The Canadian Post.

LINDSAY, FRIDAY, SEPT. 8, 1893.

MR. CHIPMAN'S REPORT ON LINDSAY SEWERAGE.

A Comprehensive Sketch of the Proposed System.

Mr. Chipman commences his report by a description of the River Severn, more particularly of that part of it lying within the town. The minimum velocity is given as ten feet per minute below the locks, and the minimum discharge as 4,000 cub. ft. per minute, the average being 23,000 cub. ft. per minute.

The river divides the town into drainage areas, that on the west side being subdivided as follows:

1. The North-west area.
2. The Brewery Creek area.
3. The Lindsay Street area.
4. The Mill Pond area.

The first is described as unimportant and is separated from the second by a line joining the highest point of land in the western boundary with the point where the river crosses the northern boundary.

The second is the largest and most important, and is separated from the third by a line joining the intersection of Kent and William-sts. with the intersections of Durham and Cambridge-sts., and then proceeding southerly to the southern boundary of the town. This area drains into the brewery creek, which has a distance area of about 1,200 acres above the town of which lies outside the town.

The third area lies between the 2nd and 4th and contains about 200 acres, its natural outlet being down Lindsay-st.

The fourth area is along the western bank of the river, varying in width from 700 to 1,500 feet, and extending from the south limit of the town to a point near the north end of Huron-st. It is described as unimportant and as having few streets now requiring sewers.

The east side of the river is subdivided into two drainage areas by a line drawn at right angles to the riverfront, the point where it intersects Kent-st.

All north-west of this line can be drained into the river below the locks. The portion south of the line does not now require sewerage.

Mr. Chipman then describes at length the present creeks and drains, the various systems of sewers, the best means of draining cellars, and recommends, 1st, that storm water be got rid of by cleaning out and improving the present creeks and drains and by constructing proper channels and culverts on the streets. 2nd, that sewage only be admitted to the sewers, and 3rd, that cellars be drained by porous drain tiles laid at the proper depth.

In this connection he says the present Kent-st. sewer is not low enough to take the drainage from the cellars and recommends that it be used for surface drainage only.

Outlets.—Mr. Chipman says to prevent any local nuisances arising at the outlets of the sewers it will be necessary to discharge the sewage below the surface of the water, and the nearer to midstream the better. The main outlet is laid at Francis-st., where the river is deeper than at any other street above that point. Below Francis-st. there are few residences in the vicinity of the river. At Lindsay-st. there are two sewer outlets in addition to the present Kent-st. outlet. The one from the north will convey but very little sewage for the present at least. The current of the river at this point will be sufficient to remove all sewage immediately, but submerged outlets should be adopted at this point as well as at Francis-st. No other outlets will be required for some years.

River Pollution.—From the calculations Mr. Chipman has made, he finds that the quantity of sewage to be discharged into

the river will bear such a small proportion to the quantity of water in the river that no nuisance will, in his opinion, be created, but if at any time the discharge should become objectionable, an intercepting sewer can be constructed along the bank of the river to the north boundary of the town and the sewage purified before being discharged into the river. He does not apprehend that this condition will arise before 20 or 30 years at least.

Main Sewers.—A main sewer is proposed from the river at Francis-st. westerly to William, then along William to Wellington, thence along Wellington to Cambridge, thence along Cambridge to Kent, thence along Kent to Sussex-st., not exceeding fifteen inches in diameter. On Sussex-st., south of Kent, the main should be twelve inches in diameter. A second main will be required on Lindsay-st. from the river southerly to Glenelg-st.

No large sewer will be required on the east side of the river.

It is deemed desirable to make an overflow for the creek at Wellington-st. the sewer on that street could be enlarged to a 24-inch cast-iron pipe with an overflow for storm water only continued on Wellington-st. to the river.

Estimate of Cost.—Mr. Chipman's estimate of the cost of the system now necessary, some 6 miles, for 30,000 lineal feet of sewer, is as follows:

Francis-st. Outlet.....	100 feet	\$ 200
Main Sewer.....	250 "	500
William-st. ".....	200 "	400
Wellington-st. ".....	225 "	450
Cambridge-st. ".....	200 "	400
Kent-st. ".....	850 "	1,700
Lindsay-st. South Outlet.....	50 "	100
Main Sewer.....	1,250 "	2,500
Lindsay-st. North Outlet.....	50 "	100
Main Sewer.....	5,000 "	10,000
Catch basins and manholes present Kent-st. Sewer.....		700
Total for Mains, Outlets, etc.....		13,500
Lateral Sewers.....		14,500
Total.....		\$28,000

Of this amount, \$31,000 at least can be taxed as local improvement by frontage assessment, leaving \$25,000 to be raised by the corporation.

