# The Way We Do Merchant Tailoring.

We import Cloths direct for ourselves to begin with, and take advantage of all cash discounts in the buying. We employ none but the very best sewers and tailors, and charge little enough to tie your trade to us. That means we don't have to make our profit off merchant tailoring alone. This is but one of twenty departments here, all under capable management, and with ample resources at command. We have advantages other stores know nothing of, enabling us to give better values than you ever knew before in

Suits to order at \$15.00. Suits to order at . 18.00. Suits to order at. 24.00.

The simple fact is that we can save you money. That's the persistent aim of this business, month in and month out, to make your dollars go farther here than anywhere else in Canada. Large experience in the tailoring business has taught us what to buy and what to let alone, how to do things and how not to do them. There's no guesswork about it, and nothing haphazard about anything we undertake. We can do better for you in Merchant Tailoring than any store. Put us to the test

The Rider & Kitchener Factory.

Work is being pushed vigorously on the Rider & Kitchener veneer factory, and indications point to operations being commenced by Sept. 1st. Large quantities of wood for manufacturing purposes has already been placed on the ground. Telephone connection has also been made, and the firm anticipate a brisk opening trade, as large orders have been received for immediate delivery. That the factory will be a great benefit to the southern portion of the town is a question beyond dispute. There are yet many vacant lots in the vicinity for the convenience of the employees no doubt many of these lots, will be bought up and built upon. Laud in this locality has greatly depreciated in value of late, and the owners will now sure-ly reap the benefit of the placing of this new industry.

A Fine Cluster of Tomatges. We were shown by Mr. Samuel Parsons, of the north ward, a small branch taken from a tomato vine in his garden, on which were sixteen well developed tomatoes, each as large as a fair sized apple. Mr. Parson names the variety the grape tomato. It is undoubtedly the most prolific variety we have ever seen. The cluster of tomatoes are on exhibition at Somes'

A False Alarm.

Monday evening at 6 o'clock Thos. Bick, butcher, Academy of Music block, noticed smoke pouring into his shop from the cellar below. Not being able to gain admittance to the cellar, he gave the alarm of fire. This brought Manager Burke to the scene, who at once set the minds of the people at rest by informing them that it was only smoke from the furnace, and no danger need be feared. The fire team did not arrive for some m'nutes afterwards.
