BE UP AND DOING.

On August 1st instant, the work of Let us warn our reform friends to be up and doing. In nine cases out of ten the elections are lost or won by the work upon these lists which are now before us, THE POST desires every man's name to be placed upon the list, if entitled to a that we must depend solely on the energy and attention of our friends to see to it that every legal reform vote is cough" at the Guelph experimental farm placed upon the list. The result of the next election to North and South Victoria-whether we shall be properly or | England, and as usual is indulging in a improperly represented in the parliament lot of nonsensical talk upon the subject of of Canada-depends upon the earnest and united work of the liberal party.

SIR JOHN THOMPSON.

placed in Sir John Thompson is to be seen by his once hollow boast that the sword of justice would fall alike on all boodlers, be they high or low. It was absolutely necessary at the time that the premier should say something of the kind. His supporters were becoming alarmed at party at Ottawa was becoming known as every Cherokee man, woman or infant, was courtesy and calculated to win all lower. The outlook in the cattle trade is not a "party of boodlers" and excitement had living on March 1st, 1894, should receive to be allayed. So it was that Sir John his or her portion of the seven millions, Thompson, in a sort of "wait a while, see | trustees. As a direct result, or a remarkwhat I will do," state of mind, promised pursuit to the death of all the boodlers who at Ottawa were like ants round preceding last March, which gives a birth sugar. Whether or not he knew at the moment of this outburst of virtue that the chief boodlers were within his own camp, it is hard to say, but his subsequently shielding and protecting them must convince the public that his boast was the hypocritical boast of simulated virtue. Once upon a time his admirers were wont to point to Sir John Thompson with some degree of pride, as if at last they had found a man who would in the course of government look neither to the preparing for a general election. It seems right nor to the left, and for and wide Cleopatra's virtue. The downfall of John Charles Rykert was instanced, but they, best acquainted with the history of that case, will tell us that it was Edward Blake's report to the house which had to be substituted for the wishy-washyexcusive one of Sir John Thompson, Putting aside his professions and his practice while Sir John Macdonald was alive, and giving him the full benefit, for a time, of sincerity of purpose and sincerity of action, that the premier has fallen from grace his best admirers cannot now deny. To represent him now as a last year. man of stainless virtue is to make him G.T.R. and Wellington bridge steals, the sufficient to start a hardware store. Langevin-McGreevy scandals, the Tur- -W. M. high places. To stamp it out, as once was promised by Sir John Thompson, means an army of deserters as rats leave ship, and so the premier, timid of Montreal to Liverpool, disaster to his party, blinds himself to his surroundings and sacrifices his political honor and virtue rather than endanger the life of the party within whose boodling net he has been caught, and now remains a not unwilling victim. It has been the fashion with some of his own party to justify their change of front towards the Ottawa government by the so called apostacy of Sir John Thompson. With such line of attack we have no sympathy and no part. The matter is between him and his God. We yield to no man in the matter of religion, and it is because of this that we shall never justify nor excuse any attempt to detract from the premier in a matter so sacred as But it is given us to notice that rules of comparison between professions of virtue and their practice are more sensitive towards the new Sir John because of his conversion.

Lindsay, Aug. 1st, 1894. Town Health Matters.

[To the Editor of the Post.] MR. EDITOR,-There appears to be some surprise, not only existing in the mind of the public generally, but of the board of health particularly, why some effort is not made to establish a sewerage system in

Large and influential committees of citizens, the board of health, board of had the subject under consideration, and after careful enquiry, due deliberation. and the expenditure of much money, decided that a system of sewerage should be established as soon as possible. The great public did expect our town council to act in the matter, but the mayor says he cannot get them to do anything. Why? In the first place, if you will take stock of the personnel of the council, you need not wonder. There is a minority of the council who would willing push this great public necessity to some beneficial results, but it is admitted by the public generally that we need expect no sct of any general good to result from the doings of the present members, but must wait until after next election and put to sleep such dead weights as are there only to carry out

Then it is a well understood thing that ly opposed to the system, and it is believed by some that it was for the purpose of defeating the sewerage system that he made such strenuous efforts and used such to the position. If the public want sewerthey place in positions of trust are in favor | About 7.15 the teams were in position, and the

of grave importance-I am told isolation and disinfection are not properly attended to. The inspector says only one case has appeared in each house—this is not true. WATCHER. Lindsay, Aug. 1st., 1894.

Mr. Mughes and the North West Schools [To the Editor of THE POST.]

Sin,-The Warder has been for the past two weeks, and probably will be for some and at Indian Head 13 animals out of 38 to excuse the member for North Victoria for his perfidy in reference to the Northorder for the Empire to claim that the | West separate schools and the effort made by Mr. McCarthy to give the Territories liberty to abolish them.

The simple facts of the matter are that the people of the North-West have had for years a system of separate schools forced upon them by Dominion legislation. These maintaining the unity of the empire. At a they are anxious to abolish, as the people in Liverpool has to some extent stimulated the in London, he said Canada would submit of the North-West are bigots, but theirs is very light supplies the volume of business has to any sacrifice to maintain connection a sparsely settled country and it is more not reached any extensive proportions. Oats to any sacrifice to maintain connection with the mother country, and then went on to say that the majority of the inhabittwo schools side by side when there are not children enough to fill, or ratepayers enough to adequately support one,

What the people of the North-West want is liberty to manage their own educational affairs, and really to abolish these separate schools and establish a system of public people their desired liberty straight, but ment of general principles, and it did not repeal or do away with the already establegislation with respect thereto, by the

schools if they so desire, Now, when North-West for many years to come, and tr until they are made provinces, -to the hope, it is presumed, at that time a paritaand withhold the desired liberty altogeth. er, In any case the population will then much greater, the senarate schools well nigh impossible; besides, it is now in is most felt.
