The Canadian Lost.

LINDSAY, FRIDAY, OCTOBER 27, 1893

appears that our barley does not make the particular kind of beer Englishmen relish, but our cheese tickles their palates, and is rapidly growing in favor. No doubt our phenomenal success in carrying! off premiums for that article at the World's fair in competition with the states of the American union will lead to a greatly increased demand for that excellent article. The market is an unlimited one; there is the farmers to do what they can improve the quality bylkeeping the breed of cows best adapted for copious and rich milk-giving on the lowest food supply. In this connection the results of the tests made at the World's fair under the most favorable conditions may be of Jerseys, Shorthorns and Guernseys; for and Holstein cows at the fair refused to

enter the competition:-"During the fifteen days testing-time the twenty five Jersey cows gave 13,296 4 lbs. of milk, from which 1,451 76 lbs of cheese, valued at \$19398, was produced They were also credited with 11,578.7 lbs. of whey, valued at \$9.26, and 327 lbs. increase in live weight, which was valued at \$14.72, making the total credited to the Jerseys \$217.96, from which the cost of their food, \$98.14, being taken, leaves a net profit of \$119.82 on the milk given in fifteen days by twenty-five of the best Jersey cows that could be gathered to Chicago. Of course if the interest on the supposed value of these high priced cows were deducted, together with the cost of attendance and the cheese-making, the net profit would be considerably reduced, still it would amount to nearly twenty-five cents per day for each cow. The twentyfive Guernsey cows during the same time produced 10 938,6 lbs. of milk, from which was made 1,130,62 lbs of cheese, 9,666,7 lbs. of whey and they gained in live weight 480 lbs., for all of which they were credited with \$164 55, while the cost of their food was only \$76 25, leaving a net profit of \$88. 30. The twenty five Shorthern cows produced 12,186.7 lbs. of milk, and the cheese weighed 1,077.60 lbs. also their whey weighed 10,838,9 lbs., and the gain in live weight was something unusual, 709 lbs.. or nearly an average of two lbs. daily to each cow. These three items of produce were valued at \$180 72 and by taking the cost of the food consumed, \$99 36, from it leaves a net profit of \$81,36. In this test the Jerseys led decidely in the profit per pound of cheese produced yet the Guernseys produced a pound at the lowest cost for food."

In the class for Cheddar cheese, made previous to 1893, Canada won 103 awards, the United States not one : in classes for Cheddar cheese of this year's make, Canada carried off 369 awards against 45 to the United States, and the to ascerts in the prob ble cost of completing a Dominion had 130 exhibits of cheese fassibility of establishing a new roadway along the wheat crop this year as compared with last which scored higher than the highest and 4th concession lines. - Carried Moved by of United States make. takership of the posteffice, rendered vacant by the death of the late Wm. McMann, braith, his application having received the active support of Mr. Sam. Hughes and Senator Dobson. The lucky applicant is a well known citizen and capable of performing the duties appertaining to the office satisfactorily to all, but the appointment is a surprise to many conservatives, who thought that barring an arrangement allowing the widow to hold the position, the right of Mr. John Kelly, a life-long worker in the conservative ranks, was incontestable. Mr. Kelly is to support Graham, Blackwell or any other apwell up in years, and his services to the who tendered their services at a reasonable salary. Mr. Walker, with his usual courtesy. party in the past deserved some such recognition. Mr. Galbraith is, compared with Mr. Kelly, a young man, and it find our shrewd deputy-reeve, bound as it were looks as if the party leaders were showing erty he should have in support of other applibase ingratitude.

EDITORIAL NOTES.

The north-west farmer has to pay 40c a gallon for an inferior oil costing in Petrolea from 9c. to 12c., and the hardy pioneers, who could get the best American oil at much lower price but for the tariff, are kicking vigorously.

have decreased over 17 per cent, within the past nine months, while imports have increased 3 per cent. And it was only the other day that the Empire and other tory organs gleefully announced a great falling off in exports to the States. Its an unformed on good anthonics that he instead of formed on good anthonics that he instead of healthy state of affairs when our two chief customers refuse to take our goods.

COMMUNICATIONS.

The Ops Collectorship.

[To the Editor of THE POST] Sir,-Permit me space in the columns of your valuable paper to direct the attention of the ratepayers of the township of Ops to the manner in which some of the members of the council exercised the duties of their office when the applications for the collectorship came before them for consideration, and to leave it to them It is understood about town that the careto form a judgment as to the amount of unprin cipled statesmanship which apparently characterizes their dealings in matters which affect has been conferred upon Mr. Wm. Gal- the interests of those whose confidence they are

Some months ago I observed that the position of my affairs would leave at my disposal for the coming season the necessary time to serve the township in the capacity of collector of taxes, and therefore made application for the same. After having done so, I interviewed the members of the council respectively in order that they might be thus afforded an opportunity of forming a judgment in reference to my ability to serve the township in that capacity. The

Mr. Byrne was anxious to become acquainted with all the applicants for the position, as it gave him an opportunity of making enquiries as to their respective abilities, and thereby enabling him to support them according stated that he could not grant my application his consideration, as he had promised Mr. Graham-a deplorable predicament in which to hand and foot, quite unable to exercise the libcants providing he saw they were favorable to the best interests of the township and the financial condition of its treasury. Consulting Mr. Ellis, I found him promised also, and at the same time entertaining some very shallow and nonsensical ideas, viewing them especially from municipal standpoint He thought that the township was under a very great obligation Mr. Graham since last year, and that he should have been pre-eated with a handsome sum noney out of the treasury if it had been in the power of the council to dogo. Nowif Mr.Gr.ham had been an old and faithful servant in the employ of Mr. Eilis, or were he say, a lady teacher in some rural district who had rendered long According to English board of trade mind of remantic youch, or some such instance of unusual faithfuiness, a present would then

