Our Great Cash Business WAS STARTED ON THE FIRST OF THIS MONTH.

We Set the Pace, Others Follow.

In a certain person's advt. last week in the Watchman they tried to make the public believe that they could sell cheaper than we could—if they can it is a wonder they don't. They are always harping that certain man out some time ago that they did a wonder to me that when they bought a bill of sale of everything on the premises, and 10 not pay the cash, but instead of giving a bill of sale of everything on the premises, and 10 cent interest on the money, as security, and if they had so much cash one would think that they could do a good deal better than pay 10 cents on the dollar for old stock. People who live in glass houses should not throw stones. Is it any wonder that the public have to pay two prices for goods?

When we buy goods we buy all new stock, and don't try to palm off old stock on the public and we sell our new stock cheaper than some sell old stock. You will take all some of our prices quoted below. Come with your cash and trade—we take all kinds of trade; we are paying 10c for eggs this week, we are 15c all week.
