After a day of voting and wranglburg operators. The vote was 495 for and 317 against accepting the terms of settlement. The delegates from Illinois, who had 250 votes, were unanimously against a settlement. The resolution

adopted is as follows: "Resolved, that we, the miners of Pennsylvania, West Virginia, Ohio and Illinois, in convention assembled, do hereby agree to accept the proposition recommended by our National Executive Commended tive Committee, viz.: 65 cents in Pittsburg district, all places in above named States where a relative price can be obtained to resume work and contribute liberally to the miners who do not receive the advance, where the fight must be continued to a bitter finish.'

While ten days is provided for the miners to resume work, it is probable that many of the Ohio and Pittsburg miners will be at work Monday. The Illinois miners will be called in convention at Springfield, Sept. 19, to determine what shall be done in that State. Some of the Illinois delegates are very bitter in their demanciations of due consideration.

A resolution was adopted denouncing the action of the deputies im firing into the crowd of strikers at Hazleton, Pa. It will now be necessary for the operators of Ohio, Indiana and Illinois to get together and agree to pay, the wagescales demanded if they wish the miners to get to work at the end of ten days. If they do not they will be obliged to sit idle and see the Pennsylvania mines supplying the empty markets. The ten days' limit was allowed for this purpose. All the Pittsburg operators but De Armitt are ready to pay the 62-cent rate. Thomas Johnson and J. S. Morton, two of the largest operators, said to-night that all Ohio operators would readily pay the 65-cent rate demanded. P. H. Penna, formerly national president of the miners, now an operator in Indiana, says the Indiana miners will readily pay the price called for by the new scale. President Carson of the Illinois operators did not look with favor on the new scale, and would probably object to it, but he believed they could be brought to time. "It will ultimately be equivalent to a settlement in our State," said he. President Dolan thinks it will not take long to bring De Armitt to time. All the other

The striking miners have made elaborate preparations for demonstrations at the funeral of ten of the victims, which is fixed for 10.30 o'clock in the morning. The military authorities are determined that nothing of the kind shall be permitted, and from this time on there shall be no marching of any character whatsoever, whether during funerals or otherwise. General Gobin declared to-night that in spite of the warrants issued no constables nor any civic authorities will be permitted to arrest deputies. He said that the sheriff is an executive officer, whose duty is to preserve the peace and that he, Gobin, and the troops are really subordinate to the sheriff at this time, being engaged in helping him to perform, that duty. Under the circumstances, he will not permit interference with the sheriff's officials so long as the military is here. The Steam Whaler Nevach Caught in a Ice Pack in the Arctic Ocean With Terrible Results.

Otter Point, B.C., Sept. 12 .- Shortly before the Cleveland left St. Michael for Seattle, the United States revenue cutter Bear put into St. Michael with Captain Whiteside, his wife, the first and fourth officers and four seames of the steam whaler Nevach. They are all that remain to tell a terrible story of death in the Arctic. The Nevach was caught in an ice-pack in the Arctic Ocean. Of her crew, 42 were lost; 31 were crushed in the ice or frozen to death. The Bear saw the vessel's signals of distress near Point Barrow and lost no time in going to her assistance. The captain ,his wife, two officers and four sailors were glad to leave the dismantled, crippled ship, but nine refused positively to go. They were lost in the desolate field of ice, and it is feared they have perished with their comrades.

THE ILL-FATED WAUBUNO.

Engine and Boiler of the Steamer Found by Fishermen While Grappling for Nets.

Toronto, Sept. 9. On November 22, 1879, the side-wheel steamer Waubung was wrecked in Georgian Bay and not a soul escaped. The news of the disaster did not reach Toronto until several days afterwards, and later on the hull of the ill-fated steamer was discovered drifting in the bay. Not until a few days ago, however, was the spot where the disaster took place discovered. Mr. J. J. Anderson of the Anderson Fish Company and a number of fishermen were grappling for nets about five miles north of Moose Point, which is about 20 miles south of Parry Sound. They found the boiler, engine, anchor and chain and a hand truck belonging to the Waubuno. They were lying in about 10 fathoms of water. Mr. Anderson got about 45 fathoms of the anchor chain. This discovery fixes the place of the disaster and clears up a mystery that few thought would ever be solved.