Payments.—It is recommended that the greater part of the cost of the sewers be raised by a frontage assessment. A uniform frontage rate being adopted, every owner paying the same rate, a reasonable exemption being allowed on corner lots. This frontage rate should equal the average cost of the minimum size of sewer constructed, the increased cost of mains and outlets being borne by the town. The rate recommended is 60c. per foot frontage, no less than five cents per year per foot, assuming the debentures to run for 20 years.

Summary.

Population.....	5,500
Population provided for.....	30,000
System recommended.....	separate
Water courses to be removed by main sewer.....	35,000
Disposal until population using sewers exceeds 15,000.....	30,000
Disposal until population using sewers exceeds 15,000.....	30,000
Frontage tax proposed.....	60c
Debentures 4 per cent.....	20 years

Board of Health.

A well attended meeting of the board of health took place last Friday evening. Records from the sanitary inspector and medical health officer represented the town in a healthful and good sanitary condition. One case of diphtheria was reported which was likely the result of a house drainage, which has been reported. One case of typhoid fever was also reported. The parties came here from Peterborough. The medical health officer urged upon the board the necessity of seeing that the sewerage system be a successful one, inasmuch as it is a matter of public health. He also stated that the special sewerage committee had not given the matter that attention which he desired the board to press upon the town council. He also stated that the sewerage system was passed and a committee appointed to look into the matter. He also stated that the sewerage system was passed and a committee appointed to look into the matter. He also stated that the sewerage system was passed and a committee appointed to look into the matter.

COMMUNICATIONS.

To whom it may concern:

At the regular meeting of Hackton True Blue Lodge No. 33, on Monday evening last, it was moved by Bro. Harry Brown, seconded by Bro. Thos. Graham, and resolved:

That this lodge condemn the article headed "A Disgraceful Visit" published in THE CANADIAN POST on September 1st, 1893, regarding the True Blue excursion from Toronto on Aug. 28th. This lodge deems the excursion on the above date, under the auspices of the Toronto True Blue, was properly conducted as far as the True Blue order was concerned.

In the said article it stated that "ladies were seen with sashes on, trailing through the mud in a drunken condition," leading the public to believe that the same were members of the order, which this lodge utterly denies as an unfounded falsehood; and further, that there was not a lady (a girl as THE POST put it) wearing a sash on the streets of this town on that day. The article also mentioned about young men not being able to keep their feet in the procession. We defy the editor of THE POST, or the author of the article, to prove one of his statements true regarding either the ladies or the male members of the True Blue order.

We would ask the author of THE POST article, when he writes a letter for publication to give the true details of the case, and that a copy of this motion be sent to the Victoria Herald, the Orange Sentinel, the True Blue Herald, the Lindsay Watchman, and THE CANADIAN POST for publication.

W.M. SCOTT, W.M. A. GRAHAM, Secretary.

LINDSAY, Sept. 1st, 1893.

J. S. WILLIAMS, Secy.
Dear Sir and Brother,—Will you kindly let me know if the band calling themselves the Derry Band of Toronto, have any connection with the Orange Institution in your city? I think a more disgraceful lot of rowdies never entered our town than they proved themselves to be on Monday of this week, that being your civic holiday. The Orange Institution, of course, is credited with the whole transaction, and I want to state plainly through the press that the Orange Institution had no connection whatever with the excursion or those who came with it.—Yours,
J. L. WINTERS.

District Master, Lindsay.

TORONTO, Sept. 2nd, 1893.

Dear Sir and Brother,—In reference to your enquiry re band, they have no connection with the Orange Institution whatever. They went to the True Blue excursion from here, and you will do right in putting the responsibility for such rowdiness where it properly belongs and clearing the Orange Institution of having anything to do with the excursion or those who went with it.—Yours fraternally,
J. S. WILLIAMS.

LINDSAY, Sept. 5th, 1893.

To the Editor of THE CANADIAN POST: Sir,—In looking over your paper of Sept. 1st, in your account of the disgraceful rowdiness of some of the excursionists of Monday, 28th August, who came from Toronto, you are pleased to connect the Orange Institution with the rowdiness of the excursion. Just how or why I am at a loss to know; perhaps you can explain, as the Orange society knew nothing of the excursion, nor had they anything to do with the CANADIAN POST PRINTING CO., or the man in the mill.

