Ayer's Remedies.

The Only One To Stand the Test.

Rev. William Copp, whose father was a physician for over fifty years, in New Jersey, and who himself spent many years preparing for the practice of medicine, but subsequently entered the ministry of the M. E. Church, writes: "I am glad to testify that I have had analyzed all the sarsaparilla preparations known in the trade, but

AYER'S

is the only one of them that I could recommend as a blood-purifier. I have given away hundreds of bottles of it, as I consider it the safest as well as the best to be had."—Wm. Copp, Pastor M. E. Church, Jackson, Minn.

THE ONLY WORLD'S FAIR

Sarsaparilla

When in doubt, ask for Ayer's Pills

The Canadian Post.

LINDSAY, FRIDAY, OCT. 30, 1896.

The Modern Demon.

Dethroned and Banished by Paine's Celery Compound.

Mr. A. Budd Suffered 35 Years From Dyspepsia.

NOW WELL, HEARTY AND STRONG

It is freely admitted by physicians and all others who have had experience with Paine's Celery Compound, that it is the only medicine which can dethrone and completely banish that terrible enemy known as dyspepsia.

It is a great mistake to imagine that this demon of disease can be banished by pills, sarsaparillas, nervines, mineral waters, pepsins or bitters. These preparations and concoctions may give a short respite from pain and suffering; but to effect a permanent cure a medicine is required that will strengthen the nervous system, and remove the cause of the digestive troubles.

Paine's Celery Compound goes directly to the root and seat of the disease; it cleans up the sewers of the body, and removes the waste matters that have so badly interfered with nutrition. It does a great work without lessening the full strength of the sufferer, and has not the injurious effects of the common catharties that irritate and weaken every part of the system. Paine's Celery Compound enriches and cleanses the blood, makes bone and muscle, supports and braces the nerves, gives perfect digestion, healthy appetite, and sweet sleep and rest.

If you are one of the thousands bound by the chains and shackles of dyspepsia, we pray you give Paine's Celery Compound a fair and honest trial. In the past it has cured the most obstinate cases—men and women who were given up by the doctors as incurable.

Mr. A. Budd, of Shanty Bay, Simcoe Co., Ont., writes as follows about the efficacy of the medicine that cured him:

"For the benefit of sufferers, I gladly give my experience with Paine's Celery Compound.

"After suffering from dyspepsia for thirty-five years, and meeting with many failures with other medicines, I decided to use Paine's Celery Compound, having heard of so many cures effected by it. The Compound, after I used it for a time, produced miraculous results and banished my troubles.

"From a condition of helplessness—being unable to sleep or eat—I now feel well and strong. I am astonished at the results, as my trouble was an old and chronic one. I have recommended Paine's Celery Compound to some of my neighbors, and in every case it has given satisfaction. I will always strongly recommend its use when I have opportunity."

Book Binding

Orders for book-binding should be left at this office. It is surprising how nice a volume can be made of these magazines, even though they are somewhat soiled from much handling.

One Minute Cure for Toothache.

Magical in potency and power, penetrating at once to the diseased nerve. Nerviline—nerve pain cure—cures toothache in a moment. Nerviline, the most marvellous pain remedy known to science, may be used for all nerve pains. Test at once its efficacy.

The Football Player.

'Tis not the man whose feet are large
Who makes the swiftest sprinter;
'Tis not the girl with temper hot
Who best endures the winter;
'Tis not the hen that cackles loud
Who makes the steadiest layer;
'Tis not the biggest head of hair
That makes the football player.

Bidding Farewell.

The members of Camp Fair Maid of Perth, Sons of Scotland, met in their hall last evening for the purpose of giving a hearty send off to Bro. James Smith who is leaving for Lindsay. A tempting spread was provided by Gibsons. After doing justice to it the chair was taken by Bro. A. McLaren, M.P., who spoke highly of the departing brother and wished him success in his new home. Similar speeches were made by Bros. Gray, McEwen, McCallum and others. Bro. Smith thanked the brethren for their entertainment and kind words. The remainder of the evening was spent in singing, and the gathering closed with "Auld Lang Syne."

