-Rev. Mr. Shorey gave two excellent discourses yesterday in the Cambridge-st. Methodist church, to very large congregations, both morning and evening. In the morning his lesson was from the 12th chapter of Romans, 9th verse, of which chapter he took the following text: "Abhor that which is evil, cleave to that which is good." He said that those words represented the two halves of principle; that if a man had an abhorrence for dishonesty he must necessarily have great respect for honesty, and that very few people measured up to this. We must have a very quick, keen perception to be able to detect evil and to avoid it. The safety of the community depends on the abhorrence and repulsion which people have for evil, and In the evening his lesson was the story of the return of the Prodigal Son to his ing the son asking the father for his porparental restraint; how he went in for a fine time, and after he he had wested his such a fool of himself. Continuing, he asked the question: "When is a man really himself, and what makes man superior to all other animals?" He answered the question by three reasons : 1st, his great mental faculties; 2nd, his sense of morality; and 3rd, his spiritual nature; and said that no man was true to himself or his Maker if he did not recognize and anhere to these points, -that though engrossed in business matters pertaining to this life he should still have time to develop and appreciate his moral and spiritual na-ture. In closing he said that any man away from God was not his true self, and did not value his manhood as God intended he should. When a man really came to himself, he came to his father-to God,