If you please insert this, together with my note of inquiry and the reply of one of Toronto's most respected citizens, who knows whereof he speaks, and oblige, yours,
J. L. WINTERS.

The above may be perfectly true, but the allegations were not all members of the Derry Band by any means—almost every lodge represented in the procession had its own band, and took part in the disgraceful disorder, particularly the society carrying the large axes, (dangerous weapons, for the carrying of which the law establishes a penalty,) and also another whose members were provided with swords and were dressed in blue with Orange stripes on their uniforms, almost a dozen of whom were in such a state of drunkenness as to miss the train on Monday night, and on Tuesday, when on their way to the station, stole a washerwoman's umbrella and only relinquished it when compelled to by Constable Wilson. It may be very well for Mr. Winters to try and saddle the whole blame on the Derry boys and shield the other societies, but it will not do, and many of our townsmen can testify to the almost equal culpability of the other societies.

We might have been wrong in our assertion that the man who was called "Orange" was not a member of the Orange Institution, but it is a singular thing that the True Blues are invariably connected with almost every demonstration held, and many hold offices in connection with both societies. This is the first time we have heard of the True Blues being repudiated by the Orange society, but never officially. We had no intention of attacking the Orange society, nor account of the affair was more to show up the flagrant breaches of order and decency exhibited by the societies present at Lindsay on Monday of last week; and we do say that any society permitting such rowdiness to be committed by its members in reality is most decidedly weak and cannot be trusted to elevate the morals of our young men or pure young girls.—Ed. Post.

Wood's Pills are easy to take, easy in action and sure in effect. 25 cents a box.

Isolation Hospital.

(To the Editor of THE POST.)

SIR,—Allow me through your paper to draw the attention of our city fathers to the necessity and advisability of erecting a suitable place to isolate cases of infectious diseases which are likely to spread from one to another, and having no home to go to, are unwelcome guests at hotels or boarding houses; in fact they cannot be properly attended to in such places, and necessarily become a centre from which the disease may spread to an alarming extent. There are times also when a disease breaks out in some family where it is impossible to give that isolation which common humanity demands for the safety of the well ones, as well as the community in general. I am sure all are satisfied that such a place should be provided. As a matter of fact an attempt was made on one time to secure such a place, but unfortunately the house that was purchased for the purpose is too near other dwellings and consequently cannot be utilized for that purpose. The town has secured a beautiful and well situated fifteen-acre plot of land, and all that is required now is to dispose of the present unsuitable premises and with the proceeds erect a building on the newly purchased land that would answer present emergencies without placing additional burdens on the people. In view of the importance of the work, and the near approach of winter, and no extra taxation, I hope some or all of the council will take this matter up in earnest and give us a place of refuge so much needed. I assure you I feel the importance of this very much, hence my urgency.
W. L. HERRIMAN, M. H. O.
Lindsay, Sept. 6th, 1893.

The Hypodermic Needle.
as used by Mr. Gross, dentist, kills pain perfectly in the tooth extracting, and the people appreciate it.—7-11.

First-Class Dentistry.
Mr. Neelands, Dentist, has been using the so-called Hypodermic Needle (called by doctors the Hypodermic Syringe) for over four years for extracting teeth.—7-11.

Y. M. C. A. Notes.
—"Abner's advice to the Soldiers" is the subject Rev. J. C. Symeore, of MacMaster University, will speak on next Sunday, Sept. 10th, at 4.15, in the Y. M. C. A. room. Young men especially invited to be present.

How to Get a "Sunlight" Picture.
Send 25 "Sunlight" Soap wrappers (wrappers bearing the words "Why Does a Woman Look Old Sooner than a Man?") to Lever Bros., Ltd., 44 Scott-st., Toronto, and you will receive by post a pretty picture, free from advertising, and to decorate your home. This is an easy way to get the "Sunlight" Soap, the best in the market and will only cost 1c. postage to send in the wrappers, if you leave the ends open. Write your address carefully.

An Honest Offer.
If you have oysters and would like to be cured without risk of losing your money, call on a Germicide Inhaler without a cent of pay in advance. After you have given it a fair trial at your own home and you find it a genuine remedy, you can pay \$3 for same. It is satisfactory in every way and will cure you of nothing could be fairer, you have everything to gain and nothing to lose. If you have cash call and get the remedy on above terms at GREGORY'S DRUG STORE—our sole agent for Lindsay and vicinity. Those who cannot call, write—Medicine Inhalation Co.—Toronto, Ont.

General Sporting Notes.
—T. P. Connett, the celebrated runner of the Holy-cross Lyceum, New York, ran a mile in 17 1/2 s on Saturday.