The foregoing extract from the Stratford Beacon refers to Mr. James F. Smith, who assumes the managment of D. J. McIntyre's farm in Mariposa. Mr. Smith hails from Aberdeenshire, Scotland, where he put in his apprenticeship at farming, which since he came to this country seven years ago he has followed with leading farmers in the neighborhood of Stratford, principally Hon. Thos. Ballantyne and his family.

OUTRAGEOUS IF TRUE.

A British Subject From Halifax Practically Kidnapped and Held as a Lunatic in New York.

Halifax, Oct. 28.—An evening paper prints a sensational story to-day, in which it is charged that William O'Connor, a British subject, who went to New York from Halifax in 1892, was for four years confined in the Insane Asylum on Ward's Island, though he claims to have been perfectly sane all the time. O'Connor, who has just returned to Halifax, says he secured his release, by persistently insisting that he was not insane, and with the assistance of his friends, with whom he communicated clandestinely, he alleges that letters which he would ask officials to send for him never reached those for whom they were intended. According to the man's story, Rev. Dean Partridge of Fredericton received one of his letters, and on communicating with the chairman of the N.Y. State Lunacy Commission, the latter took measures that resulted in O'Connor's release, with enough money to take him to Canada. O'Connor states that the authorities insisted on him leaving New York State, and gave him $20 to pay expenses. He charges that he was practically kidnapped in New York four years ago, and railroaded to Ward's Island, when he went to Bellevue Hospital to consult a physician about insomnia, from which he was a chronic sufferer. He says there are any number of sane persons in Ward's Island Institution, and one of several other statements is that the place is in the hands of a nest of boodlers. O'Connor intends to present his case to the British Government and ask them to demand reparation for what he claims was enforced and wrongful detention. The man was a teacher in a private school in Halifax before he went to New York, where he was engaged in literary work for a publishing house before being sent to Ward's Island.

THE PRESIDENTIAL ELECTION.

It Will be Held Under New Conditions, and the Result Will Not be Known for 24 or 48 Hours After Polling.

Washington, Oct. 26.—The coming Presidential election will be held under conditions which have never before prevailed, and which will render the official count a matter of difficulty and unusual delay.

Since the last Presidential contest almost every State which had not then adopted the Australian ballot system has by State enactment prescribed some form of secret blanket ballot, either based on the Australian plan or closely resembling it. The only exceptions are Georgia, Louisiana, North Carolina and South Carolina. In the first three States named the old open ballot system prevails and the election machinery is in the hands of the State authorities. In South Carolina there is what is called a "reform ballot," the avowed purpose of which is to restrict the votes of illiterate negroes. In nearly all the other States blanket ballots will be cast, and in many of them the count will be complicated by the fact that State, legislative and county nominations are printed on the same ballot with the names of Presidential electors. Connecticut has an envelope system and New Jersey prints each party ticket upon a separate ballot. Should the election be in any way close, it is, therefore, quite possible that it may be 24 hours, or even 48 hours, after the polls close before the result is known with absolute certainty. In States like Nebraska for instance, where, according to conservative opinion, there may not be a margin of 5000 votes either way, it will be impossible to arrive at a correct judgment until all the back counties are heard from. The polls in the cities close at 4 p.m., but in the country districts keep open until 6 p.m., and with a Governor, a legislature and county officers to elect, all on one ballot, it will take at least six hours to complete the count.

Party Managers Very Busy.

New York, Oct. 26.—The last week of the political campaign finds the Democratic and Republican party managers very busy. There were a large number of callers to-day at Republican headquarters. Committeeman Joseph H. Manley said to a representative of the United Associated Presses: "We enter upon the last week with more confidence and more ardor than ever. We are certain of winning, and the only question is how large McKinley's majority will be."

