The Chatham Banner has been making some striking comparisons in our farm exports under revenue tariff and since the high tax system was adopted. It points out that during the five years of the Mackenzie administration the value of butter exported from Canada amounted to \$12,854,160, an average of \$3,590,-931 annually. In the last five years the trade amounted to but \$4,391,366, an average of \$868,073; for the preceding five years the showing is even worse, the average being barely \$800,000. ## COMMUNICATIONS.

The Fire and Water Committee. [To the Editor of THE POST.] SIR,-In Monday's EVENING POST Mr. Kylie handles Mr. Begbie without gloves, and I can not see why Mr. Kylie is justified in doing so. Any one who knows Mr. Begbie knows that he is a man of energy and wishes everything he has to look after to be a success; it is not so with Mr. He also seems to be built on a plan to get Kylie, as he distinctly says there was sufficient pressure at the last fire. If by the last fire he means the one that destroy. ed the Jones' property on Durham-st, the firemen admit that the pressure was anything but satisfactory, ard it is well known that the house was burned to the ground. Had it not been for the neighbors the adjoining property would also have gone to ashes,-Yours, Lindsay, Nov. 26th.

The Fire and Water Committee. [To the Editor of THE POST.]

SIR,-I noticed in your issue of the 22nd a complaint from Mr. Begbie about his not being called up the moment the fire alarm is sounded; also a communication from finding fault with the committee. I have the only paid individual around the hall, and in the rush to get the horses out he may forget the telephone. Any fair mind-ed man will excuse him for that; some one else will call up Mr. B., and very little time will be lost. At the last fire there was ample time. There was plenty of pressure and no one suffered, and when the officials bring Mr. Begbie to book for not furnisihing power it will be quite time enough for him to find fault. - Yours,

[To the Sporting Editor of THE POST.] Sir,-Kindly allow me a space in your valuable paper to answer Mr. Harrison's challenge to me. I will state that Mr. Harrison has great presumption in imagining for one moment I would lower my position to wrestle him for such a sum as \$10. Please allow me, Mr. Harrison, to state that owing to my position I would not allow my celf-respect to go so low as that owing to the fact of coming in contact with such men as Wm. Muldoon, Clarence Whistler, Jas. Faulkner and Andrew Christlo, and having been associated with Instructor Mick Donovan, of the New York athletic club, for three years. Is Our Fire Brigade Properly Organ zad?

[To the Editor of THE POST.] SIR,-Anyone reading Mr. Begbie's communication in last Friday's Post must admit the moderation of its tone and the reasonableness of his demands. But Mr. Begbie might have gone further, and instead of merely trusting his case, with a long will they treat him so. Let us be- might have pointed out where the trouble has lack of organization of the fire brigade, and the total absence of headpiece in its

Oriminal Negl'genes Oft Repeate '. [To the Editor of THE POST.]

SIR, -Many times have I spoken to mem bers of the council and of the fire depart ment, urging them to see that three simple requests made by us were complied with, but for some inscrutable reason their promises to do so are never realized.

Now, lest the citizens of Lindsay should be persuaded that these requests are made in a spirit of sheer pernicketyness, permit me to state what they are, and why made. Request No. 1.—That the fire department shall without fail notify the engineer at the pump house before starting for the scene of a fire. The reason in this case is obvious; if the engineer is not notified we can not furnish extra pressure.

Riquest No. 2.-That the fire department shall notify the engineer promptly on their return from a fire. Made because every time that pressure is raised for fire service we are put to considerable expensa in increased consumption of fuel, oil, etc. and there is neither sense or reason in our having to bear this increased expense a need ess length of time.

Request No. 3.—That during the winter months the fire department shall, after attending a fire, notify us which hydrants were used. This is done for the mutual protection of ourselves and the citizens automatically free themselves of water when shut off after use, but owing to say the ground is full of water, and so the means the deuce to pay.

Now, sir, while we have repeatedly furnished, and are willing at all times to provided we can learn for ourselves that a fire is in progress, yet I would like the citizens of Lindsay to clearly understand that we will not be accountable for any trouble arising from a neglect to comply with what I venture to think are very reasonable requests, nor will we be satisfied and the complete requests and the complete requests and the complete requests are provided as a complete requests. fied to go on bearing needless expense in this connection.—Yours, F. SIR,--Ratepayer, in Tue day's DAILY Post states that the firemen admit that the pressure at the Jones fire was not satisfactory. The firemen do not admit any such thing. SIR,-I think it is about time that some efford was made to awaken a little interest in municipal matters. If you think it worthy the space, I will endeavor to give a few initiatory sentiments with a view to open up farther discussions respecting our town's present and prospective condition and position.
