Excursion Notes. -A small excursion under the auspices of the Foresters society of Uxbridge came in Friday last and took in the trip to Stargeon Point and Fenelon Falls per steamer Crandella.

The oft-postponed excursion under the auspices of the Citizens' band took place Tuesday last to Chemong Park per str. Columbian and was largely attended, as the bright morning promised a pleasant day. The beautiful enery en route was a revelation to many on board who were passing through the lower lakes for the first time. A stay of about two hours was made at the Park. On the return trip in the evening a furious rainstorm caught the boat at Ssurgeon Point, and gave many a wet jacket. Being intensely dark the captain could not locate the mouth of the river, and returned to the Puint, where a stay of about an hour was made in the hope that the weather would clear. It did not, however, and it was decided to again attempt to find the river's mouth. Capt. Smith was alded by Mr. Frank Crandell, and at his suggestion a boat was lowered and the narrow passage discovered by means of a lantern. The trip up was a slow and

-Mr. J. L. Allin, one of Victoria's delegates
to the international Christian Endeavor convention held in New Y rk city in the early
part of July, addressed the Glandine society on
the evening of Thursday, August 11th. He
gave a condensed report of the great Christian gathering, a report which showed that he had not been an idle delegate nor a selfish sight-seer. Each address had been carefully noted. and from these notes Mr. Allin gave a synopsis of the eatire convention, full of enthusiasm and impressing upon the audience the main thoughts developed by each speaker. The convention has surely proved a grand success, and cannot fail to be beneficial to the united society. K each of the thirty thousand delegates carries bushe's—good heaping bushels—of eggs, every one of which had been received from the farmers during the day. Probably the same thing prevails to a lesser or possibly greater degree in the other groceries of the town. One is led to wonder how all the eggs coming in could be profitably used.