Chairman James C. Truman of the Democratic State Executive Committee, who was called on subsequently by the reporter, was equally as sure that Bryan would carry New York State by a substantial plurality.

OVER A MILLION LOST.

Big Grain Elevators at Chicago Gone Up in Smoke and a Million Bushels of Wheat Burned.

Chicago, Oct. 26.—In less than an hour at noon to-day fire destroyed $1,200,000 worth of property on the north branch of the Chicago River in a dilapidated locality known as Goose Island. The Pacific grain elevators A and B, owned by the Chicago and Pacific Elevator Company, were completely destroyed and several frame dwellings adjoining were swept away. There was more than 1,000,000 bushels of wheat stored in the two great elevators. The loss on that is estimated at $561,000, on corn $34,800 and a small loss on oats. The loss on the building and machinery is placed at nearly $500,000. The insurance fully covers the losses. Supt. Perry said the fire started in elevator B, in the south part, and he believes it was caused by sparks from a passing tug in the river. No employe of the company knows anything more definite about the origin of the destruction.

Thousands of spectators gathered and cheered in wonder and admiration at the grand sight, unique in the annals of fire history. Great bins, containing thousands of bushels of dry grain, one above the other, were eaten gradually away by the flames. One bin withstood the destroyer longer than the rest and hung suspended in the air. One side caught fire near the bottom and the heap of grain, released from its confinement, poured to the ground a hundred feet below, to be met by the flames in its descent, the whole forming a picture of a burning Niagara.

MONEY SAVERS

For Families Who Desire to Economize.

DIAMOND DYES THE AGENTS.

It would require many large volumes to give a complete record of all the strong testimonial letters written by the women of the country in favor of Diamond Dyes. These indispensable aids in good housekeeping are gaining in public favor every week, and once tried, they become permanent home favorites.

Just think of it! One package of Diamond Dye will color from one to six pounds of goods, according to shade desired. This is wonderful work when the small expense is considered.

Your last year's jacket, suit, cape, dress, and your husband's suit and children's clothes, may be soiled, faded and unsightly; but with a ten-cent package of Diamond Dyes you can work wonders, and make the old things look like new for this season's wear.

Have you ever tried this work with Diamond Dyes? One effort in this direction of true economy will convince you that Diamond Dyes are money savers to the family.

CUSTOMS DECISIONS.

Hon. Mr. Paterson Has Some Questions to Settle.

LUMBER DEAL OF TWO MILLIONS.

All the Ottawa and Chaudiere Mills Have Sold Out—English Firms the Principal Buyers—Sample of the Grain Standards — General News From the Capital.

Ottawa, Ont., Oct. 26.—Hon. Mr. Paterson has before him half a dozen decisions which the Dominion Board of Appraisers passed. The only one which is of any public interest is in reference to the entry of maltine not containing any alcohol. The ruling of the board is of course final, and cannot even be changed by the Department, so the possibility is that only a couple out of the half dozen decisions will be confirmed.

There is considerable activity in lumber circles just now, English buyers rushing shipments before navigation closes. One hundred milliom feet of the season's cut of deals at the Chaudiere, Ottawa & Hawkesbury Mills have been sold during the past few days. This quantity of lumber represents the whole cut of this class of lumber in the mills of J. R. Booth, Buell, Hurdman & Co., W. C. Edwards and the Hawkesbury Lumber Company of Hawkesbury. Gilmour, Hughes & Co. are the only firm that still holds any deals unsold. It is the biggest sale that has been negotiated in lumber for some years, although there is no material change in prices from last year, amounting to about $2,000,000. The largest buyers are J. Cox & Sons of Liverpool, Eng., but other English and American firms have bought. The last bargain was struck this morning, when Cox & Sons bought out the remainder of J. R. Booth's cut, which had not been picked up by other buyers. Other firms that have bought besides Cox & Sons are J. W. Todd & Co., Dobell & Bagot, John Purcell & Son and Sharpels & Co., Quebec.

