WINTER IN PARIS.

MR. G. T. FULFORD'S RETURN FROM THE WORLD'S GAY-EST CITY.

A Recorder Reporter's Interesting Interview With Rim-Some Statistics and Information of General Value. From the Brockville Recorder, June 17th.

Mr. G. T. Fulford, who is understood to have been doing big things in Paris during the past winter and spring, introducing Dr. Williams' Pink Pills, reached home on Friday last with his family. Mr. Fulford has taken Mrs. Field's handsome residence in the east end for the summer, and was found there on the evening of his arrival by a Recorder reporter, and asked to give an account of himself.

"Well," he said, in reply to a question on the status of the Pink Pill business in France, "of course it isn't altogether an easy matter to introduce a foreign article | nize them as first-rank men, men whose into a strange market, especially where there is as much conservatism as there. But I don't think we can complain of the | Paris last winter I placed my formula and progress made, on the whole, and it is gratifying to report that some, at least, of | of the most noted doctors in that city for the Paris doctors are open to recognize a medicine of which the intrinsic merits can a view to getting suggestions for improvebe demonstrated to them. One of the best of them-at Versailles, the Paris suburb where the Emperors used to keep their. You now have a parfect blood and nerve court-has given favorable testimony through the press of quite wonderful cures through the use of Pink Pills in his practice; and the Religiouses, and order of Nuns like the Sister of Charity, have also made an extensive use of Pink Pills in their charitable work, and given strong testimonials as to their good effects."

"How do you find business all round?" "Pretty good. We have sold in the past twelve months a little over two million of Pink Pills."

"That is a pretty large order, isn't it?" "It is the best twelve month's business yet. Look for a minute at what the figures mean. If all the pills were turned out into a heap, and a person set to count them, working ten hours a day, and six days a week, the job would take-I have reckoned it-4 years, 21 days, 6 hours and 40 minutes, counting at the rate of 100 a minute. Or reckoning it another way, it means about a hundred and fifty-seven pills for each minute of the twelve months one day." occupied in selling them. Or, if you want further statistics, it is somewhere about two pills a head for the combined adult population of Canada, Great Britain, Ireland, and the United States. If the pills sold last year were made up into neck laces of fifteen inches long, there would be a necklace for every woman in Canada, and leave some considerable pills over. And very pretty necklaces they would make, if you stop to think of it," said Mr. Fulford, with the air of one who contemplates an artistic triumph in the jewellery line. The reporter stopped to think of it, while Mr. Fulford added, "I don't give these figures to glorify the business, you will understand, but to enable you to make the facts tangible to an ordinary reader. "Does Great Britain do its share in the

business?' asked the reporter. "Yes, I think we have had a record there. The head of a leading advertising agency in London to whom I showed my figures told me that no business of the kind had ever reached the same dimenslons in England in as short a time; for though we have only been working in England two years, there are but two meditines there that have as large a sale as Pink Pills, and one of these is over thirty years old, while the other has been at work at least half that time."

"How do you account for the way Pink Pills have 'jumped' the English market, "I cannot attribute it in reasonable logic

to anything but the merits of the pills. For, consider, in France, which I have just been opening up, it cost in advertising somewhers between thirty-five and forty francs to sell every 3 franc box of pillsfirst sales that is. Now, it is obvious that all our sales were first sales, that is sales direct from the advertisements, we should be losing from six to ten dollars on every box sold. It is because the people who have used Pink Pills once use them again, and recommend them to others, that we is the same the world over."

"But your advertising has been very ex-

bankrupt in a very short time. All the undoubtedly be the most popular holiday for interior economy, steadiness and dicissame, the advertising is a big item, and I outing of the year. Numerous new and pline. "Through the press. The newspaper | nent.

press is the greatest educative influence of the day. Where do you suppose the culture of Brockville would be without the Recorder? Now, it's not the two cents a copy that pays for all the interesting and valuable matter that is gathered from the ends of the earth in a newspaper; it is the advertisements that pay the biggest part of the bill for news and literary matter. I suppose I have spent about half a million dollars in advertising last year. How much education do you suppose that sum

has paid for?" The reporter was silent in the presence of this educative "miracle," but required further information as to the state of trade. Was everything lovely, he asked, or were there any crumpled rose-leaves in the

"Can't grumble, except in one way. There's a certain amount of substitution in some retail stores, and there is a man in Manchester, England, that I have had to prosecute on the criminal charge for it." they duplicate your formula under some

other name?" did, he couldn't prepare them in small so many years, and at last a couple of them

spent a share of it for nothing."

