THE STEADY SEE-SAW OF TRADE

SWINGS UP AND DOWN WITH THE WEATHER.

Just now we are booming Clothing. Booming Clothing, do we say? Ha, ha, yes, truly, only that Clothing booms itself, and well it may. Such Royal, Roaring, Rattling, Roystering Value as we are showing strikes a blow on the tocsin of time that will reverberate over every Concession in the County.

A CLOTHING MENU THAT WILL CAPTIVATE:
2,500 OVERCOATS, ranging from \$1.50 to \$18 || 2,800 SUITS, ranging from \$1.50 to \$20
TO SELECT FROM.

2,200 Pairs Pants, sliding from 17c. to \$5.00. - 500 Dozen Underwear, All Wool, 37½c. each.

The above group of cold shadders are stacked in piles awaiting the eager rush of hundreds of stalwart men who want Winter Clothing. The stacks are only a part of the recent purchase of a \$75,000 Stock of CLOTHING, bought at the low rate of 37½c. on the Dollar

Snatched by our enterprise and Spot Cash persistence from the grasp of dealers who take weeks to make up their minds whether they will buy or not. What care GOUGH BROS., the Leviathans of the Clothing Trade, for the handicap dealers who are gasping in the grasp of the Wholesale Clothing Urtle Fish. No writing a post card to Montreal to know what a line of Overalls can be sold for. No looking to the "boss" for leave to sacrifice a pair of Cotton Socks. No back room conferences to settle the cut on a box of Suspenders. No sir, GOUGH BROS. buy their Goods, pay their way, sell at their own prices, and please every man, woman or child that comes into the shop, and that, too, without advice or suggestion from any man alive. Whether it's an Overcoat, Man's Suit, Boy's Suit, or Cardigan Jacket, you can have every outside want supplied at the Mammoth Clothing Palace, where the doors swing open to welcome the buyers, and where the crowds go to deal.

EVENTS OF THE WEEK.

—Michael Day, who has for some time past spent his evenings peeping into the bedrooms of summer cottagers at Flatlands, L. I., as they were retiring, was riddled with buckshot Monday night by John E. Lott, into whose carriage's room he was peeping. The man will probably die. Lott was arrested.
—During a severe thunderstorm Sunday last the residence of Mrs. Thos. Mand, near Beckwood, Ont., was struck by lightning. The lightning entered the chimney and passed through a window near which Mrs. Mand was sitting, killing her instantly and prostrating her son Joseph, who was also sitting in line with the course of the bolt.
—The coroner's inquest over the body of J. McQuillan, a tunnel employe, which was recovered from the hydraulic canal, Niagara Falls, last Thursday, leads to the belief that the man was murdered. McQuillan was supposed to have been drowned, but witnesses swore to hearing cries for help coming from the vicinity. They tried to locate them at the time, but failed. Further testimony revealed the fact that McQuillan had considerable money,

and he had been seen in company with a man of desperate character. The man disappeared.
—George Armstrong, a sailor on the John Wesley, which was leaving Midland harbor, light, for Chicago, jumped from the vessel and was drowned.
—A railway engineer proposes to have a genuine railway collision as one of the attractions of the World's fair. He undertakes to do the job for \$500.
—The steamer N. M. Whitney, valued at \$250,000, with a cargo worth \$150,000, was run into in Boston harbor Wednesday night by the Steamer Ottoman, and sunk. Both were freighted boats. The steward's wife jumped overboard and was lost.
—A boiler exploded in the sawmill owned by Jos. L. Loude at Embury village, three miles from Russell, Ont., Wednesday evening. Pierre Stone and J. B. Lazure were killed instantly. A. Grigore, F. La Londe, A. Pimeau, D. Perre and X. Goyette were badly injured. The mill is a total wreck.
—Albert Wirtman, a 25-year-old barber of Buffalo, was sloped with his grand- mother a wealthy woman 70 years of age. He leaves a wife, and children in straitened circumstances. He had been in the habit of spending each time at the lady's house and last Monday they took a west-bound train together.
—From Kilkenny a remarkable find is reported. A boy named Martin was spearing eels in the River Nore and displaced a stone lying at the bottom. Underneath he saw a sparkling object, which on being dug up proved to be a valuable gold ring. This ring has been identified as one belonging to the late Mr. Carter, the county surveyor, who dropped it into the river 20 years ago when mooring his pleasure boat.
—The proposed selection of Stewart Kull, who is next in rotation as lord mayor of London, has aroused considerable opposition, in view of the fact that Kull is a Roman Catholic. In response to enquiries made of him by Lord Mayor Evans, Mr. Kull has written a letter in which he says that in the event of his selection as lord mayor he would have an Anglican chaplain to perform public duties, while his private chaplain would be a Catholic.

Better Country Roads.

We take the following from the Toronto Globe:—Mr. George E. Cassey, M. P. for West Elgin, has a good letter in The St. Thomas Journal on the subject of country roads. We give his conclusions: In the first place there are certain principles of road-making, on which, with proper advice, the municipal authorities should establish certain standards—such a standard for main highways, such and such for side lines and concessions. Let the roads be made uniformly on these principles, not all finished at once, but all on the same plan as far as the money goes. "Commute" all statute labor as at present assessed on a uniform cash basis, adding what is now spent in grants. Let those who would rather work than pay cash hire their teams or themselves to the township and get some ready money in a slack season of the year. The pathmaster should make and mend like the section boss of a railway, guided by an uniform system of instructions and not by his own whim. He calls attention to the following among other advantages:—Roads would be so built that each year's work would bring them nearer to the standard established, whereas now it often makes them worse. They would be practically permanent when completed. When a road is once well made it takes a great deal of road-making to unmake it. Sometimes the roads badly need mending at seasons when it is not convenient to do road work. Under this plan they could be attended to without troubling the farmer. All this would involve no new outlays, after trial, it was decided to incur it.