Two Indian agents who come within the category of offensive partisans have been dismissed—Ladislas Eucher Otis, Indian agent at Pointe Bleue, Quebec, who has been in the service since 1873, has been dismissed. J. Archie Alberic Moudow, Indian agent at Pierville, Quebec, has also been dismissed from the service. He was appointed in 1894. There are other recommendations of a similar character awaiting the attention of the Government.

Some queer tricks are often resorted to for the purpose of evading the law. A little while ago, before the close season for oysters ended, attention was drawn to the fact that an unusual quantity of barrels of potatoes were being shipped through St. John to the United States. The fishery officer at St. John suspected something was wrong, and out of curiosity decided to test one of the barrels of alleged potatoes. He found it to contain oysters, and, proceeding to examine the whole consignment, he found all the barrels filled with delicious bivalves destined for the United States. The entire shipment was seized.

Representations have been made to the Government that after the tariff is revised a period of six months be allowed to elapse before the changes go into effect. The Free Press says: "This, it is believed, would be nothing more than due consideration for the interests of the merchants and others, and will, no doubt, be thought over by the Ministers before the action is taken."

Acting under instructions from Sir Henri Joly, six sets of samples of all standards of grain recently chosen by the Western Standards Board will be sent to the High Commissioner for Canada in London, for distribution to the principal corn exchanges in Great Britain.

Complaint is made to the Fisheries Department by Frank Ross of Quebec, who possesses seigniorial rights on the Magdalen River, Gaspe County, that seven families of Indians from the north shore have located on Magdalen, and are playing havoc with salmon.

Sir Henry Joly will not be able to attend the banquet to be given to Mr. Laurier at Quebec on Wednesday. He has written a letter of apology and expressing the hope that the gathering will be a pleasant one.

Hon. Mr. Blair and Chief Engineer Schreiber left for Prescott to-day, where they were to take a steamer and visit all the canals as far as Cornwall. The Minister and his deputy leave for Peterboro to-morrow night and will look over the Trent canal works on Wednesday.

Mr. William Wainwright, Assistant General Manager of the Grand Trunk, says there is no truth in the report that he is to be appointed Deputy Minister of Railways and Canals. The latest rumor is that Mr. Pottinger may be given this position, and the office of general manager of Government railways filled by the selection of Mr. E. Wragge of Toronto, formerly local manager of the G.T.R. in that city. The Liberal Free Press suggests that a Deputy Minister and two chief engineers may be appointed, one for canals, the other for railways. This would be economy with a vengeance.

Sir Henry Joly has received the assent of his colleagues to an important change in Inland Revenue work in the Maritime Provinces. Hitherto there have been two Inland Revenue divisions in the East, one embracing Nova Scotia and Prince Edward Island, the other New Brunswick. These are now consolidated into one division, Mr. Burke, the inspector for New Brunswick, being placed in charge of the whole territory. Mr. Grant, the collector at Halifax, who was recommended as inspector for Nova Scotia by the late Government, will continue as collector. The net saving to the country by the change will be $2500 per annum.

The Northwest Mounted Police have had a pretty hard season in keeping stray cattle from the United States side of the line out of Canadian territory. In order to relieve the police three or four cowboys have been appointed to assist in driving the cattle back.

Representations have been made to the Fisheries Department of the immense destruction of small striped bass in the weirs on the St. Lawrence below Quebec. Unless measures be concocted to put a stop to this state of affairs there is a possibility of extermination of this valuable fish. It may not be generally known that striped bass commands as good a price in market as salmon. Hence there is a call for decided action by the Department, with a view to preserving this species. A total prohibition of weirs is suggested.

The analysts of the Inland Revenue Department are now at work on samples of vinegar obtained in the leading cities.

Mr. Coste, Chief Engineer of Public Works, left for Winnipeg to-day.

Commander Wakeham has gone to Washington to close up the affairs of the International Fisheries Commission, on which he is the Canadian representative.

