LINDSAY, FRIDAY, SEPTEMBER 2.

LAKEFIELD TO LINDSAY.
INTERESTING DESCRIPTION OF A TRIP OVER THE INTERVENING CHAIN OF WATERS.

The Beauties of Stoney Lake and its many islands—Fairy Lake With no Apparent Inlet or Outlet—Points of Interest Along the Route Duly Noted—Bobcaygeon and Sturgeon Point Praised.

The following notes of a trip by steamer from Lakefield to Lindsay were written by a Bethany gentleman. It will interest those who know the route, and may induce others who deem it necessary to go elsewhere to view beautiful scenery to pay some attention to the charming trips close at hand.

Our boat left Lakefield at 9:30 a.m., sailing up Lake Katchewanooka. This lake is five miles long and all widths, from a quarter of a mile to a mile. It is slightly shallow and at present the stage is at work in places. This is where we saw the booms. A boom consists of a wreath of logs connected by pieces of chain, and enclosing as many sawlogs as can well be put inside. It is really wonderful to see the drivers walking on these logs, which are continually rolling from side to side. The poles of their rubber boots are provided with sharp blades to prevent them from being drawn by the booms.

At Young's Point, a small picturesque lumber village, we were met by means of a look about six feet and then entered Clear Lake. Clear lake is about five miles long and two miles wide, is perfectly clear and calm, and an almost continuous row of beautiful trees ornament its shores nearly all the way.

At Sturgeon Point, a small picturesque village, we were met by means of a look about six feet and then entered Clear Lake. Clear lake is about five miles long and two miles wide, is perfectly clear and calm, and an almost continuous row of beautiful trees ornament its shores nearly all the way.

These are some of the islands,—one owned by Mr. Wm. Hamilton, of Peterboro, another by Miss Ray, of Lakefield, 'The Shanty', by Mr. Geo. C. Beall, of Rochester, 'Headlands', by F. J. Tate, of Lakefield, 'Fair Haven', by Mr. Atwood, of Grassy Island, by Mr. Robert Graham, of Lakefield, 'Wabano', 'Bona Vista', 'Elfin Nook', by Dr. Bell, of Lakefield, 'Horseshoe Island', by Mr. G. L. M., of Cobourg, one owned by Mr. J. R. Stratton, M.P.P., of Peterboro, one by Mrs. Trail, 'Black Rock', by Mr. Chas. Reynolds, of Bethany; 'Syndicate Island', 'American Island', 'Isle Side', 'Vimado' on Mt. Julian, which is open for guests and owned by Mr. Wm. Graham, of Lakefield. Others are owned by Mr. Sloan, Mr. Hopkins, Mr. Moore, Mr. Best and Mr. Wier.

There is a small channel which must be provided of its name 'Hell's Gate,' and a turn around one of the islands called 'The Devil's Elbow.' At other points are Mount Rascal, Hurricane Point, Fairy Lake, Eagle Mount and similar islands, where there is a pavilion and a post office and store kept by Mr. Robinson.

Just at this point let us forget our round trip for a moment. In a subsequent trip we visited Grassy Island for two or three days. From here we rowed over to the Victoria house at McCracken's landing. As the lake suddenly became very rough we were unable to return by row boat and we must not forget the kindness of Mr. Tully, the owner of a small steam yacht, 'The Tramp,' who brought us safely back to our cottage. This yacht is kept for the accommodation of visitors and is capable of carrying from 15 to 20, and may be engaged at very reasonable rates.

From Grassy Island we visited Fairy Lake. Landing at Hurricane Point, we climbed a steep, rocky, rugged, crooked path, until as beautiful view lay before us as ever delighted the eye of man. The surface of the lake is about fifty feet above the level of Stoney lake. It has no visible outlet or inlet. The water is as clear as crystal, and the shore, which is almost round, is covered with a beautiful growth of green trees. At the edge, but too far out to reach, are white water-lilies. Many visitorage their boats to this lake and from the water they can enjoy the scenery to perfection.

From Fairy Lake we came to Eagle Mount. This is one huge solid rock rising up out of the water, partly red granite, anything but regular in shape. I should consider it to be between 175 and 200 feet high. At one side is a derrick and considerable quarrying has been done. With considerable difficulty we climbed to the top, and I think it will be pardonable if I remark the activity and courage of our hostess, who is comparatively an old lady, and who reached the top quite as soon as the rest. The view from here is well worth the painter's brush. But I need not describe it. We see at a glance a veritable 'Canaan,' and wonder if Eden itself were more fair, I might mention that here and at Fairy Lake one might fill a large pail in a short time with fine huckleberries growing on low bushes on the shallow earthy out of crevices in the rocks.

Now to return to our round trip. Arrived at Burleigh, which is almost pure rock, we were raised by two installations a height of 37 feet by means of a double lock, which consists of three sets of gates.

On passing through Burleigh locks we sailed through the new channel into a little lake which boasts the very expressive name of Lovesick. At this point one gentleman was quite sick, but whether he was lovesick or seasick I cannot say.

QUEBEC CONFERENCE.

Sir Wilfrid Laurier Absent at His Brother's Funeral.
THE YANKEES HAD A CAUCUS.
OUR IMPERIAL PENNY STAMP.

A Considerable Number of Memorials Will Reach the American Delegates This Week as Well as Quite a Number of Deputations—Copyright Question—The Americans Pleased.

Quebec, Aug. 30.—The International Conference resumed its sittings promptly at the appointed hour of 11 o'clock yesterday morning. Sir Wilfrid Laurier who was absent in Arthabaska, at the funeral of his brother, the late Dr. Ubalde Laurier, which took place yesterday, did not reach the city till 2.30 o'clock in the afternoon, when he at once proceeded to the council chamber where the conference was convened. Sir James Winter was the other absentee, not having yet returned from the Adirondacks.

In the morning the American commissioners held a private meeting at the Chateau Frontenac, to consider a number of memorials forwarded to them from various parts of the United States on a variety of subjects. The American commissioners appear likely to have a considerable number of memorials sent to them during the present week, judging by accounts from the interior, and will also be kept fairly busy receiving deputations. The Chamber of Commerce of Boston has sent word that it is sending on a delegation to interview the American commission, and another is on its way here from western lumbermen who do not take the same view of things with the lumbermen of Michigan, and who want the present duty on sawn lumber taken into the United States retained.

The Boston delegation will have a good many suggestions to make on these subjects, in particular with the fisheries, reciprocity and the bonding privileges. The interest of the New England States in these three questions are paramount, and in some respects at variance with the interest of the more Western States of the Union.

It is understood that the question of the copyright laws of the United States and the Dominion, though not now embodied in the protocols, is likely to be added to the subject which will come up for consideration. This question of copyright is a very vexed one, and its settlement by the conference would be welcomed by the great mass of authors and publishers.

Hon. R. D. Dobell will entertain the delegates to the convention at dinner on Thursday evening.

The American commissioners are highly satisfied with last week's proceedings, and one of them stated that so far no obstacle had yet appeared in the way of the commission and from all appearances the general adjustment of matters, so far discussed, would end in a very satisfactory manner.

Detroit, Aug. 30.—Don. M. Dickinson has returned from Quebec, where he was called on legal matters within the jurisdiction of the International Commission. He will make a report on his mission at a meeting yet to be called of the Committee of Lumbermen.

THE LIGHT THAT FAILED.
The Power House of the General Electric Company has been destroyed—A Very Serious Fire.

London, Ont., Aug. 30.—At 1 a.m. the fire at the London General Electric power house was reported under control, but the machinery and costly plant is a total loss, and the city is deprived of all power coming from that source.
