Scott's Emulsion.

If you want to preserve apples, don't cause a break in the skin. The germs of decay thrive rapidly there. So the germs of consumption find good soil for work when the lining of the throat and lungs is bruised, made raw, or injured by colds and coughs. Scott's Emulsion, with hypophosphites, will

heal inflamed mucus membranes. The time to take it is before serious damage has been done. A 50-cent bottle is enough for an ordinary cold.

The Opposition, he said, had at the session, prevented this steal, but now, he said, there was another loop hole by which the Government might effect this steal. Belleville, May 25 .- A meeting of the Reformers of East Hastings was held at Canifton this afternoon and was fairly attended. Mr. J. K. McCargar, president, occupied the chair. Mr. J. A. Barron, ex-M.P., organizer, was present and gave a short address. Two weeks ago a similar meeting was held and the nomination was tendered to Mr. R. C. Clute, Q.C., who declined. His resignation was accepted at this afternoon's meeting. The following gentlemen were nominated: Messrs. W. A. Aylesworth, J. Ross, J. M. Hurley, C. D. Macaulay, M. Wright, J. G. Frost, J. A. Barron, ex-M.P., J. V. McCargar, Dr. Faulkner, N. Vermilyea, W. C. Farley, Thomas Deacy, J. Dal-C. E. Lyons and J. W. McCammon. All retired in famor of Mr. Hurley, who was tendered the unanimous nomination. He would not, however, consent to be the candidate at present and was given until Friday next, when another meeting will be held and Mr. Hurley's decision received.

THE MAIL'S WHEELABOUT. Its Opinions in 1892 and Now-General

News of the Campaign Here are a few more extracts from The Mail, showing the opinions it formerly held with respect to the coercion

Mail, 15th Aug., 1892: "The decision of our Highest Court of Appeal makes for the cause of liberty and progress in Manitoba and it will strengthen the hands of those who are endeavoring to prevent the planting of a system of education, the fruits of which are disunion and prejudice. But it also reminds us of what are the essential British views with regard to education, viz., that it shall be unsectarian and such as all may participate in without distinction of creed. It would be well for those who are waving the old flag and glorifying the British connection to remember that the waving can be most consistently done by those who are at any rate not flagrantly out of harmony with British opinion and British methods."

"ILL-ADVISED FEDERAL INTIMI-DATION." Mail, 30th Nov., 1892: "That the first public act performed by Sir John Thompson after the announcement of his elevation to the Premiership should have been the hearing of the preliminary argument in behalf of Separate schools for Manitoba, is in some quarters regarded as ominous. . . What Manitoba would do were Sir John Thompson to attempt to restrict the rights to which the Judicial Committee has certified the leaders of opinion there alone show. But the general belief is that very active opposition will meet ill-advised Federal intervention. If Sir John desires to strain the

bonds which hold the Dominion together and to wreck the party he leads he cannot do better than attempt .to strangle the Manitobans." PRAISE FOR GREENWAY.

Mail, July 22, 1892: "The genius of Manitoba is for advancement. This was made apparent early in the history of the province, when the effort to fasten a privileged class upon the people was defeated by the prompt abolition of the Local Senate. From time to time the excrescences of government have been removed, until the province is now set up in business on an entirely modern footing. There can be no question that the Greenway Government has contributed largely to the favorable condition of affairs, in view of which the victory of Saturday is but an act of justice.

WE CANNOT CHECK MANITOBA. Mail, Feb. 19, 1890: "We cannot check Manitoba. We cannot bind those people by the wretched compromises in vogue in these older provinces. We cannot with safety invade the domain of their local self-government or expect them to submit to clerical rule, against their sense of what is due to their own interests."

MORE ADVICE FOR OTTAWA Mail, Aug. 4, 1892: "Our Federal politicians may as well face the issue straight. They are called upon to reestablish for Maritoba the school system the Manitobans have constitutionally rejected. It is idle in the presence of this demand to talk of a settled issue or calmer counsels. If these gentlemen wish for a quiet settlement let them urge Quebec to give us peace. If they want calmer counsels, let them tell their French friends to be mod.

London, May 20 .- A despatch from Sir Hercules Robinson, Governor of the Cape Colony, has been received by the Government, in which it is announced that the Transvaal authorities have reached a decision in the case of 50 of the members of the Reform Union, who were recently convicted in connection with the conspiracy against the South African Republic and were sentenced to imprisonment, fine and banishment. A number of these prisoners will be released immediately, and others will be given their freedom at the expiration of their three months, while a part of those still remaining in custody will be allowed to renew their requests for a cancellation of their sentences after five months shall have elapsed, and four of the condemned men will be given the same privilege at the end of a year from the date of the sentences. That portion of the judgment of the court imposing a fine upon the convicted men will stand, but the banishment clause will be suspended, provided the prisoners give their word of honor not to interfere in future in the politics of the republic. Among the 18 who are to serve five months before being allowed to renew their requests for their release, are the Americans V.B. Clement and J. S. Leonard. The four who are to serve a year include Hamilton and S. W. Jameson, brother of Dr. Jameson. Moscow, May 21.-To-day took place the great triumphal entry of the Emperor anr Empress into Moscow. In order to see the imposing spectacle, thousands of restless and anxious sightseers thronged the streets all Every class of costume was visible