Hon. Charles Fitzpatrick, Solicitor-General, is back from Quebec, where he had attended the garrison banquet to the Minister of Militia.

Hon. Mr. Paterson, Controller of Customs, goes to Montreal to-morrow to look over customs business there and to listen to any representations which business men may have to offer to him.

The total export from the Ottawa district to the United States as prepared by Consul-General Riley for the quarter ending 30th September last, amounted to $506,843. Of this amount $379,000 was of lumber. For the same quarter in 1895 the exports were $621,186, of which amount $493,389 was in lumber.

At the Mounted Police Department it is learned that the Indian murderer, "Bad Young Man," who killed a fellow red man near Macleod, has not been captured. He makes the second Indian murderer at large.

Probably Killed Himself.

Yonkers, N.Y., Oct. 26.—There were no new developments in the Andrus case to-day. Some boys found a quantity of dynamite in a vacant lot a short distance from the factory, but this discovery is not believed to have any connection with the tragedy. Chief of Police Mangin adheres to his belief that Andrus killed himself. There is considerable indignation over the course of the coroner in promising arrests and his repeated postponements of the inquest.

The Mail Pouches Were Rifled, but the Robbers Overlooked $2000.

Albuquerque, N. M., Oct. 25.—Information reached this city last night that both the White Oaks and San Antonio mail coaches had been robbed in the Oscuran Mountains. The mail pouches were rifled, the stage horses were taken and the drivers had to walk to the nearest station. The thieves overlooked $2000 in silver in their hurry. The thieves were recognized as belonging to the same band that held up a coach several weeks ago.

British Baronet Dead.

London, Oct. 25.—Sir Albert Abdullah David Sassoon, Baronet, died at his residence at Brighton last night, aged 79 years.

Storing Apples.

To keep apples and other fruit, store the apples in a cold place. Heat destroys more apples more apples than does cold, and alternate freezing and thawing is also disastrous. The location for the storage of apples is therefore more important than anything else. Store only sound, perfect apples, and do not allow even one to be bruised, as an imperfect apple may injure all in the barrel.

What Shall We Do With Our Girls?

In a recent issue of the Peterboro Review a member of the fortnightly club criticized at some length the girls who parade George-st. every Saturday evening. In Saturday's issue of the Review a writer defends the girls, and after referring to the cheerless life led by factory operatives, sewing girls and servants, winds up as follows:

All girls have the social instincts in a high degree, and where this instinct cannot be gratified, the gregarious instinct—the impulse to human companionship, if only of mere proximity, is to be accepted as an inevitable, if not an entirely satisfactory, substitute. Hence we see on our streets on Saturday nights especially, large numbers of girls who have no other means of reaching the social enjoyments which their more favored sisters have in unchallenged abundance. The desire for a harmless gossip (he average goal of ambition in social intercourse) is as intense in an overworked sewing girl or a kitchen "slavey" as in a society belle, and if, in this regard, the former make the much condemned street promenade the equivalent of the latter's "five o'clock tea" or "at home," they are, in the abstract, little to blame and deserve neither the patronizing pity nor the hard anathems of which they are the defenceless objects.

It is somewhat gratuitous pessimism to deduce lax morals from the presence of girls in the street who come there, it is charitable to assume, to secure the social recreation which their circumstances in life, as has been shown, forbid them to obtain elsewhere. While, of course, there may be found some who are not exactly counterparts of Cæsar's wife, it is safe to say that there will be found in the average Saturday night concourse of girls on George-st. as many virtuous girls as will be found among a similar number, taken at random, from the drawing rooms of what is called polite society, supposing the exact truth could be got in both cases.

As to the matter of dress. Is it only girls that promenade George-st. Saturday nights that "make a vulgar show" in order to catch the eye of young men? Is not the match-making mamma, that parades her marriagable daughters as a groom puts a horse for sale through his paces, a constant target of the satirists of society?

A MESSAGE TO MEN.

Proving that True Honesty and True Philanthropy Still Exist.

