What Bad Roads Cost the Country. The board of trade in a Tennessee town

in a recent memorial to the legislature de-

monstrated that bad roads were costing

the people of that commonwealth more

than \$7,000,000 annually, and there is no

doubt but Ontario suffers a proportionate

loss each year from the same cause. Prof.

W. W. Carson of the university of Tenn-

essee, after careful investigation, found

the average cost of hauling to the Knox-

ville market \$7.50 a ton-aggregating

\$1,250,000 a year on the total tonnage haul-

ed. He maintained that this hauling could

have been done for one-half the sum over

good dirt roads, and for one-sixth of this

over good macadam or Telford roads, sav-

and secretary of the American Economic

A CALGARY MIRACLE.

THE MOST WONDERFUL CASE EVER RECORDED IN THE NORTH-WEST.

Miss Lela Cullen is Rescued From What Her Physicians and Friends Thought to be Her Deathbed.

Winnipeg Tribune. Calgary, N. W. T., Oct. 20th, 1892,-For some time past the residents of this town have been deeply interested in the case of Miss Leia Cullen, a young lady who had so nearly approached the portals of the ing \$1,000,000 annually. Professor R. great unknown that her friends despaired T. Ely of the Johns Hopkins university of her recovery, and who has now fully, indeed almost miraculously, regained her | Association, affirmed that poor roads cost health and strength. Having read on various occasions in The Tribune the particulars of what appeared to be miraculous cures, your correspondent determined to investigate the case of Miss Cullen, and now sends you the particulars fully believing that you will be justified in giving them the widest publication.

When your correspondent visited the

residence of Mrs. Cullen, the mother of the year for one state is shown. In Ontario in young lady, he was courteously received. 1891 there were 678,459 horses, and making and in reply to his enquiries as to whether the same calculation of \$15 a head, this she would be willing to give the facts of her daughter's wonderful recovery for province alone would be losing annually the enormous sum of \$10,176,885. publication for the benefit of other sufferers, Mrs. Cullen readily assented. "My daughter's first illness," said Mrs. Cullen, The Edict Against Canadian Cattle. The following extract is made from the "was in June 1890, when she was taken with the measles. At that time she was London, Eng., Times, and as it touches a seventeen years of age, tall, fine looking, matter of most vital importance to us as and exceedingly healthy, weighing about Canadians we copy it in full: "A deputa-140 pounds. All the family took the tion, introduced by the Duke of Westmeasles, and all got over them without trouble, except Lels. Her case from the minster, waited on the minister of agrifirst baffled all the ordinary remedies used culture on Friday to urge the prohibition for that disease, and as the measles did of the importation of Canadian live cattle. Mr. Gardner said that, after the most careful and anxious investigation, the board of agriculture had come to the my daughter began to improve scmewhat. conclusion that they had absolutely no but did not regain her former strength, and six weeks after she was first taken il alternative but to withdraw the privilege which Canada had enjoyed. They had no other course than to revert to slaughter at and said it was the measles getting out of her system, and that she would soon be all the ports. The deputation thanked the right again. The doctor's statement was minister for the course he had adopted. not verified, however, for not only did my daughter not improve, but she gradually A supplement to Friday night's London grew worse. Soon after she began to Gazatte contained an order embodying the swell, first the feet, then the limbs, breast prohibition of the importation of live and face became puffed up. Another cattle from Canada, except for slaughter at doctor was called in and he pronounced her the ports, in accordance with Mr. Gardner's trouble dropsy, resulting from the messles. The doctor attended her all winter, and alannouncement. though he seemed to do all in his power for With the exclusion of Canadian cattle her, she gradually became weaker and from our ports, and with the clearest proof weaker. Sue did not eat, and tonics falled to improve her appetite, and as she in our hands that the United States and gradually grew weaker she lost her cour-Canada are not free from diseases dangerage, felt that hope of life was fast slipping ous to the health and prosperity of the away. In the spring, the doctor's medicine flocks, herds, and studs of this country, having done her no good, was discontinued,

and instead he gave her preparations of beef, iron and wine, hypophosphites, eggs, cream, etc. In fact, stimulants of this kind had to be constantly forced upon her to keep her alive and I gave up all hope of her recovery, and in my misery waited for her death. She was now so weak that she could not walk across the floor, and in order to rest her we would lift her into a chair, where she would sit for a short longer support her and she could only sit up a very short time each day. In this condition she lingered on until August, 1891 some fifteen months after she was first taken ill, and while we were sorrowfully awaiting what seemed the inevitable end. a ray of hope came. I read in a newspaper | so closely as to prevent cattle from the of a remarkable cure from the use of Dr. Williams' Pink Pills for Pale People, and while I feared that I had heard of this wonderful medicine too late, I hoped almost against hope and sent to the headquarters of the company, at Brockville, Oat., for a supply. At this time, Lala was not able to be removed from bed; her weight was reduced to 90 pounds, and her lips were blue. You will thus see how little hope there appeared for her when she began the use of Dr. Williams' Pink Pills. After she had taken the first box, although there was no visible improvement, she thought they were doing her good, and her spirits began to rise. At the end of the second box I could notice the improvement, and Lela was very hopeful, and felt life was returning to her again. After she had been taking Dr.