among the crowds, and anyone skilled in the characteristics of Russian peasantry could have readily indicated from what part of the empire different groups of spectators had come. No traffic was allowed on the line of the procession after 3 o'clock this morning, and at an early hour, troops were marched to thickly line both sides of the roadway over the entire route. By far the most picturesque effect was afforded by the groups of golden-robed priests, bearing sacred ikons, and surrounded by acolytes, with smoking censors, standing in front of their churches, waiting the coming of the Emperor, who was expected to stop at each group and venerate the relics; salutations of peace being given to

him by the head priest of each party of ecclesiastics. At 2.30 o'clock the canonn boomed, followed by eight other shots. This was the signal for every bell in Moscow to peal forth. The Emperor had left the palace, and the procession had started. It was

probably the most gorgeous scene that Moscow ever beheld. Preceded by the Imperial Grand Marshal, Count Pahlen, and two squadrons of cuirasseers with eagle-crested helmets, the Emperor himself appeared dressed in full general's uniform of the Preobajensky Regiment of Guards. The Emperor, who looked very well, constantly bowed his salutations to the cheering multitudes, who, upon the first sight of His Majesty, raised the shout peculiar to the Russians, which is a prolonged roar. This was taken up on all sides and swelled into a perfect hurricane of sound.

The Czar rode a pure white horse, and was immediately followed by var:ous male members of the Russian Imperial family, foreign sovereigns, or their representatives, ministers of Household, the Minister of War, and the gentrals and officer sof the suite, a gorgeous throng in glittering uni-forms. Behind them came the gen-

It makes pure, rich, red blood, and from this comes nerve,

mental, bodily and digestive strength. "I am glad to say that Hood's Sarsaparilla is a very good medicine, especially as a blood purifier. It has done me good many times. For several years I suffered greatly with pains of

I took many remedies, but found help only in Hood's Sarsaparilla which cured me of rheumatism, neuralgia and headache. Hood's Sarsaparilla has proved itself a true friend. I also take Hood's Pills to keep my bowels regular, and like the pills very much." ISAAC LEWIS, Sabina, Ohio.

TESLA HAS TRIUMPHED.

His Light is Perfected - The Human Heart Photographed Accurately-Lung Defects Discovered

New York, May 21.-Nikola Tesla has solved the problem which he set before himself many years ago, and which may revolutionize the system of electric lighting. It is, electrical experts say, the nearest perfect adaptation of the great force of nature to the In Mr. Fesla's laboratory, in Hous-

ton-street, is a bulb not more than three inches in length, which, when the current turns into it becomes a ball of light. The heat is almost imperceptible. With it a very large room is so lighted that it is possible to read in any corenr. Yet this is done without the attachments necessary in exist-The rays are so strong that

sharpest photographs may be taken by them. No new dynamo is required to produce the current. The bulb is attached to a wire connected with the street current. There is no danger of harmful shock in its use. Mr. Tesla has been working for

many years on his theory of the necessity and the practicability of the conservation of electrical energy. The present incandescent light gives only three per cent. of illuminating power. The other ninety-seven per cent. is wasted in heat.

The bulb which he has perfected gives ten per cent, of light and loses ninety per cent. of energy. Mr. Tesla declares that he will, with the aid of a few more expriments, be able to produce forty per cent. of light, so that the waste will be reduced to only sixty per cent., or thirty-seven per cent.

less than at present. The principal of light is vibration. The illumination is secured by means of what Mr. Tesla terms a vibrating needle within a vacum. The needle vibrates so rapidly that the figures per second sound imaginary, but it is this intensity of energy which gives the light its brilliancy and its apparent steadiness. The lights do not have to be renewed.

Friends who recently visited Mr. Tesla saw him photographed by means of his light. The exposure was but two seconds in the light of a single vacuum tube or bulb, without electrodes, having a volume of about ninety cubic inches. The light given was approximately 250 candle power. The photograph was as sharp in outlines as though it were taken in full sunlight Mr. Tesla has recently obtained many photographs in his study of the Roentgen ray. He has photographed the heart of one of his assistants so accurately as to note its expansions and its contractions, and he has also been able to locate defects in the lungs of several persons, the presence of ubercles being very evident. The announcement of Mr. Tesla's

discoveries created a genuine sensation at the Electrical Show last night and was the topic of conversation among the experts in the application of power.

BREAKFAST - SUPPER. " Dy a thorough knowledge of the natura saws which overn the operations of digestion and nutrition, and by a careful application of the fine properties of wellselected Cocoa, Mr. Epps has provided for our breekfast and supper a delicately flavored beverage which may save us many heavy doctors bills. It is by the udicious use of such articles of diet that a constitution may be gradually built up until strong evough to resist every tendency to disease. Hundreds of subtle maladies are floating around to ready to attack wherever there is a weak point. We may eac -pe many a fatal shaft by keeping ourselves well fortified with oure blood and a properly nour shed trame." Cited Made simply with boiling water or malk. Sold only Service Gazette.
