HOUSE OF REFUGE.

of Refuge Scheme.

A lengthy report of the House of Refuge for the county of Simcoe was presented to the county council at its is said, been before exhibited under meeting recently. The Barrie Gazette

summarizes it this way: "On June 15th, there were 42 males and 6 females in the house, the oldest being 100 years, and the youngest 7. Since opening 75 have been committed, 2 have died, one taken away by friends and 28 left on their own accord, 5 being recommitted and returned to the house In order to lesson cost of maintenance to county and municipalities interested, tenders are asked for suplies, and the cost of maintenance per day per capita for food and clothing is ten cents, 3 1-4 cents being food. The cost of heating will be very great, the furnaces in moderately cold weather consuming 3 1-2 tons of coal per week, and wood is expensive near Becton. Although the house is new, the roof leaks in several places, the slate is dropping off, and the plaster inside is damaged. The heating system is defective and will never heat the house in cold weather with coal. The hospital, situated to the north-west and exposed to cold winds, and shut off form the sunlight, can't be warmed, and is, therefore, never used. The farm is wet, and much in need of drainage, and is poiluted with wild mustard and other noxious weeds. The soil is not suited for the purpose for which it was intended. The sewers were blocked during the winter. The clothing will all be marked, so that those inmates who leave can be easily recognized. Some of the inmates received are insane, and should be committed to an asylum. Crops at present growing are 18a of fall wheat, barley, 18, vegetable 1, balance in pasture and summer fallow. He came to Emily in the year 1837. Before that he had been clerk in a store in Cavan, and while there taught school occasionally. In 184 he came to Omemee as clerk in the store of John Knowlson. There he remained till 1843, when he changed his position and became clerk in the store of Josiah Hughes, who at the same time was in charge of the post office. While here, Mr. Grandy served his apprenticeship in the post office, of which he finally took charge of in the year 1845, when Mr. Hughes gave up the business and office and Grandy was joined in matrimony to find accommodation for summer visi-Miss Sarah Jones, the Rev. IS IT A CASE OF INFANTICIDE OR NATURAL DEATH.

The Dead Body of a Fuil-Term Infant Found in a Servant Girl's Satchel-Is it Simply Concealment of Birth or Complicated with Child Murder? -Apathy of the Authorities.

The pretty little village of Milbrook has a sensation, which keeps everybody thinking.

A girl who comes from the township of Manvers, whose name for the present is withheld, has been employed in one of the four hotels of the village. It has for some time been observed that she was unable to conceal the evidences of indiscretion-indeed, she was likely to become a mother, a circumstance known to the proprietor of the hotel and those employed about it. Therefore on Saturday morning,

when the girl came to the proprietor of the hotel and stated her intention of leaving, her appearance, taken in connection with other circumstances, aroused his suspicions. Suspicion led to investigation, and in the course of the investigation, a visit was made to the sleeping room used by the girl. The landlord's suspicions, led him to demand a view of the interior of a black valise, belonging to the girl. To this she strongly objected. But the landlord was insistent; whether by force or otherwise, is not disclosed, he opened the valise and to his horror found

At present the girl is more or less under the suspicion of child murder, and an inquest and autopsy would bring out the truth. If she is innocent-if the child were still-born, she should have the benefit of the public knowledge of this fact, in which case she would have only to answer for the less serious crime of

The extraordinary feature of the affair is this: While the girl admitted the birth of the child, her roommate, who occupied the same bed, claims that she knew nothing of the affair-that she slept soundly and utterly unconscious of the terrible ordeal through which her bed-compan-

ion was passing. If the proprietor had not discovered the circumstances and called in medical assistance, it is pretty certain that the death of the mother would have been added to that of the

Another extraordinary thing in connection with the affair is the apathy of the authorities, who so far is at present known, have taken no steps to investigate circumstances which in the interests of the good name of the village, of justice and in the interests of the girl herself, should be very closely inquired into. Possibly delay of action arises from there being no resident coroner.

