

Ayer's Remedies.

Save Your Hair

By timely use of Ayer's Hair Vigor. This preparation has no equal in dressing. It keeps the scalp clean, cool, and healthy, and preserves the color, fullness, and beauty of the hair.

"I was rapidly becoming bald and gray; but after using two or three bottles of Ayer's Hair Vigor my hair grew thick and glossy, and the original color was restored."—Melvin Aldrich, Canadian Centre, N. H.

"Some time ago I lost all my hair in consequence of measles. After due washing, no new growth appeared. I then used Ayer's Hair Vigor and my hair grew thick and strong."

It has apparently come to stay. The Vigor is a truly great aid to nature."—B. Williams, Floresville, Texas.

"I have used Ayer's Hair Vigor for the past four or five years and find it a most satisfactory dressing for the hair. It keeps all I could desire, being harmless, and causing the hair to retain its natural color, and requiring but a small quantity to render the hair easy to arrange."

"I have been using Ayer's Hair Vigor for several years, and believe that it has caused my hair to retain its natural color."—Mrs. H. J. King, Dealer in Dry Goods, &c., Bishopville, Md.

Ayer's Hair Vigor,

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.

LINDSAY, FRIDAY, APRIL 15, 1892.

TALKS FOR THE FARMER.

PROF. ROBERTSON ON ECONOMY IN FEEDING CATTLE.

Shows the Advantage of Ensilage and Gives Some Practical Hints—What Farmers Ought to Do—Why Manure Should Not be Exposed.

At the recent meeting of the Ensilage and Economic Stock Feeders' Association of Central Canada, held at Montreal, Prof. Robertson, of the Experimental Farm, expressed pleasure that the commercial interest of the Dominion had at length taken measures to form an association to benefit the farmers.

He referred to some of the discouragements which farmers met with in following the calling, and said that he needed encouragement from the commercial and manufacturing classes, as the prosperity of the whole country was in a great measure dependent upon the prosperity of the farmers.

His remarks, he said, would take the form of an object lesson, showing by means of charts the best system to follow with a view to the economical feeding of cattle, a subject not at all well understood or practised by most farmers.

The chief end sought by farmers was to make money, and this was to be done in three ways: First, by raising and selling good products; secondly, by maintaining and increasing the fertility of the soil; and lastly, by providing remunerative work on the farm during the whole twelve months in the year.

Professor Robertson exhibited a large chart, showing by the length and the color of the lines the amount of each of the three chief ingredients of fertility in the soil—nitrogen, phosphoric acid, and potash.

A farmer who sold off his farm two and a half tons of hay removed as large a quantity of these valuable fertilizers as would be the case if he sold nearly thirty times as much more profitable in the way of retaining the fertility in the soil than hay.

He next exhibited and explained a chart showing the composition of various cattle foods and the percentage of water, albuminoid, fat, and ash contained in them, showing the great advantage of selling cattle and hogs when fat instead of when they are in the condition of stockers and store hogs.

The next chart showed the amount of nitrogenous, carboniferous, and fatty food necessary in the daily ration of the animals per 1,000 pounds live weight.

He here showed the great superiority of corn ensilage as a cheap food for fattening steers, as the cost was less than two-thirds the amount when the food was composed entirely of hay, roots, and grain.

The next chart showed the proportion of digestible, protein carbohydrates, and fat in the corn ensilage food, and here again the others in the measure of digestibility as well as its lower cost.

He showed how green corn too early. There were in an acre of green corn only 1,619 pounds of dry matter at the tasseling time, which afterwards increased to 7,202 pounds when the corn was glazed, and it required no more labor and very little more of the fertility of the soil to produce the 7,202 pounds than the 1,619 pounds.

This showed that cutting corn in the tasseling state was a rather expensive way of fattening cows.

What Farmers Ought to Do. The remedy for the farmer seems to be to reduce the cost of production as much as possible, by striving to produce the greatest amount with the least labor, and to carefully watch the demands of the market for such products as it is not oversupplied with, and learn how to produce them of the best quality at the least cost.

With this, let him abandon the trying to grow such crops as are not adapted to his soil, or as he does not understand the management of, and thus avoid helping to fill the market with the inferior products which must be

rejected.

Proprietor.

A MONTREAL MIRACLE.

AFTER SEVEN YEARS OF HELPLESSNESS HEALTH IS RESTORED.

A Statement of the Remarkable Case of Miss Ramsay as Investigated by a Reporter of Le Monde.

Le Monde, April 1st.

During the past year newspapers in various parts of the country have chronicled accounts of marvellous cures from the use of a medicine known as Dr. Williams' Pink Pills for Pale People.

