For about ten or twelve years I have been troubled with scrofula. My head was always sore, my face was dry and scaly, and burned like fire most of the time. My body had big red spots on it, and I did not know what to do. I went to four different doctors and they helped me at first. In the fall I got worse again; then I tried other remedies, but they did me remedies, but they did me no good. I was ashamed to go into public. I was a sight to lookint. In my arms-in my time, when we are as children tossed to haps, inspire you with a little compassion for the guilty but wretched and despairing son who is suffering cruelly from the wrong that he has done you, and who bids you farewell forever.

"CAMILLE SAUVALLIER" The father of this young man, who had been a widower for several years, was one of the most esteemed iron founders of Paris, a judge of the Tribunal of Commerce and officer of the Legion of Honor.

He has two sons, Camille, the lieutenant, and Auguste, a painter of considerable originality, married to a charming wife, and father of a little girl of six years named Andrea. He had turned their attention from

every commercial enterprise, fearing their inexperience and dreading for them the hazards of business. He even insisted that after his death the foundry should be discontinued and not sold, in order that it might not pass into undesirable hands and with the hope of preserving the name of the Sauvaltiers unsullied

Notwithstanding all his precautions, calamity greater than any he could have anticipated had now befallen him.

Confused by the appalling intelligence, he was obliged to read over the letter the second time to assure himself that he wa not dreaming. It was indeed true. Camille had ruined, perhaps dishonored him. The objects which surrounded him seemed no longer the same. He arose painfully, as if crushed by too heavy a weight, with body and soul disordered by the shock, but fell back in his armchair, and tears coursed down his cheeks.

The sum was due next day. It mus be procured at any sacrifice. The task would be difficult. His fortune was com posed of material and merchandise. Could the n cessary funds be realized promptly on such property? And, even if the debt were paid, could he hope to meet his personal engagements and avoid mercantile failure for himself? What! the failure of Sauvallier, officer of the Legion of Honor, a judge of the tribunal of Commarce! Never. He would commit suicide first.

But he would make every effort. He

The months rolled by; then a year, and still another. The foundry at Grenelle was raging and fuming with the intensity crying: of its efforts. It never rested. Conscious. also, of its duty, it put forth all its powers. Its furnaces gleamed in the shade of their hasn't she?" inclosures like the burning eyes of a fiery monster. Its powerful blast shook the neighborhood. The glowing liquid metal flowed from its receptacles as blood from the body, and during the whole night a brilliant illumination from above gave light to the busy workers.

The campaign af Tonquin was at it height. Our troops were struggling against a foe constantly eluding attack, but ever emerging from unexpected places, in an nnknown country bristling with difficulties beyond computation. The least success roused the popular patriotism. Operations had long continued and decisive victory was awaited with impatience.

One morning Auguste, quite pale, entered his father's office, and handed him newspaper. Under the latest, M. Sauvallier read the following dispatch:

"INTRENCHED CAMP OF DONG SONG. "12th February, 1865.

"This morning Captain Sauvallier attacked the enemy with extreme vigor, fought the whole day against large masses, and took successively four redoubts. After the most valiant struggles his soldiers, overpowered by mumbers, broke their ranks. Although severely wounded in the head, and his thigh pierced by a ball, he caused himself to be borne on the shoulders of two men, rallied his company, the chimney sweep, and the second Admirable heroism!