CHILDREN'S AID SOCIETY

The Lindsay Branch Still Jontinues to Perform a Good Work. Some four months ago a baby girl, suffering from bronchial trouble, was rescued by the local Children's Aid society from a home of want and destitution, and placed in a temporary home until it would be sufficiently recovered to be offered for adoption. Good care and wholesome food counted well in the case of this child. She recovered entirely from the illness and developed into such a beautiful little creature that a lady from a distance, who was visiting in town, made application to the Society for permiss on to take her to her heart and home, and the lady is now, the proud possessor of the babe that needed a home and

In this connection the following item from yesterday's Peterboro Examiner, may prove interesting: At about 6 o'clock on Saturday evening, a young man from near Lindsay, having heard of the excellent management of the local Children's Aid Society, drove up to the shelter on Charlotte-st., and thought he had nothing else to do than deposit therein a young child not yet one year of age. He was politely told by Officer Miller that Lindsay had a a magisterial inquiry and by virtue of Children's Aid Society of its own, or article 89 of the penal code, regarding a at least was supposed to have one, in | conspiracy organized for the purpose of which he could dispose of his charge. This is the narrative of a daring voyage of circumnavigation, undertaken by the author in 1895, in a forty-foot sloop built by himself in Buzzard's Bay and taken back and forth across the Atlantic, and thence around Cape Horn and Cape of Good hope, without assistance or companionship. The distance traversed was 46,000 miles, and the accuracy of the navigator's landfalls throughout was a thing to marvel at, his chronometer for most of the time being a little tin clock of the cheapest kind. Paris, Aug. 14.-M. Paul Deroulede, founder of the League of Patriots, and member of the Chamber of Deputies for the Angouleme Division of Charente, was arrested at 4 o'clock on Saturday morning at his estate at Croissy, near Paris. A number of the anti-Semite and Patriotic Leaguers were also arrested.

A semi-official note issued later reads as follows: "A certain number of arrests were made this morning as the result of accomplishing a change in the form of government. The persons implicated belong to the group of the Boyalist youth, and the Patriotic and anti-Semitic Leagues. At the trial of the Neuilly Barracks affair facts relating to that incident alone were used as the basis of the prosecution; but searches were then made and documents were seized which led to the discovery of an organization, dating back to July, 1898, and of a plot to selze the Government by force. The documents leave no room for doubt, either in regard to the existence of the plot or as to the chief actors therein. After very close watch organized proof was obtained that the same groups were preparing for a fresh attempt at an early date, the proof being such as to enable the disturbances to be averted by immediate measures. The investigation of the affair is entrusted to M. Fabre, examin-

FORTY MILLION BUSHELS Will Be the Yield of Wheat in Manitoba

and the Territories. Montreal, Aug. 15 .- Mr. W. W. Ogilvie, the great Canadian miller, who returned yesterday from Winnipeg, spoke

in an interview as follows: "I have been nearly all over southern Manitoba. I have seen every crop in Manitoba since 1877, and this year's is the finest of them all. I saw many fields that will average 40 bushels to the acre. Manitoba has 1,600,000 acres under wheat, while there are 400,000 acres in the Territories. This, at 20 bushels to the acre, will produce 40,000,000 bushels. If the Manitoba farmers have three weeks' fine weather the average yield will be 25 bushels to the acre or 50,000,000 bushels in all." As a matter or fact, he saw wheat being cut last week in four different sections of southern Manitoba, and all looked well.

The barley is pretty well cut, and, for oats, the average is much more extensive than at any previous year, and the quality is of the very best. There is also a marked absence of weeds, showing careful cultivation and selection of seed by the farmers of Manitoba. Mr. Ogilvie has decided to increase the daily output of his Winnipeg mill from 20,000 to 30,-000 barrels, and he states that this increased production will be required for the British Columbia trade alone.