These remarkable cures, many of them in cases hitherto held by medical science to be incurable, were known as the Hamilton miracle, the Cape Breton miracle, the Detroit miracle, the Saratoga Co. miracle, etc., and were vouched for by such leading newspapers as the Toronto Globe, the Montreal Herald, the Hamilton Spectator, the Halifax Herald, and others.

Journal and others, whose high standing left no room to doubt that the facts were as stated.

And now Le Monde, in a position to add another laurel to the renown achieved by Dr. Williams' Pink Pills, by giving the facts of a case, certainly a remarkable one, which cannot fail to interest Montrealers inasmuch as it is not only local, but gives the cure of a young lady well known and esteemed in the district in which she resides.

The young lady who owes her restoration to health and strength is Miss Ramsay, daughter of Mr. John Ramsay, the well-known manufacturer of agate, and one of Montreal's most esteemed citizens, who does business at 206 St. James-st., and resides at 14 Curost-st.

Some of the facts of this remarkable case are given in the following: Miss Ramsay, a reporter of this paper was detailed to make an investigation, and in the interest of other sufferers, lay an accurate statement of her case, and of the results of the treatment.

Both Mr. Ramsay and his daughter were found to be enthusiastic in their praises of Dr. Williams' Pink Pills, and from the story told the reporter they had excellent reasons for their enthusiasm.

At the age of 14, said Mr. Ramsay, my daughter was attacked by chorea, more commonly known as St. Vitus' Dance. It was a nervous system which may result from feebleness of constitution, overstudy, or from a shock or fright, leaving in the patient a morbid condition, the control of the limbs being lost.

The trouble was brought on through a fright she received at a fire which occurred in our neighborhood. That was more than seven years ago, and those seven years have been filled with untold misery to my daughter. Her trouble was in the form of a tremor, and she was unable to walk, and she was unable to do anything but lie in bed.

Her mother, who was a physician, tried to do a great deal of good at once, but never did anything. Life is made up of little things. It is but once in an age that occasion is offered for a great deed. True greatness consists in being great in little things. How are railroads built? By one shovelful of dirt after another; one shovelful at a time. Thus, drops made the ocean. Hence we should be willing to do a little good at a time, and "wait to do a great deal of good at once."

It would do much good in the world if we must be willing to do good in little things, little acts one after another; speaking a word here, giving a tract there, and setting a good example at all times; we must do the first good thing we can, and then the next, and the next, and so keep on doing. This is the way to accomplish anything. Thus only shall we do all the good in our power.

THE SECRET OF TRUE HAPPINESS. Gradually, thinking on from point to point, we shall come to perceive that all true happiness and nobleness are near us, and yet neglected by us, and that till we have learned how to be happy and noble we have nothing to tell, even to red Indians. The delights of horse-racing and hunting, of assemblies in the night instead of the day, of costly and wasteful music, of costly and burdensome dress, of charged contention for place, or wealth, or the eyes of the multitude, and all the endless occupation without purpose, and idleness without rest, of our vulgar world, are

not, it seems to me, enjoyments we need be ambitious to communicate. And all the real and wholesome enjoyments possible to man have been just as possible to him, since first he was made of the earth as they are now; and they are possible to him eternally in peace.

To watch the corn grow and the blossoms set, to draw breath from flowers, to see the sun, to walk, to think, to love, to hope, to pray—these are the things that make men happy; they have always had the power of doing these, they never will have power to do more. The world's prosperity or adversity depends upon our knowing and teaching these few things; but upon iron, or glass, or electricity, or steam, in no wise. And I am utopian and enthusiastic enough to believe that the time will come when the world will discover this. It has now made its experiments in every possible direction but the right one; and it seems that it must, last, try the right one in a mathematical necessity.—John Ruskin.

IN MEMORIAM. Written in memory of my dear father, who departed this life in sweet peace, March 7th, 1892.

A faithful follower of our God Now rests in peace beneath the sod; His labor, pain and toil is o'er. The throbbing heart doth beat no more.

An earnest, well-spent life was his. Trusting in all the promises; The word of God his daily guide, By it he lived, in faith he died.

The memory of the just are blest, Their works do follow while they rest. The influence of a life spent well, Eternally shall hold.

May all who now his loss deplore, Prepare to meet their friend On Canaan's bright and peaceful shore. Where all their griefs shall end.

And when we fight have ended, And have laid the weapons down, We'll meet father by the river, And we, too, shall have a crown.

And let us strive to meet him, Who for us long hath prayed; Then when Jesus comes to call us home, We need not be afraid.

R. H.

VARIETIES. Startling figures—Ghosts.