If any man who is weak, nervous and debilitated, or who is suffering from any of the various troubles resulting from youthful folly or excesses of overwork, will take heart and write to me, I will send him confidentially and *free of charge* the plan pursued by which I was completely restored to perfect health and manhood, after years of suffering from Nervous Debility, Loss of Vigor and Organic Weakness.

I have nothing to sell and therefore I want no money, but as I know through my own experience how to sympathize with such sufferers, I am glad to be able to assist my fellow-beings to a cure. I am well aware of the prevalence of quackery, for I myself was deceived and imposed upon until I nearly lost faith in mankind but I rejoice to say that I am now perfectly well and happy once more and am desirous therefore to make this certain means of cure known to all. If you will write to me you can rely upon being cured and the proud satisfaction of having been of service to one in need will be sufficient reward for trouble. Absolute secrecy assured. Send 5 cents in silver to cover postage, and address Mr. Geo. G. Strong North Rockwood, Mich.

Carries a Black Cat.

Mr. Geo. F. Rich, of Fenelon Falls, who proposes to start a saw works in Orillia shortly, is a droll man. He has captured a black kitten and carries it around in a cage hung on the handles of his bicycle. He explains that the black cat is the emblem of an order of lumbermen known as the Grand Conentination of Hoc-Hoos. This order has an annual meeting at some city in the United States on the ninth second of the ninth minute of the ninth hour of the ninth day of each year, and the membership is confined to lumbermen or dealers in supplies.—[Orillia News Letter.

October 25th, 1854—Battle of Balaclava.

Editor J. L. Montgomery, of the Marshall (Ill.) Democrat, states that for many years he suffered untold agony from Dyspepsia. At last he began to take Ayer's Sarsaparilla, and by the time he used six bottles he was as well as ever. Cures others, will cure you.

Among the South Sea Islanders, for a long time after their acquaintance with Europeans began, all values were expressed in axes.

Mrs. P. says: "My daughter was pale and weakly for two years; she took Miller's Compound Iron Pills for one month and is now well and strong." 50 doses for 25 cents.

Down to the Norman conquest the Britons had "living money" and "dead money," the former being slaves and cattle, the latter metal.

HOOD'S PILLS are easy to take, easy to operate. Cure indigestion, biliousness. 25c.

Piles! Piles! Itching Piles.

Symptoms—Moisture; intense itching and stinging, most at night; worse by scratching. If allowed to continue tumors form, which often bleed and ulcerate, becoming very sore. Swayne's Ointment stops the itching and bleeding, heals ulceration, and in most cases removes the tumors. At druggists, or by mail, for 50 cents. Dr. Swayne & Son, Philadelphia. Lyman, Sons & Co., Montreal, Wholesale Agents.

Poison in Them

Take notice of the school children who use lead pencils, and nine out of every ten of them will apply the point to the mouth half a dozen times in writing twice that number of words. Teachers should caution their scholars against this practice, as the lead in the pencil is poisonous; and writing can be done quite as well, and even better, with a pencil in its dry condition as when it is moistened at the mouth. It is never necessary to moisten a good lead pencil.

Rev. J. C. Ash's Case.

The court of appeal of the Methodist church was in session week Thursday in Toronto. One case was the appeal of Rev. J. C. Ash, formerly stationed at Cambray, against the Bay of Quinte conference in its refusal to give him a charge. Rev. J. C. Ash was at one time in good standing, but was expelled from the ministry on allegations of immorality. Finally, having admitted his guilt and expressed repentance, he was taken back as a supernumerary, he having signed an agreement to pursue the straight and narrow path. He performed his duties as a supernumerary and had his character passed on by the conferences as excellent. He then demanded an appointment as a regular minister. This was refused, the conference ruling that he had forfeited his right to one by signing the agreement and confession in question. He appealed against this decision, and his appeal was sustained. The Bay of Quinte conference will now be compelled to receive him should he get a call.
