LINDSAY, FRIDAY, OCT. 16, 1896.

MARIPOSA FALL FAIR.

THE MOST SUCCESSFUL EXHIBITION EVER HELD.

Fine Horses, Cattle and Sheep—Every Department Well Represented—A Large Attendance.

The forty-eighth annual fair under the auspices of the Mariposa agricultural society was held at Oakwood on Thursday and Friday, Oct. 1st and 2nd. The attendance was larger than usual, and entries also showed a large increase, coming from all sections of the county, there being many from Lindsay.

In horses there was a splendid showing, and in some classes it was a difficult matter for the judges to select the one most deserving of the red ticket.

In draughts Mr. Alfred Webster carried off three firsts, while John Bagshaw, Norman Gillies, V. Dale, John Campbell and P. S. Mark showed some fine animals.

In agricultural horses the showing was good, and it is quite evident the farmers of Mariposa appreciate the value of good horses on the farm.

In the general purpose class the grade of horses also showed a marked improvement over previous years, some fine animals being exhibited.

In road or carriage horses there were many entries of clear, well-bred equines, as the average farmer now keeps at least one, if not two horses of this class, specially for driving.

In thoroughbred Durhams and grade cattle, Mr John Campbell, the well known stock raiser, captured all the first prizes. Messrs. P. S. Mark, R. Eagleson and Peter McCorvie also showed several fine animals in the above classes.

In Holsteins, T. H. Smiley and Wm. James were the principal exhibitors.

The large number of exhibits in sheep of different breeds convinced us that great attention is now paid by the average farmer to raise the standard in this well paying branch of his business. In Cotswolds, F. Smallwood and John Gibbs had honors about evenly divided between them. In Leicesters, Messrs. D. C Ross, John Bagshaw and S. Metherell had some fine pens. In Shropshire Downs, the prizes were divided between Messrs. John Campbell, A. McMillan and D. Weldon.

The several breeds of swine were well represented by some fine porkers shown by Messrs. Wm Rich, George Mark, Wm. Thorndike, W. P. King, V. Dale; Dannis Hawkins still maintains his lead in Berkshires, and as usual took every prize in the class.

In poultry there were eighteen different varieties or breeds shown, many of the birds having won prizes at other shows.

The grain and roots department was well stocked with an usually large number of entries, which, taken with the fruit and dairy department, proves that the products of the "banner township" are second none in the Dominion.

In the ladies' and fine arts department there was a bewildering array of beautiful artistic work, as well as many useful ones, a great deal of which is never fully appreciated till the time, patience and skill that is necessary to produce such results are considered. Some of the ladies' work and the little sketches and paintings would have graced a much larger exhibition than the Mariposa township fair. Among the most extensive prize winners in these lines were Mrs. T. Greenway, Mrs. J. Short, Mrs. Arch. Macmillan, Mrs. D. Brown, Mrs. W. Mark, Mrs. D. Weldon, Mrs. Chas. Coad, Mrs. W. Lownsbrough, Mrs. Dandas and Mrs. W. R and J. P. Cunnings.

In manufactures, Mr. R. S. Robertson, the well known carriage builder of Little Britain, had an attractive array of all kinds of vehicles of his own manufacture, which were worthy of special note. It is well established fact that success has long since crowned Mr. Robertson's efforts to turn out work equal to anything to be found in large towns or cities. Other exhibitors in their class were Mr J. W. McCullough, who showed some up to-date scuffler. Mr. A McLean and R. S. Robertson were the only competitors in the manufacture of horse shoes. In harness of all kinds Mr. E Prouse proved that there is nothing like leather by securing all the first tickets. In a collection of tinware Mr. Geo. Mason had an exhibit which must have been the envy of every farmer's wife present.

A handsome display of furniture, which attracted much attention, was made by Mr. O. Wakely, the local dealer.

NOTES OF THE FAIR.

Mr. Ted Soanes, Lindsay's "crack" confectioner, had a booth on the grounds, and dispensed refreshments to the large crowd. We noticed he had a big run with his toothsome red hot taffy.

The Oakwood brass band played several well rendered selections during the afternoon.

The concert in the evening, under the auspices of the agricultural society, was very successful considering the short notice given.

The exhibitors in the various departments speak in the highest praise of the liberal way in which the judges, directors and officers, discharged their duties. Even from the standpoint of a township fair, pure and simple Mariposa's annual fair is ahead of all.

