EDITORIAL NOTES.

There is not so much activity in the sale of gold mines at 10 cents a shares. Perhaps most people who wanted to buy gold mines have stocked up.

It is indeed very kind of our neighbors in the States to continue their tariff wrangle long neough to enable our farmers to sell their season's wool clip to the United States dealers. The energy with which the wool has been forwarded to its destination over the border has been an object lesson also to those Canadians who assert that reciprocity would be of no value to Canadians because in the main we produce similar commodities to those raised in the United States.

Sir Wilfrid Laurier is to visit France. He will be right royally received in that country as the French Canadian prem!er of a British colony. His reception will be one of the events of the year. He seems to be a sort of a conquering hero, hailed with delight wherever he goes. Having made a great hit in London he now goes to take Paris by storm and to air his French oratory at the capital of La Belle France. He is a lucky fellow to have hit the mark in the way he has done. And the best of it is he deserves all the honors he has received.

The European concert seems to be like exceeding fine too. The determination to make the Turk obey its mandate seems to be settled and its enforcement will excite no sympathy for the assassin. The letters of czars and emperors to Abdul Hamid with their assurances of "sincere friend ship" and other feelings of their august hearts, are soft and velvety, but not reassuring, and do not conceal the iron hand. They would better be omitted, unless the Turk is a greater fool than we think he is.

He says Europe will soon be buying in large quantities, and instead of Argentina, India and Australia being exporters of wheat, as heretofore, and in consewheat, as heretofore, and in consequence serious competitors, they are likely to import more or less. The exports of wheat from the United States that the last crop amounted to 147, 000,000 bushels. Appearances indicate that a much larger quantity will be retained to 147, 28 11d for Sept. and 3s 0%d for Oct. Flour, 28 11d for Sept. and 3s 0%d for Oct. Flour, quired from the present crop. This insures a remunerative price for the product of this year and prosperity to the floor in anything of that kind. Hurrah

The gathering of an immense harvest is now in full sweep in Kansas, and a peculiar condition of affairs has been revealed. Despite the fact that a large number of persons are out of work in various parts of the States, it has been found next to impossible to get help to save the wheat crop of Kansas. of the new United States tariff bill, as it comes from the senate, is said to be from 54 to 57 per cent. as against the 57 per cent of the Dingley bill, the 39 per cent of the Wilson bill, and the 49 per cent of the McKinley bill. And the conference committee of the two houses of congress is now asked to make the duty on a num ber of articles still higher. How a nation can build up a profitable trade with import duties so high is a problem which will prove difficult of solution. Canada with its constantly increasing population and natural resources developed as never before, should get a great deal of the foreign trade that has hitherto gone to our neighbors. Neither man nor nation can increase trade by placing obstacles in its
