WAR AND EDUCATION

Great Evidence Exists That States and Brain are Better Than States. There is no better proof, of the barbarism of even the most civilized of the world than is afforded by the fact that the most advanced nations are unable to maintain the expenditure for their improvement. Though it is assumed that a better brain is better than a better body, the fact is that the most advanced nations are unable to maintain the expenditure for their improvement.

A Popular American Production. The consumption of pies in New York, says the Sun, is increasing at a rapid rate, and is now estimated to be worth \$10,000,000 annually. The native citizen's taste for pie is no longer what it was some years ago. The pie is no longer a mere article of food, but a social necessity.

HIS WIFE.

She saved the buttons on his shirts with marvelous rapidity. And took the spots from off his clothes with pleasurable alacrity. She cleaned his trousers every day till they were no more creased. And when he growled her patient smile was something more than peaceable.

She cleaned his rugst shoes for him, with joy quite unmisgivable. And took his cuffs and collars out—that is, when they were tangle. She put his money in the bank with such great regularity. That other women viewed her dress with eyes that looked despair.

She brushed him up, she brushed him down, and she brushed him up and down. And she brushed him up and down. And she brushed him up and down. And she brushed him up and down.

Will Appoint Women. Mayor Schieren announced the other day that he would appoint several women as members of the Brooklyn board of education next year. But that he could not make such appointments this year because he had selected 15 men to fill the vacancies which occurred on July 1 before he received the petition of the women to have their sex represented.

The Origin of the Scroll. The Greek honey-suckle, as it is called, originated in an attempt to imitate the forms of growth, but grew, as one may say, out of the use of the brush. The brush strokes arranging themselves in a natural way, the scroll was born. I have said on the subject. I have always held the ideas I now proclaim.—Brooklyn Times.

KNOWLEDGE. Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

At the convention of the State Federation of Women's Clubs of Massachusetts in annual session at Marlboro recently the reports show the commonwealth organizations in the grand total of 718 women and a membership of 50,000. If these 50,000 intelligent, high minded women had votes, think what a power they would be! They could purify the politics of the state.—Woman.

She Caught the Train. A young woman, jauntily dressed, wearing a natty suit, rushed into the Union station the other day. Taking a hurried glance at the walls of the room, she finally discovered the timepiece, and with an audible "Oh!" ran up stairs as fast as her already weakened strength would permit.

She Charms the Birds and Beasts. Mrs. H. R. Ludwig of Montague, Sussex county, N. J., across the Delaware river from this place, possesses a gift of magnetism which gives her wonderful control over animals, birds, reptiles and insects. The most vicious horses which are utterly unmanageable by any one else become perfectly tractable and obedient under her voice and touch.

not feel like instituting legal proceedings. Their 320 was returned, and we venture the opinion that when next they visit country town they will not be so anxious to seek the remains of disorder.—Chronicle.

A Bright Lad. Ten years of age, but who declines to give his name to the public, makes this authorized, confidential statement to us: "When I was one year old, my mamma died of consumption. The doctor said that I would soon die, and all our neighbors thought that even if I did not die, I would never be able to walk, because I was so weak and puny. A gathering formed and broke under my arm. I gathered and broke under my arm. I gathered and broke under my arm.