We are indebted to Mr. J. P. Cunnings, obliging secretary, for the following

—Carried. Mr. Lownsbrough reported on the accounts per Mrs. Johnson, of Manilla, when Mr. Shaver moved, and Mr. Mark seconded, that an order be drawn on the treasurer in favor of the following accounts:

Dr McPhail, medical attendance	$ 6 00
Mrs McPhadden, waiting, etc	1 50
Miss McInnis, work	6 00
Mr Sanguine, digging grave	2 00
F Savage, horse hire and time	2 00
Louis Pearce, account	1 60
R Simpson, for wood	5 50

—Carried. Mr. G. Smith, surveyor, of Woodville, waited on the council, showing profile of the McArthur drain, also culvert under the railroad, when the following resolution was moved by Mr. Adam, seconded by Mr. Swain, that the attention of the Midland R. R. Co. be called to the necessity for their enlarging and deepening their culvert across the railroad track on N ½ lot 15, con. 15, Mariposa, to at least five feet wide and to the depth shown on the attached profile, as the municipal drain under construction is finished up to said point, and when completed said track will form an obstruction and the spring freshets may cause a washout.—Carried. Applications for collectors were received from J. J. Sloan, Peter Brown and Jesse Weldon, when J. J. Sloan was appointed collector for the south and Peter Brown collector for the north half of the township, at a salary of $45 each, and By-law No. 471 was moved by Mr. Mark, seconded by Mr. Swain, and after passing through its several readings, was signed and sealed, confirming the appointments. Messrs. Thomas Webster, James Webster, Albert Davidson and Lorenzo Davidson, waited on the council asking them to open the concession road on the 7th line, eastward to the boundary of Ops, and Messrs. Shaver and Mark were appointed to look into the matter and report at next council meeting. Moved by Mr. Swain, seconded by Mark, that this council adjourn, to meet again on the second Monday in October for the transaction of general business.—Carried.

J. B. WELDON, clerk.

A Worthy Publication.

We take pleasure in commending to our readers The Westminster Magazine, a monthly paper for the home, published in Toronto, the fifth number of which we received last week. Seldom have we scanned a number of a new magazine with deeper interest, and it is impossible to suggest an improvement in any respect. The public events of the day are treated in a bright and attractive style, and in addition to short stories and new poems there are many thoughtful articles on interesting subjects. The price is 15 cents per number, or $1 50 a year, but new subscribers for 1897 will receive the October, November and December numbers free.

FOGS AND ICEBERGS

Will Operate Against the Fast Atlantic Steamship Line.

SO SAYS DR. SANDFORD FLEMING

Vessels of Moderate Speed Will, He Thinks, be More Profitable for the Conveyance of Merchandise—The Crops in the Northwest and British Columbia.

Ottawa, Ont., Oct. 9.—The decision of the Ministry regarding the fast service will be made known in a day or two. Mr. Laurier, Sir Richard Cartwright, Messrs. Mulock and Davies had a conference this afternoon on the matter. Meanwhile a pamphlet by Dr. Sandford Fleming on the fast steamship service, just published, is likely to excite a keen controversy. He discusses the St. Lawrence route and reluctantly inclines to the belief that, on account of fogs, icebergs, etc., a fast line to and from Quebec or Montreal, is out of the question. His conclusions are as follows: (1) That any attempt to establish on the St. Lawrence route a line of fast trans-Atlantic steamships to rival those running to and from New York would result in disappointment.

(2) That our great waterway will always be employed to the greatest advantage in the conveyance of staple products and all ordinary cargo merchandise, at the lowest possible rates, and that to secure low rates it must be carried in steamships of moderate speed.

(3) That steamships suitable for the trade of the St. Lawrence in summer would, at the close of navigation, find an open harbor at St. John, N.B., the nearest eligible Canadian seaport for ships on the St. Lawrence.

(4) That if we desire to establish a Canadian line of passenger steamships equal in power and speed to any on the ocean it will be necessary to make it an "all-the-year-round" line from one of our best Atlantic seaports.

(5) That there is no more eligible harbor on the western side of the Atlantic than Halifax or on the eastern side than Loch Ryan, Wigtonshire, in Scotland, and that between these two points will be found the shortest available route across the ocean which can be used by the fast steamships at all seasons of the year.

In official circles there has been considerable talk to-day of the record trip of the Dominion Liner Canada, which arrived in Quebec early this morning. Colonel White, Deputy Postmaster-General, says that a line of fast steamers, leaving Montreal on Thursday, would get the cream of Canadian mails, and prove a great boon to the business community. Usually the mails for the fast mail steamer, leaving New York on Wednesday, close in Eastern Canada on Monday, and there is not another mail out via New York until the Saturday following. Hence a fast Canadian liner leaving on Thursday would get three days'—Tuesday, Wednesday and Thursday—mails to carry, Friday's mails being reserved for New York.

Prof. Saunders, Director of Dominion Experimental Farms, who has been absent for more than six weeks inspecting the western experimental farms and enquiring into the condition of agriculture in the west, returned to Ottawa to-day. He reported grain crops in British Columbia as rather below the average, and the fruit crop also lighter than usual. Both grain and fruit were injured by a long period of cold, wet weather, which began about the middle of May and continued for about a month. Under these circumstances fruit trees, which were full of blossoms, set their fruit sparingly, and the growth of grain was retarded. Following this the weather became unusually hot and dry, and the drought, which continued almost without a break until the middle of September, ripened the grain prematurely and prevented the fruit from attaining its usual size and quality. Notwithstanding these disadvantages, a large quantity of fruit has been produced in British Columbia, and shipments to Manitoba