For several years I was persistently annoyed with an excessive accumulation of Dandruff and although using various preparations recommended by material relief was realized until my attention was called to Anti-Dandruff, which has produced unlooked-for results in my case. Applications removing every particle of Dandruff, and as a specific for this trouble it certainly has no equal. Yours truly, W. T. ROBINSON, 1702 St. Can. Pac. Ry. Telegraph Co., Montreal, P. Q.

A Judge has a trying position. If you are ill, use Dr. Carson's Stomach Bitters. If you are depressed, use Dr. Carson's Stomach Bitters. If you have indigestion, use Dr. Carson's Stomach Bitters. Large bottles at 50 cents—7-12.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

For God, and Home, and Native Land. DO GOOD NOW.

Dr. Johnson wisely said: "He who waits to do a great deal of good at once will never do anything." Life is made up of little things. It is but once in an age that occasion is offered for a great deed. True greatness consists in being great in little things. How are railroads built? By one shovelful of dirt after another; one shovelful at a time. Thus, drops made the ocean. Hence we should be willing to do a little good at a time, and "wait to do a great deal of good at once."

COLLINS, Sec. General. Telephone No. 265. This is the only office that settles accounts and advances the money to the creditor if desired. O. B. COLLINS, Manager. Sept. 10th, 1892—16-17.

DUNN'S BAKING POWDER. THE COOK'S BEST FRIEND.

sold at unremunerative prices. Let him diversify his crops more by striving to produce as much as possible of that which he will need for home consumption, and if a favorable season gives a surplus, to sell, look upon that as profit, no matter how small the price at which he sells. That which he grows himself and uses in his own family will be just as profitable at a low price as if it could have been sold for twice as much.—Colman's Rural World.

Manure Should Not be Exposed. Manure of all kinds does better service when not exposed. It should be properly sheltered until used. For an experiment, two acres were manured with dressing from a barn-yard which had been exposed to the weather, and another two acres alongside with dressing which had been sheltered from the weather. The same quantity of manure was applied to each piece of land and the whole planted in potatoes. The yield on the part dressed with sheltered manure was nearly twice as large as that on the part dressed with the manure which had been exposed in the yard. This difference did not cease with the crops the first year. The following year the whole was sown to wheat, and the land which had been dressed with sheltered manure produced a much larger yield than the other part.—Farm and Home.

Neglect of the Orchard. Nothing is starved and abused like the apple tree. Forgotten till fruiting time, the land where it stands is stripped of two crops of hay and then pastured. If the fruit is not abundant and fair the owner denounces "the whole orchard business," (just as if they had paid it some attention), and determines to neglect it more than ever. He forgets to reason that anything else so neglected would not make half the returns he gets from the apples. In the interest of common sense, if one cannot devote time in summer for feeding and cultivating this most regular fruit, let him at least set the men to covering the ground with manure before the busy season begins.—Farm Journal.

Poultry Briefs. Properly fed a duck at nine or ten weeks old should weigh four pounds, a chicken two pounds.

The early chicken is the largest and strongest, and will never be overtaken by the ones that are hatched out late; push the early hatching.

THE WEAK SPOT. Requires Care and Attention.

With thousands of men and women, boys and girls, the throat seems to be the weak spot. Many leaving a warm room and going outside for a short time, take a sore throat; and very often hoarseness and coughing follow.

People who are subject to sore throat, hoarseness and bronchial troubles, should exercise the greatest care, and take prompt and effective means to overcome these difficulties.

Numerous remedies have been placed before the public for the cure of colds and pulmonary affections, but experience has proved that they are almost worthless. Many of these preparations are positively dangerous; and many people have ruined health and voice by their use.

Canadians are fortunate in having placed before them for use the grandest remedy of the age Harvard Bronchial Syrup, a preparation emanating from old Harvard University. Its results in even Harvard cases of sore throat, hacking cough, irritated and ulcerated throat, are most wonderful, and far surpass the most obstinate cases of any ordinary case, and will at once rid the sufferer of pain and trouble.

Our best physicians strongly recommend its use; singers, elocutionists and public speakers always keep it near them for use when the throat is dry and inflamed and the voice husky. Try it and you will use no other.

Stallion Route Bills.

HORSEMEN.

Stallion Route Bills and Cards for the Season of 1892.

THE POST JOB DEPARTMENT has the Largest Selection of Cuts to be found in the Midland Counties. Many of these Cuts were specially engraved by noted Chicago artists, and represents the purest type of the Pedigreed Animal.

Special arrangements have been made to turn out work with all possible despatch, and Horsemen who leave their Orders with us will receive all-round satisfaction. Good heavy bodied paper used and prices right. Leave your order at THE POST.
