prescribe Scott's Emulsion of Cod-liver Oil and Hypophosphites because they find their patients can tolerate it for a long time, as it does not upset the stomach nor derange the digestion like the plain oil. Scott's Emulsion is as much

easier to digest than the plain oil as milk is easier to digest than butter. Besides, the fishfat taste is taken out of the oil, and it is almost palatable. The way sickly children, emaciated, anæmic and consumptive adults, gain flesh on Scott's Emulsion is very remarkable.

Progress of the Boring for Oil at Athabasea Landing -Rumor That Pelletier of Quebec Will Obtain the Vacant Portfolio-Farwell Dinner to Mr. Patterson.

Ottawa, Ont., Oct. 7 .- A farewell dinner was given to Hon. Manitoba, at the Rideau Club to-night About 50 gentlemen were present. Sir Mackenzie Bowell presided. The toast of the guest of the evening was enthusiastically received. The Hon. Mr. Patterson, in the course of his reply, said: Circumstances have so ordered it and I find mysef to-night at the parting of the ways with my face to the setting sun, bound for that great west with which the future of the Dominion is so intimately intertwined. The importance to Canada of these fertile plains was long since recognized. Some 30 years ago Macdonald and Brown labor d in concert for their acquisition. Later on, Cartier and Macdougall completed the work, and since then some of the most stirring events in Canadian history have been closely associated with their acquirement and development. The labors of our statesmen have borne fruit and now at the portals of our great west stands a Province destined to have a glorious future. All who have visited Manitoba bear unanimous witness to its capacity to be the home of millions. Many regret the slowness of its growth in population, but that, it may confidently be predicted, will soon be remedied. It is questionable whether the slowness of its growth hitherto has not had its advantages. Upwards of 90 per cent, of the present population of Manitoba are natives of older provinces of the Dominion or children of natives of these provinces. They have taken with them to Manitoba that sturdy capacity for selfgovernment which characterizes the provinces from which they came, and are in the new home with which they have identified themselves building up a community imbued with all the best characteristics of our northern race, self-controlled, law-abiding, industrious and inspired with faith in themselves and hope for their country. The growth of Winnipeg has been remarkable and we all rejoice in its restored prosperity. "Winnipeg," said Sir John Macdonald, in the early 80's, "in 50 years will be the capital of Canada." That prophecy, which sounded at the time as a mere bit of pleasantryone of the old man's jokes-has grown less visionary each succeeding year. But one decade has passed since it was | Father and Sou Killed in a Riot at Tons uttered, four have yet to run, and I venture to think that ere two more have rolled by the fulfilment of Sir John's prediction will be seriously discussed. The people of Winnipeg have great faith in themselves, and where hour Monday morning, and up to the their interests are concerned they have present time 14 men have been ara knack of making themselves heard. Asked as to the probable result of the Prohibition Appeal before the Privy Council, Sir Oliver responded that should the members of the Judicial Committee take the same view as did those who sat on the Scott Act appeal some years ago, it followed that the Province had no jurisdiction in the matter. The Dominion Act had been valid and if the Province had no right to legislate on the question of local option it had no right to do so Fatal Jump of a Hunter on a Dark on one of total prohibition. During his stay in London he took a deep interest in the appeal of the Legislature of Nova Scotia against the decision of the courts declaring that the Legislature has no right to vote itself and its individual members the same privileges enjoyed by the House of Commons. In this case it was on the right of the Nova Scotia Assembly to commit for contempt of court a Halifax editor who refused to appear before it and receive the censure of the House on an alleged libel he had published. This work of falsely recommending

It encourages deception and falsehood; it brings the public to the position of slaves to the will of grasping dealers; it tends to prolonged sufferings and agonies when the sick are forced to buy what they do not ask for; and lastly, the vile work of substituting assists the spread and circulation of preparations that should be prohibited by law.

This work of recommending poor and trashy medicines when Paine's Celery Compound is asked for, is meeting with its just reward in many places. The substituting and deceptive dealers are being shunned, and the money for Paine's Celery Compound goes into the hands of upright and honest business men, contented with moderate profits, and who are anxious to give men, women and children just what they ask for.

The great desire of sick and diseased people is a new life, which means health, strength and bodily vigor. This condition is surely and speedily realized when Paine's Celery Compound is used.