The Montreal Shamrocks defeated the Toronto lacrosse team Saturday last, 4 goals to 3. It was a hard-fought game.

F. A. Foell of Buffalo smashed the American 50 mile bicycle record on Friday last, covering the distance in 2 hrs. 32 m. 30 sec.

Nicholson, the English sprint runner, must be a wonder. He won the 200 yard race at Blackley, England, recently in 31 seconds.

A Salem-Lindsay team went to Peterboro Saturday last and defeated the ball-players of that burg, the score standing 6 to 3. McMillan's pitching puzzled the Peterboro men badly.

The following teams now go 100 or better: Mascoot, 2,047; Flying Jib, 2,038; Gray, 2,003; Roy Wilkes, 2,063; Saladin, 2,053; Will Kerr, 2,061; J. H. L., 2,063. The day of the 200 minute pacer seems not far off.

In a race at New York Friday last the steam yacht Falcon set a speed of over 31 1/2 statute miles per hour, breaking the world's record held by a Russian torpedo boat, 31.1 miles. The latter boat is almost twice the length of the Falcon.

The well-known pacer stallion Cornacracan, the property of L. Wigle of Leamington, has been purchased for \$2,000 by Bookman Bros. of Ingersoll. He has started in 14 races this season, and pulled in a share of the money in every race but one.

Mr. E. Holmes, who started from Montreal May 2nd to walk across the continent, arrived at Vancouver, B. C., on Aug. 26th, making the trip in 117 days, and 29 days ahead of the time specified in a wager. The distance was 2,906 miles, and was covered in 2,700 hours.

Boxall.

Boxall.

DON'T BE DECEIVED . . .

The winter is coming and you will require something to do your heating and cooking.

One of our STOVES or RANGES will supply every requirement, and inspection will convince you that they are THE BEST. I have a full line of Bird Cages, Wringers, Brooms, Churns, Lanterns, Granite Ware, Cutlery, and a full line of Housefurnishing Goods.

Eavetroughing, Plumbing and Repairing promptly attended to.

JAMES BOXALL, 109 Kent St., Lindsay.

Lindsay, Aug. 31, 1893.—55.

MARK THIS WELL

HOUSEKEEPERS!

Profits in the Grocery business are small nowadays, and competition is keen—more so, perhaps than you are aware of.

One great difficulty the progressive merchant has to contend with is the slowness of buyers to recognize the advantage of buying the goods fresh—buying from a stock that is being constantly replenished. Stale and inferior goods are sold over grocery counters as well as in the dry goods business, and the profit upon them is large.

We don't propose to read you a lecture upon the subject, but we do wish to impress upon you the fact that an experience of fifteen years in the grocery business has taught us that in the long run QUALITY is recognized and appreciated by the general public.

When we say that our stock of General Groceries is FRESH and fully assorted in all lines, and that the prices are down to the lowest notch compatible with a desire to pay our honest debts and gain what the world is said to owe every man—a living—we state a fact that will be readily believed by those who have traded with us in the past, and will stand ready to convince doubters.

TEAS AND COFFEES of the best brands are strong features of our business. We flatter ourselves that those who buy from us will realize their mistake in not doing so sooner. The bouquet is unapproachable.

SPRATT & KILLEN,
FAMILY GROCER

Lindsay, August 25th, 1893.—7

MARRIAGES.

RATHBUN—BLAIR—On Thursday, August 5th, at St. Jude's church, Southsea, England, E. Walter Rathbun, of Deseronto, Ont., to Alice, daughter of the late Captain James Jenkins Blair, of the Bengal staff corps.

DEATHS.

SHAW.—At Ops, on Friday, September 1st, 1893, Ann Shaw, widow of the late James Shaw, aged 81 years.

WALLIS.—On the 12th Sept., 1893, at Marlboro, Stephen Wallis, eldest son of Wm. Wallis, aged 38 years and 8 months.

BONNELL.—At Lindsay, on Tuesday, September 5th, 1893, Amy Estes, relict of the late Moses Bonnall, aged 58 years and 9 months.

SYRUP OF FIGS.

Produced from the laxative and nutritious Juice of California figs, combined with the medicinal virtues of plants known to be most beneficial to the human system, acts gently on the kidneys, liver and bowels, effectually cleansing the system, dispelling colds and headaches, and curing habitual constipation.

FOR INVALIDS
whose system needs toning up and whose appetites are failing, a quick and pleasant remedy will be found in
CAMPBELL'S QUININE WINE.
