BOBCA YGEON. DEER. -Mr. Garner Nicholls was much surprised, on Monday afternoon, whilst paddling in Pigeon Lake, to find two bucks swimming across the lake. They were not very far off when he noticed them, and easily caught up to them. The one was a fine large one, and the other a youngster, a yearing. The latter was not afraid of the cauce, and took quite kindly to patting on the neck. The elder was not so tame, and kept pegging away, as hard as he could go. They had evidently taken the water somewhere about Stoney Point, east of Green Bay, and were making for the Big Island, a tidy swim in cold water. Nicholls being a deputy warden, under the game act, and protector of the deer, saw them safely land on the island. 'They we e rather weak on their pins and a trifle groggy on landing, but soon recovered, and scampered away, apparently none the worse for their long swim.

A VICIOUS BRUTE.-Mr. John Clark, who has had charge of the stallion, Rob the Ranter, Jr., since he attacked two men during the summer of 1891, has at last fallen a victim to misplaced confidence, as everybody but himself felt sure he would, sooner or later. On Friday last, in Somer ville, while he was talking to Mr. William Mitchell, the vicious brute suddenly seized him by his left arm, fell upon his knees and commenced to push his victim along the ground before him. Mr. Clark called out to Mr. Mitchell to help him for God's sake. as the horse was eating him; and Mr. Mitchell, having no other weapon, pulled out one of the boards that serve in lieu of a gate, and holding it firmly in both hands and pointing one end at the horse's head ran at him with all his might. The board fortunately struck the jugular vein and the blow was so severe that the animal instantly released his groom and for several seconds appeared unable to regain his feet. Dr. Wilson, who was sent for to attend to Mr. Clark, says that his arm was terribly swollen and discolored, though the horse's teeth had only made one

Dr. Hammond says that when you, poke the end of your finger in your ear the roaring noise you hear is the sound of the circulation in your finger, which is a fact, as anyone can demonstrate for himself by first putting his fingers in his ears, and then stopping them up with other substance. Try it, and think what a wonder of a machine your body is, that even the points of your fingers are such busy workshops that they roar like a small Niagara. The roaring is probably more than the noise of the circulation of the blood. It is the voice of all the vital processes together—the tearing down and processes together — the tearing down and building up processes that are always going forward in every living body, from conception

LINDSAY, FRIDAY, MAY 19, 1893 A MONTREAL MIRACLE. FACTS PROVEN TO BE STRAN-GER THAN FICTION. The Remarkable Cure of a Long-Time Sufferer-Eheumatism of Ten Years

Sunday Morning News, Monnreal. Impressed with the persistency with which the most astonishing accounts of cures effected through the agency of Dr. Williams' Pink Pills for Pale People in almost all the newspapers of Canada and the United States, a reporter for The Sunday Morning News, to satisfy himself generally of the genuineness of these cures, determined to investigate a case for himself, which had recently been brought to his notice, where the cure was claimed to be entirely to the efficacy of this medicine. Aware that Dr. Williams' Pink Pills had been tried in the case of a gentleman residing at 709 Sherbrooke

street, in the city of Montreal, who had for years been afflicted periodically with rheumatism, the reporter set out on a journey of inquiry to ascertain what the result had been. Arriving at the home of Mr. Granville, the gentleman referred to, he found him apparently enjoying perfect health. "You don't look as though you had been suffering a great deal lately, Mr.

Granville, said the reporter, accepting the invitation of his host to be seated. "Well, no, you would scarcely suppose from my present appearance and activity that I had just recovered from a mos acute attack of chronic rheumatism which kept me in bed for over two weeks. You see," continued Mr. Granville, "1 am an habitual sufferer from rheumatism or at least I have been for ten years past and although I have tried almost ever remedy it has only been since recently that I have found anything to do me good It is now about ten years since I firs became afflicted with this painful disease and when it began to come on, having never experienced it before, I was at complete loss to understand what it was It was in Chicago that I had my fire attack, and I remember the circumstance very well.
