...THE TURNING POINT...

Last Saturday, July 1st, ended the first half of the year 1899. Instead of printing the news of this week's bargains we take a new perspective of things in general, and the relation of this business to the community round about.

If we were to put in a few words what constitutes our claim upon your attention we should say that we make a business of looking after the interests of our customers. Others do the same to a certain extent. We try to do better than the average in order to deserve your confidence.

The trend of all our advertising is to emphasize the great fact that this store is able to buy and sell a little closer than others; that it serves everybody well by reason of the perfect facilities and varied stocks; and that it gives satisfaction by getting it. We have pretty clear notions of what Lindsay gives in the way of Dry Goods, and men of large experience in the buying are kept constantly busy anticipating your wishes.

Importing direct for ourselves is one way of keeping prices down. Paying cash is another way. Shoppers are beginning to realize more and more the extent of our facilities, the rapidity with which we get new goods, and the full strength of this organization. The business broadens and deepens continually, and we're careful to keep the store in direct competition with anything Toronto has or may have in the line of Dry Goods.

Lindsay has reason to be proud of the business we are doing, and the record of the six months just closing tells better than anything else that we mean to double our lead and enlarge our usefulness. Business has been supremely good and for that we are thankful. But, judging by plans and preparations now under way, the success of the next six months will discount anything and everything in the past.
