 Several of the residents of Bond-st. have made a marked improvement in front of their premises by grading up the road. If the town would treat other streets in a similar manner the roads would be more easily kept in good condition.

**Local Notes.**  
 The streets of our town are taking on quite an aristocratic appearance. Street-cleaning is pushing the work of constructing the new sidewalks rapidly, and before long Lindsay will be able to boast of as good a system of walks as any town in the province.

**Local Notes.**  
 A great many of the residents are taking advantage of the waterworks company's new regulation, and are laying connections put into their premises. The low rate charged by the company for a house or lawn service should enable almost every household to have a beautiful supply of water. What looks nice on a green, well-kept lawn!

**Local Notes.**  
 Mr. R. J. Matchett, the G. T. R. up-town agent, has placed on our desk a very complete pamphlet containing 160 pages of information, giving fares and routes for summer travel; also two very concise maps showing places of interest covered and touched by the company's lines. Mr. Matchett will be pleased to furnish information to those who contemplate taking a holiday trip.

 Several representatives of the "tough" element were surprised by the police Monday evening last while engaged in a rough-and-tumble fight near Sinclair's carriage shop. They were loath to contribute \$5 and costs each next morning, but rather than become "Wardens" they fled at the stone pile in this sultry weather they managed to scrape together the sum named.

 Mr. Jas. Cain, hog buyer for Mr. Matthews, hipped on Monday last two car loads of hogs to the Peterboro packing house, and on Tuesday, from Marlboro station, two car loads were shipped to the same place, also by Mr. Cain. The prices paid for hogs at present are as follows:—Hogs weighing from 150 to 300 pounds, \$1.50 per hundred; heavy hogs weighing from 300 to 400 pounds, \$1.60 per hundred.

**Local Notes.**  
 One day last week Mr. Sam. Ferguson, who is employed in Sylvester Bros. factory, met with a very painful and rather unusual mishap. He had been engaged in cleaning out the box of one of the machines, and as a result his hand was covered with oil and shreds of cotton waste. The concluding act in the process consisted in pouring some benzine into the box, and setting fire to it in order to consume the dirt that still adhered. Mr. Ferguson had no sooner applied the match than his hand had become wrapped in flames, the oil and waste burning fiercely for a few seconds, and blistering the flesh as far as the wrist. Next day the hand was obliged to give up work. Pumps, and the use of good quality, a steady, dusty look which repels all people of taste. They are either rubber, and then you are suffocated with your own vapors, or the chemical process used in the manufacture of water-proof goods are absolutely waterproofed. An Ideal Show. The Cook & Whitty circus and menagerie, in its management, its fidelity to word of promise, its magnificence, grandeur and completeness, is the ideal of perfection. Its street parade is a glittering success from front chariot to rear carriage. Its menagerie contains a goodly collection of the animals of the forest, from the mammoth 5,000 elephant to the tiny monkey. Its ring performance were novel, novel and rare. The chariot races, English riding, camel races, etc., were such as are seldom witnessed under canvas.—12-2.

Church Notes. Mr. C. K. Cahoon will, in the absence of the pastor, Rev. R. Johnston, conduct the services in the Presbyterian church next Sabbath morning. Mr. W. J. King will have charge of the evening service.

Next Sunday Rev. Mr. Hill will occupy the pulpit of the Queen's Methodist church in Toronto on Friday evening last week. Over 300 wheelmen were in line. Fifty lady riders headed the procession through the principal streets.

It is said that a young man entered Riggs' store the other night and surprised the proprietor by announcing that he wished to buy a bicycle on the "installment plan." He was likely an acquaintance of the man who said "Them rheumatic tires are great things."

The quadruplet race at Rochester last week was the first of its kind on the track. The four-seated machine has been used for pace-making only. An indication of its great speed is the fact that in the Rochester race the last half-mile was covered by the winning team in 56 seconds.

A surprising amount of interest was manifested by citizens of the community in the great relay ride of the bicyclists from Sarnia to Montreal on Friday and Saturday last week. The distance of 351 miles of road was covered by 110 relays of swift riders in 33 hours, 26 minutes 38 seconds—four hours nine minutes less than the time figured on by the bicyclists themselves. A speed of over 16 miles per hour was maintained over the entire distance.

At the Methodist conference in Toronto last week Sunday bicycling came in for a good deal of discussion. Rev. M. L. Pearson, of Bradford, formerly a member of the committee, spoke in favor of the bicycle, and said that many ministers used the "silent steed" on the Sabbath. Another rev. gentleman referred to the fact that outside of some of the large churches as many as 50 private carriages could be counted during the service, the driver of each being thus prevented from attending the service, which was infinitely worse than using the bicycle.

The long looked for application of aluminum in bicycle-making is now an assured fact. A St. Louis manufacturer concerns holds a patent on a new process of aluminum, making it possible, it is said, to give from two to three times the strength, weight for weight, to be found in the common steel bicycle frame. An experimental test was recently conducted in Washington, University, St. Louis, in which a bicycle frame made of aluminum was subjected to a pressure of 1,000 lbs. It required 2,750 pounds to break the bicycle frame.
