A searching party was immediately organized, and after some time the body of the unfortunate woman was found in Head river in about 15 inches of water. Evidence was quite clear that it was a case of suicide. It appears that she had several times before threatened to "do away" with herself, but the family thought nothing of it. Deceased was the widow of the late James McKenzie, who died last June, and leaves seven children in almost June, and leaves seven children in almost destitute circumstances.