it was imperative that I should have the were in the right block. best tonic pill that could be gotten up. Consequently I obtained the advice and in Montreal and New York-and expert advice of that sort comes high. I made the changes in my formula suggested by these medical scientists, and the favor with which the public has received the medicine, demonstrates that it is the most perfect blood builder and nerve tonic known. However, I was anxious to still farther improve the formula, if that could be done, and have since spent a great deal of money with that end in view. On going to London, two years ago, to place Pink Pills, I went into it again, with the best medical men there, and, as you know, the medical expert is not too friendly to proprietary medicines, and least of all to a good one; and I don't blame the doctors either. It isn't good for business if a man can get for fifty cents medicine that will do him more good than \$50 in doctoring. Consequently advice came high, but I ob tained the best there is, not only on this continent but in London and Paris. If were to tell you whom I consulted-but that was an honorable condition that I

shouldn't divulge the names on account of professional etiquette-you would recognames are famous all the world over, and talked of by every one. When I went to a supply of Pink Pills in the hands of one a three months' trial in his practice, with ment; at the end of that time his answer was "leave it alone, it cannot be bettered. medicine." This opinion cost me 10,000 francs, but I consider it money well spent, as it determines the fact that the formula for Pink Pills is now as perfect as medical science can make it. And coming back to the question of substitutions and imitations; what I have just told you will show what a poor thing it is for a man who goes to a store for Pink Pills to let something else be pushed on to him in place of them -more especially if it is a worn out thing three hundred and sixty thousand boxes like Blaud's pills-a formula in the French pharmacopæla, that has been a back number for years until a few store-keepers tried to push it on the strength of Pink Pill advertising. You can take it from me that a store-keeper who tells anyone that Blaud's pill (which is not a proprietary at al!, anyone can make it that wants to) is any way a substitute for Pink Pills is an ignoramus and never ought to be trusted ceiling. All orders filled there are shipped to sell medicine at all. A druggist as ignorant as that certainly isn't fit to put up

> At this juncture the Island City band put in an appearance to serenade Mr. Fulford's family, and the reporter drifted out do its work admirably. among the crowd that had followed to isten to the sweet strains of their music.

a prescription, and will poison someone

## Kicked by a Horae.

Friday afternoon a rather serious accident happened Mr. John Richards, stableman at the Central hotel. Mr. Richards was standing in the stable directly behind a horse (entire), when he received kick between the shoulder blades. Dr. Jeffers was called in and dressed the wound, when it was happily found that there were no bones broken. Although resting easily this morning the young man is suffering from concussion of the spine, which will confine him to the house for

## HFRF ARF DOGTORS

That there is a kind of Tea inebriation—that there are people who indulge in tea drinking to the same extent as some people gratify their taste for alcoholic stimulants, and that the effects on the constitution are equally marked.

The theory may be all right, but it's a deep question, and we prefer to leave it for others to wrestle with. We have no desire to prejudice people against the mild species of exhileration contained in a cup of good Tea. Good Tea! Ah, there's the rub!-where to get a reliable article.

The consumption of Tea and Coffee is increasing at a tremendous rate every year, and the public taste for the article is becoming cultivated-at any rate, most people can recognize the difference between the good and the poor article when it is brewed. That's an encouraging sign to those who have tried to cultivate the public taste-it's encouraging to ourselves.

We have now been in the Tea trade for many years in Lindsay, and our large and steadily growing business proves to us that prices and qualities must have been alike satisfactory. We are offering now a

Lumbering in the North. Not for many years has a season like the present been known to the lumbermen operating in the north country. Very little rain fell last winter, and in consequence the swamps and small streams that usually serve as arteries, and feed the larger streams and reservoirs, failed to perform their usual work in helping to maintain the head of water required at different points. What added greatly to the difficulty that thus confronted Superintendent Thos. Walters and his men was the fact that never in the history of lumbering in the back country has the cut been so large-M. M. Boyd & Co., of Bobesygeon, the Rathbun Co., Dominion Bank, J. Carew, Dovey & Son, of this town, Craig & Austin, of Kinmount, and other firms, cparated very extensively, yet the cut of Howry & Son, Fenelon Falls, exceeded the total of all the others. By clever management and scrapulous care in saving the water many of the drives got down safely, but the continued absence of rain has at last resulted in the partial fallure of the water supply, and a large river above Irondale. The Rathbun Co. and only a few of their logsare left behind; the Carew logs are safely down; and the ample supply already on hand to keep their
