It stood confessed that has occurred in the city since the first of January. The then unfortunate, but new happy and healthy man, is Wil-Murray-st. He is an Englishman, and punish the guilty, but more than a year bad has been out frem Kent, England, about eleven years. I did so, but this Tay canal, with its original estemated cost was of no avail, and I became so weak of \$120,000, its actual cost of upwards of that I was not able to move even around \$500,000, and its annual expenditure of the house. When I was taken from the hospital I could neither eat nor sleep, and was still suffering the most intense pain. 1 continued in this way, more dead than alive, until the first of January, 1894, when I concluded to try Dr. Williams' Pink Pills. How the Americans View Us. [New York Journal of Commerce.]

In aid of their Pacific railroad the Canadians have piled up indebtedness till it staggers American imagination, although we are not without experience in national debts. Down to June 30th of last year the Dominion had subsidized 5,049 miles of road, with money grants aggregating \$41, 610,000. There is now due, or to become due under subsidies assured, about \$7,000,-000. The Dominion is paying a subsidy to the steamers from Victoria to Asis, and it is ready to pay \$750,000 a year for several years and \$500,000 a year for a term beyond for a line of first-class passenger steamers between Montreal and English ports. We trust the imperial government and the people of England appreciate the readiness of the Canadians to bury themselves under taxes and mortgages in order to give Great Britain a safer and quicker route for the transmission of troops to India, It is one of the most beautiful pieces of selfsacrifice to be found in the history of that would not exist but for the fact that there is little probability that the promise could be kept if the occasion for it should arise. Nobody will ever molest Canada except possibly the United States; the United States would never molest Canada except as an incident of a war with England, and there are very few competen judges in either Canada or England who believe that England could defend Canada from the United States if the latter decided to take the Dominion.
