and they are repeating the process with a thoroughness which threatens to leave the homes corner without sufficient fuel to boil a cup of tea.

Stock Notes. -Mr. Nathan Day, of Lake View Farm, Fenelon, owner of the celebrated coach horse, North Star, was in town on Saturday and reports North Star in excellent condition, having wintered well.

Railway Notes. -The C.P.R. has had snow plows out on all the system east of Toronto for the past couple of days. -Mr. H. Furze, G. T. R. travelling auditor, is in town making his general examination of the station books. -G. T. R. earnings for the period ending March 15th, show an increase of \$26,780 as compared with the same period last year. -The G. T. R. elevator at Midland road has been taken up this week, when the latest improved machinery for the quick handling of grain cargoes will be put in. -The I. B. & O. R. R. service has been somewhat slackened up, but is now improving, as the rain has melted the snow drifts blocking the line in places. -G. T. R. section men are circulating a petition asking for an increase of wages. Section men on the C. P. R. are paid \$1.15 per day, while the G. T. R. men only receive \$1. -The trouble between the G. T. R. and Ottawa, Amador & Parry Sound road has been adjusted, and close connections are now made at Scotia Junction, enabling Parry Sound residents to reach Toronto and return the same day. -While Mr. Hunt, son of Engineer Hunt, of the C.P.R., Peterboro, was walking along the track on Sunday last, he was struck by an engine and thrown to the ground. His coat, which caught in the wheels, was torn completely off his back. Marvellous to relate, Mr. Hunt escaped without a scratch, although considerably shaken up. -Peterboro Examiner: A miniature locomotive and tender loaded on a flat car on a G. T. R. siding is an object of curiosity to many. The locomotive is the first of several to be used on the hydraulic lift lock works. Though the driving wheels are only a couple of feet in diameter, the engine is a perfectly proportioned little affair. -The G. T. R. Summer Resort car will visit 36 of the principal cities of the United States, the car remaining from two to four days in each, while fully one thousand people have been placed on the stop list, three or four hours being set aside for the citizens to inspect the attractions. Some 30,000 handsome folders describing the summer resorts along the line will be given away, in addition to other descriptive literature. The Muskoka district will receive the most extensive advertising it has ever received. -In a very short time every freight car on the C.P.R. system will be equipped with automatic air-brakes and couplers. A commission appointed by the British government has reported that the ratio of lives lost in coupling and uncoupling cars in Great Britain is one in every 350 employed, while the use of automatic couplers has reduced the ratio to one in 600. Years have been spent in testing thousands of devices for converting the old draw-bar into an automatic coupler, but not one has proved satisfactory, or could be made to operate at all automatically under certain conditions. What is known as the M. B. C. coupler has been pronounced by a committee reporting the ratio of lives lost in coupling and uncoupling cars in Great Britain to be the best device yet known, and it will come into general use.

Local Brevities. -One township council met on Tuesday. The report will be found elsewhere. -By a mistake correspondence from Little Britain and Glanville were inserted together in last week's issue. -Failures in the United States last week numbered 189, against 208 for the corresponding week last year. -A false alarm of fire was turned in Tuesday morning at 1:30 o'clock from the box near The Post printing office. -The sum of \$23,000 was paid in Manitoba last year on policies issued to insure against damage by hail storms. There are fish in the sea. Good as ever were caught. Much better, indeed, than some that are bought. -Mr. W. Creswell left Tuesday for London to represent the local lodge, K. O. T. M. at the meeting of the grand lodge of the order, now in session there. -The roads between here and Cambridge are so badly drifted that Mr. Alger, mail carrier, was unable to get to town Tuesday, and made part of the trip by train. -We are indebted to Mr. S. J. Fox, M.P.P., for copies of the Sturgeon Point incorporation bill and of the bill to incorporate the Toronto, Lindsay & Pembroke R. R. -The Winnipeg Free Press has just issued a beautifully printed section of half-tone illustrations and sketches of the Manitoba cabinet and members of the legislature. It is a very creditable number. -Alderman Ingle, chairman of the board of works, has called for tenders for 75,000 feet pine and hemlock plank, 20,000 feet 6 in. 3/4 cedar scantlings, and 5,000 feet flattened cedar posts. Tenders must be sent in by noon of March 30th. -The American capitalists who are at the head of the smelting company recently housed by Midland to the tune of \$50,000 have gone north to arrange for the speedy erection of their furnaces and buildings. The works will cost at least \$250,000, and will give employment to fully 200 men. -Mayor Shanahan, of Penetanguishene, and other enterprising citizens of that burg, are about to establish a hosiery factory. That is the way to build up a town-the leading citizens should give practical illustrations of their confidence in its future and the first to reap the benefits of its natural advantages. -Town Commissioner Bilkie is being besieged with complaints concerning the laziness of several of the snow-plow men who make no honest attempt to keep the walks clear. The same trouble occurred in Peterboro during the recent storm, and the town council considered the matter of sufficient importance to call a special meeting to receive complaints and teach the snow-plow men a lesson. But then, any old thing seems to go in Lindsay-the motto here is "Give offenders another chance." -A north ward citizen has sworn off smoking-for the time being at any rate. The other night he went home from lodge meeting rather late, and deposited his lighted cigar on the edge of the hat rack while he removed his boots to scale the stairs without arousing the household. Tip-toeing lightly, he reached his room without making sufficient noise to scare a mouse, and it was all for naught-he found his wife awake, and-but that's another story. She talked so long that he became dry and sent her now humble partner down stairs for a glass of water. It was a lucky trip for him. He found the lower hall thick with smoke, and upon investigation discovered that his forgotten cigar, peeped into his wife's best silk umbrella, and only the ribs and handle remained. How he removed the tell-tale evidence of guilt we know not, but he contrived some plan, and now a tramp who called at the house the previous day for a square meal in consequence of having made away with a \$6 rain-coat.