Mr. Graham and by bargaining and bantering a very business like way of disposing of appli-cations. This probably accounts for Mr. Hop-kins' expression of regret about Mr. Robertson's York market last week. It would be interesting to know just what the Canadian farmers received for each animal, and if farmers son) could have been present? Three weeks the meeting on a day when he (Mr. Robertson) call the meeting on a day when he (Mr. Robertson) call the meeting on a day when he (Mr. Robertson) call the meeting on a day when he (Mr. Robertson) absence, which apparently made his position so embarrassing. If Mr. Hopkins was so anxious for Mr. Weese thinks the American buyer paid the duty over and above the \$350.

It is more than likely, judging from prices ruling in this vicinity, that about \$100 was the average figure received by the farmer for the \$350 animal.

Canadian farmers have good reason to be proud of the record made by them at the proud of the record made by them at the proud of the record made by them at the proud of the record made by them at the proud to the stream the condition of the stream to the condition of the stream to the present? Three weeks absence, which apparently made his position so each animal.

Canadian farmers have good reason to be proud to the each paid the duty over and above t

lame arguments brought forward when the cent. protective tariff, maintained at the cost of the people, is too soft a "snap" to be willingly resigned.

Cable reports seem to prove that the Parnellites under Wm. Redmond have season of the year when it was convenient to market the same. Last year, however, the council were cognizant of the fact that there was a large shortage in the cereal product and fresh taken at 20c. his personal gain to collect the taxes as quickly as possible? Does it not make collecting a regulations made by the council, work can be done in two and a half months which occupied

This explains how the \$60 is saved the town-

price ples which should mark all true states.

manship .- Yours, Ops, Oct. 17th, 1893.

COMMERCIAL NEWS.

OFFICE OF THE CANADIAN POST. LINDSAY, October 27th, 1893. Ensiness and Produc-

Very little grain is moving as yet, the low prices causing the farmers to hold back in hopes of an advance-a hope for which there is very litle warrant. Wheat reached the lowest notch ever known in Chicago a few days ago. and with the American market closed prospects for any material advance in barley are poor. In the meantime business is suffering from a

scarcity of money, and a few thousands of

dollars put in circulation and passed from hand

to hand in the payment of outstanding debts would ease the strain to an appreciable extent. Wheat Prospects. "I think wheat is on the way to fifty cents a bushel," said an operator on Saturday. "There appears to be no end to the amount in sight. To-day will probably show stocks of 65,009,000 in elevators east of the Rockies, as against 59,000,000 bushels a year ago, and 34,600,000 two years ago, and the amount affoat is also larger. Consumption is apparently not increasing, owing partly to the depressed condition across the border. Europe produces fully one-half of the wheat crop of the world, and this year has over an average crop, but 50,000,000 less than last year. Some of the countries there depend more upon rye bread than wheat, and Europe raises nearly all of the rye and 80 per cent. of the potato crop of the world. The shortage in is mostly in the United States. France is short

demand for butchers' cattle was easy, the warm weather and poor quality combined to check trade. The best cattle here ranged from 31 to 310 per pound, but very little fetched the latter figure A small lot of picked cattle was sold at \$3.50 per cwt. Among the transactions were these:—A load, averaging 1,06) lbs, sold at was a fair demand for stockers and feeders; the supply was light, and feeders were of poor quality, and fetched from 3 to 3 c as an outside price. A lot, averaging 1,040 lbs, sold at 3 cents

paratively light as was the run no change occurred, for lambs have been lately in such iberal supply that we have just now a very moderate enquiry. A bunch of 104 lambs. averaging 82 lbs, sold at \$2.90 each; a bunch of 100, averaging 75 lbs, sold at \$2.50 each; and a bunch of 15, averaging 80 lbs, sold at \$3 each. are quoted at from \$3.25 to \$3.75, and occasionally \$1 each. Calves were also unchanged; about 20 here.

We had 873 hogs on the market, and prices weakened considerably, as \$6 was about the best price this morning. A large quantity of the supply was of unusually poor quality. Following is the general range of quotations at the western cattle yards Tuesday:-

COMING TO LINDSAY

We have just returned from Montreal, where we purchased the JAMES O'BRIEN Stock of Clothing. Mr. O'Brien has for years been recognized as the largest manufacturer of FINE READY-MADE CLOTH. ING in the Dominion. He is now retiring from business and for ready cash we purchased the stock.

We have no hesitation in saying that this is the largest stock of acknowledges it to be the fine good ever brought into Lindsay. The goods were all manufactured sweetest, coolest smoking to- for fall, therefore they comprise all the latest styles. The ULSTER bacco made. It does not bite OVERCOAT is again the proper garment for winter—we have hundreds the tongue, and is positively of them to select from.

We have always sought to procure the best goods in the market, and are confident our reputation in that respect is established. WE WONT RECOGNIZE SHODDY. Those goods were bought so cheap that we can easily undersell anyone in the trade.

We would like to show you those goods whether you intend pur-
